An Area Variance is authorization by the Kenosha County Board of Adjustments to vary one or more of the dimensional or physical requirements of the applicable zoning law, code or ordinance in connection with some proposed construction.

The burden will be on you as property owner to provide information upon which the board may base its decision. At the hearing, any party may appear in person or may be represented by an agent or attorney. You or your agent must convince the zoning board to make a ruling in your favor. The board must make its decision based only on the evidence submitted to it at the time of the hearing. Unless you or your agent is present, the board may not have sufficient evidence to rule in your favor and must then deny your application.

(1) Describe alternatives to your proposal such as other locations, designs and construction techniques. Attach a site map showing alternatives you considered in each category below:

(A) Alternatives you considered that comply with existing standards. If you find such an alternative, you can move forward with this option with a regular permit. If you reject compliant alternatives, provide the reasons you rejected them.

(B) Alternatives you considered that require a lesser variance. If you reject such alternatives, provide the reasons you rejected them.

(2) Will there be an unnecessary hardship to the property owner to strictly comply with the ordinance?

Unnecessary hardship exists when compliance would unreasonably prevent the owner from using the property for a permitted purpose (leaving the property owner without any use that is permitted for the property) or would render conformity with such restrictions unnecessarily burdensome.

An applicant may not claim unnecessary hardship because of conditions which are self-imposed or created by a prior owner (for example, excavating a pond on a vacant lot and then arguing that there is no suitable location for a home or claiming that they need more outbuilding space than that permitted to store personal belongings). Courts have also determined that economic or financial hardship does not justify a variance. When determining whether unnecessary hardship exists, the property as a whole is considered rather than a portion of the parcel. The property owner bears the burden of proving unnecessary hardship.

(3) Do unique physical characteristics of your property prevent compliance with the ordinance? If yes, please explain.

Unique physical limitations of the property such as steep slopes or wetlands that are not generally shared by other properties must prevent compliance with the ordinance requirements. The circumstances of an applicant (growing family, need for a larger garage, etc.) are not a factor in deciding variances. Nearby ordinance violations, prior variances or lack of objections from neighbors do not provide a basis for granting a variance.

(4) What would be the effect on this property, the community or neighborhood and the public interest if the variance was granted? How can these impacts be mitigated.

These interests are listed as objectives in the purpose statement of an ordinance and may include: drainage, visual impact, and fire safety and building code requirements.

The undersigned hereby attests that the above stated information is true and accurate and further gives permission to Planning & Development staff and Board of Adjustment members to view the premises, in relation to the Appeal request made herein, during reasonable daylight hours.

A modification in wastewater flow or contaminant load or both does not result in the construction of open decks, patios or porches, garages, re-roofing, painting, wiring, re-siding, window replacement or the replacement of equipment or appliances.

SHEETS ARE TO BE REVIEWED AND NOTES ON ANY ONE SHEET ARE TO BE APPLIED ON RELATED DRAWINGS AND DETAILS.

6. THE STRUCTURAL, MECHANICAL, ELECTRICAL AND PLUMBING DRAWINGS ARE OF EQUAL IMPORTANCE WITH THE ARCHITECTURAL DRAWINGS IN DEFINING THE WORK OF THE CONTRACT DOCUMENTS. THE CONTRACTOR SHALL COORDINATE PLACEMENT OF ALL COMPONENTS WITH ARCHITECTURAL, MECHANICAL, ELECTRICAL, PLUMBING, AND FIRE PROTECTION TRADES. WHERE DISCREPANCIES EXIST BETWEEN DRAWINGS AND INSTALLATION CONSULT THE ARCHITECT BEFORE PROCEEDING WITH THE WORK. ANY WORK INSTALLED IN CONFLICT WITH THE ARCHITECTURAL DRAWINGS SHALL BE CORRECTED BY THE CONTRACTOR AT HIS EXPENSE AND AT NO ADDITIONAL COST TO THE OWNER.

Department of Planning and Development

VARIANCE PROCEDURES BEFORE THE BOARD OF ADJUSTMENTS

- ☐ 1. Contact the Department of Planning & Development and schedule a pre-application meeting. Bring the following for your pre-application meeting:
 - ☐ Completed variance application.
 - ☐ If you are in the process of purchasing the property and have yet to close, you need to provide a signed letter of agent status signed by the current property owner authorizing you to apply for the variance on their behalf.
 - ☐ A to-scale survey of the property with the following information provided.
 - ☐ Size and location of all existing structures on the property and their distances from property lines (any street yard setback should be taken from the edge of the road right of way), environmental features such as an ordinary high water mark (lake or stream) or wetland, and any onsite septic tank and associated septic field (if applicable).
 - ☐ Location and dimensions of the proposed structure(s) and their resulting setback distances from property lines (any street yard setback should be taken from the edge of the road right of way), environmental features such as an ordinary high water mark (lake or stream) or wetland, and any onsite septic tank and associated septic field (if applicable).
 - ☐ Construction plans
 - ☐ A filing fee of \$550 (non-refundable) is required at the time of application submittal time to cover the costs agenda preparation, public hearing notification, site visits, etc....
- ☐ 4. Submit the above information by the filing deadline (see Board of Adjustment Schedule handout) with the Department of Planning and Development. Once Planning & Development staff have confirmed the application is substantially completed, Planning & Development will provide you with a date-stamped copy of your variance application.
- ☐ 5. Submit a copy of your date-stamped variance application to your local Township for placement on the agenda of the Town Planning Commission and/or the Town Board.
- ☐ 6. Your first meeting will be with the Town Planning Commission, except for the Town of Wheatland. The Town of Somers has a Board of Appeals.

NOTE: You must attend, or the Commission/Board will not be able to act on your request.

- ☐ 7. Your second meeting will be with the Town Board.

NOTE: You must attend, or the Board will not be able to act on your request.

- ☐ 8. Your third meeting will be with the County Board of Adjustments.

NOTE: You must attend, or the Board of Adjustments will not be able to act on your request. At this meeting you will be asked to brief the Board on your request for a variance and state your reasons for hardship (see Public Hearing Variance Standards handout).

- ☐ 9. If the Board of Adjustments grants your variance request you may obtain your zoning permit from the Office of Planning and Development. The permit will be issued if all requirements from this office have been addressed, including sanitation and if you are the current owner of the property.

Expiration: Variances granted by the Board that require issuance of a zoning permit shall expire within one year of approval unless the zoning permit is issued. Zoning permits issued in accordance with Board of Adjustments approval are valid for 18 months and may not be renewed without Board of Adjustment approval. Variances are approved for specific sizes and dimensions. No additions shall be approved which affect the area for which the variance was granted unless approved by the Board of Adjustments.

No zoning permits issued for work approved by a variance shall be renewed unless “substantial construction” – the value of such work that has commenced equivalent to 25% of the projected cost of the project as noted on the application for the zoning permit, has commenced.

Appeals: Any person or persons jointly or severally, aggrieved by any decision of the Board of Adjustment, or any taxpayer, or any officer, department, board or bureau of the municipality, may present to a court of record a petition, duly verified, setting forth that such decision is illegal, in whole or in part, specifying the ground of illegality. Such petition shall be presented to the court within thirty days after the filing of the decision in the office of the Board.

Any work the property owner commences with the window for appeal is at their own risk.

- ☐ 10. If the Board of Adjustments denies your variance you have thirty (30) days to file an appeal with circuit court if you so choose.

PUBLIC HEARING VARIANCE STANDARDS

- ❑ YOUR PUBLIC HEARING WILL BE BASED ON THE FOLLOWING STANDARDS FROM THE KENOSHA COUNTY GENERAL ZONING AND SHORELAND/FLOODPLAIN ZONING ORDINANCE.

CHAPTER 12.36-1 **INTENT**

- ❑ It is the intent of this section of the Ordinance to recognize that under certain conditions and circumstances, it may be necessary to obtain a variance from the terms of this Ordinance so long as said variance will not be contrary to the public interest, and where, owing to special conditions, a literal enforcement of the provisions of the Ordinance will result in unnecessary hardship or practical difficulties and where the granting of such variance will uphold the spirit of this Ordinance and contribute to the justice of the particular case in question. Any variance granted under the terms of this ordinance shall, however, relate only to area requirements and not to use. Furthermore, it is the intent of this section to establish a Board of Adjustments for the purpose of reviewing applications for variances as well as reviewing orders and decisions made by the Office of Planning and Development.

CHAPTER 12.36-13 **STANDARDS AND GUIDELINES**

- ❑ In determining whether a variance is to be granted, the following standards and guidelines must be met in view of the evidence presented and in making its decision, these standards and guidelines shall be addressed by the board of adjustment:
 1. The existence of special conditions or exceptional circumstances on the land in question.
 2. The experiencing of unnecessary hardships or practical difficulties on the land in question either presently or in the future.
 3. That these hardships or difficulties are the result of the aforementioned special conditions existing on the land and are not self-inflicted.
 4. That the existence of these special conditions will restrict the use of the land if the Ordinance is applied literally so as to render the land useless.
 5. That the limitation on the use of the land does not apply generally to other properties in the district.
 6. That limiting the use of the property does not afford compensating gains to the public health, safety and welfare.
 7. That the variance(s) requested are the minimum variance(s) needed to alleviate difficulties or hardships.
 8. That the use of the parcel in question presently does conform to the ordinance.

**VARIANCE PROCEDURES &
PUBLIC HEARING VARIANCE STANDARDS**

9. That granting the variance applied for will not affect the public health, safety, morals and welfare of the community and other properties in the area.
 10. That with respect to those areas located within the floodland districts, a variance would not permit a change in the boundaries of the FPO Floodplain Overlay District; would not permit a lower degree of flood protection in the floodland districts than the floodplain elevation; would not allow any residential, commercial, institutional, or park basement or crawlway to be located below the 100-year recurrence interval flood elevation; would not allow a change or alteration of an historic structure, including its use, which would result in the structure losing its designation as an historic structure; further, that the variance for the proposed action would not require an amendment to the floodplain zoning ordinance; and furthermore, that the variance would not have the effect of granting or increasing a use property which is prohibited in the floodland districts or any action contrary to the provisions of Chapter NR 116 of the Wisconsin Administrative Code.
 11. In addition to the criteria in subd. (10) above to qualify for a variance under FEMA regulations, the following criteria must be met:
 - a. The variance shall not cause any increase in the regional flood elevation;
 - b. Variances can only be granted for lots that are less than one-half acre and are contiguous to existing structures constructed below the RFE; and
 - c. Variances shall only be granted upon a showing of good and sufficient cause, shall be the minimum relief necessary, shall not cause increased risks to public safety or nuisances, shall not increase costs for rescue and relief efforts and shall not be contrary to the purpose of the ordinance.
- ☐ Variances may be granted for example for reasons of topography, environmental protection or where permitted by state statute but in no event may a variance be granted where the primary reason for obtaining a variance is to obtain a more profitable use of the property, personal inconvenience, construction errors, economic reasons, self-created hardships, or where the property is presently a non-conforming use. Furthermore, variances may not be granted for the purpose of altering the sanitary requirements of this ordinance except for existing structures.
 - ☐ The Board of Adjustments in considering the propriety of granting a variance shall not consider the number of persons for or against the granting of a variance but shall base their decision solely upon the equities of the situation involved.
 - ☐ Variances may be granted in the form of an area or distance variance, however, use variances shall be specifically prohibited under this Ordinance.
 - ☐ When a floodplain variance is granted the Board shall notify the applicant in writing that it may increase risks to life and property and flood insurance premiums could increase up to \$25.00 per \$100.00 of coverage. A copy shall be maintained with the variance record.

A variance within any floodland district shall not:

1. Damage the rights or property values of other persons in the area;
2. Allow actions without the amendments to this ordinance or map(s) required in 12.60.040 Amendments; and
3. Allow any alteration of an historic structure, including its use, which would preclude its continued designation as an historic structure.

Statutory Standards

- ☐ The applicant for a variance must clearly show the Board of Adjustments that three statutory standards that govern granting a variance will be met. These three standards require the existence of an unnecessary hardship, the presence of a unique property limitation, and the protection of the public interest.
- ☐ Unnecessary Hardship
 - ❖ A situation where, in the absence of a variance, an owner can make no feasible use of a property, or strict conformity is unnecessarily burdensome.
 - ❖ The hardship or difficulty must be peculiar to the zoning parcel in question and different from that of other parcels, not one which affects all parcels similarly.
- ☐ Unique Property Limitation
 - ❖ Unique physical characteristics of the property must prevent the applicant from developing in compliance with the zoning ordinance.
- ☐ Protection of the Public Interest
 - ❖ Granting of a variance must neither harm the public interest nor undermine the purposes of the ordinance. The public interest includes the interests of the public at large, not just that of nearby property owners.
 - ❖ Conditions may be attached to a variance to protect adjoining properties and to preserve the essential character of the neighborhood.
 - ❖ A variance should include only the minimum relief necessary to allow reasonable use of a property.

VARIANCE WORKSHEET

YOUR THREE STATUTORY STANDARDS TO PROVE BEFORE THE BOARD OF ADJUSTMENTS. (BE READY TO DISCUSS AT THE MEETING)

UNNECESSARY HARDSHIP -

The current property has no parking. As the primary structure is located, there is no space for a car between the house and the street. Given the current zoning, there is no conceivable way for an addition to be constructed that is in compliance with the municipal code as it is written; largely due to the shape and size of the property, which the code does not seem designed for.

Parking for an owner's vehicle is a permitted use for a residential property, and there is no way to achieve this within the current code. We believe this constitutes a hardship.

Additionally, there is a provision in the Shoreland Regulations for a lateral expansion to the structure; in order to achieve this, the side-yard setback requires a variance (reduction) to allow for the lateral expansion to occur.

This lateral expansion is to address concerns with a trench footing on the south side of the house, and allow for an expansion to the bedroom so it is accessible for those with access impairments.

UNIQUE PROPERTY LIMITATION -

The shape of the property, size of the property, and the property's relationship to the road are very unique; which make compliance with setbacks that have been established since the primary structure was constructed in 1936 impossible.

The existing structure is within 2' of the street; a street which is excessively wide for the traffic it bares. Moreover, not all of the width of the street is plowed in the winter, frequently burying cars and access to the house from residents.

We do not believe modifying this 2' setback to 0' will have any impact on the neighborhood, and instead will infact improve the use of the road and ability for pedestrians around the lake to stay away from cars.

Additionally, the combined slope of the site and street in the winter time is dangerous with snow and ice for walking. (Increasingly so as the owners age.)

PROTECTION OF THE PUBLIC INTEREST -

All 'compliant' alternatives for a 900SF addition require a modification to three aspects of the site's zoning per Chapter 12, Section 32.040 of Kenosha's Municipal Code.

(G1) Street Setback: The current structure is within 2FT of the road, an addition will reduce this to 0FT.

(G2) Shore Setback: The current structure is within 75FT of the water, an addition will maintain this dist.

(G3) Sideyard Setback: The current structure adheres to the 10FT sideyard setback, we propose reducing this to 5' to allow space to create the addition.

12.09.100(b)2: The current site must maintain existing retaining walls, patio, & secondary structures; this is essential to protecting the dwelling from erosion and maintaining current drainage strategies - which includes dispering rain water from the patio into the hill, rather than allowing it to flow into the lake.

The effect on Drainage and Visual Impact would be marginal. Given that this is a private residence, there is very (if any) public interest in the land or project.

To the Kenosha County Board of Adjustment:

Please take notice that the undersigned was refused a Zoning Permit by the Kenosha County Department of Planning and Development for lands described below for the reason that the application failed to comply with the Kenosha County General Zoning and Shoreland/Floodplain Zoning Ordinance. The owner or assigned agent herewith appeals said refusal and seeks a variance.

Parcel Number: 45-4-221-033-0200 Zoning District: A-1

Property Address: 16700 7th St Shoreland: No

Subdivision: - Lot(s): - Block: -

Current Use: 1948-built single-family residence w/ multiple outbuildings

Proposal: To construct a residential addition onto the existing
single-family residence.

REQUIRED BY ORDINANCE

- Section: V. B. 12.28-7 - Non-conforming structures which encroach upon the yard requirements of this ordinance, but which met yard requirements of the applicable zoning ordinance at the time of construction, may be structurally enlarged or expanded if the existing structure is located at a minimum of at least fifty (50) percent of the minimum setback requirement of all yard setback requirements and further provided that the alteration does not create a greater degree of encroachment on yard, height, parking, loading, or access requirements.
- Section: _____ -
- Section: _____ -

VARIANCE REQUESTED

Required structural setback from CTH right-of-way is 65 feet. Existing non-conforming structure (residence) is 63.12 feet from right-of-way. Petitioner is proposing an addition to structure that will make new highway setback 57 feet.

VARIANCE APPLICATION

An Area Variance is authorization by the Kenosha County Board of Adjustments to vary one or more of the dimensional or physical requirements of the applicable zoning law, code or ordinance in connection with some proposed construction.

The burden will be on you as property owner to provide information upon which the board may base its decision. At the hearing, any party may appear in person or may be represented by an agent or attorney. You or your agent must convince the zoning board to make a ruling in your favor. The board must make its decision based only on the evidence submitted to it at the time of the hearing. Unless you or your agent is present, the board may not have sufficient evidence to rule in your favor and must then deny your application.

(1) Describe alternatives to your proposal such as other locations, designs and construction techniques. Attach a site map showing alternatives you considered in each category below:

(A) Alternatives you considered that comply with existing standards. If you find such an alternative, you can move forward with this option with a regular permit. If you reject compliant alternatives, provide the reasons you rejected them.

WE ARE REJECTING ALTERNATIVES THAT COULD COMPLY W/EXISTING STANDARDS, DUE TO THE EXISTING HOME BEING NON-COMPLIANT SINCE CURRENT CODES HAVE BEEN PUT IN PLACE. HOME IS BELIEVED TO HAVE BEEN BUILT IN 1948 AND HAS NOT CAUSED ANY ISSUES OR HARM TO THE COMMUNITY OR PLANNING IN THE AREA.

(B) Alternatives you considered that require a lesser variance. If you reject such alternatives, provide the reasons you rejected them.

WE REJECT ANY LESSER VARIANCE, BECAUSE THE VAST MAJORITY OF PROPOSED PROJECT IS BEYOND THE ORDINANCE SETBACK AND DESIRE TO KEEP THE FRONT ENTRY/EXIT ON THE FRONT OF HOME.

(2) Will there be an unnecessary hardship to the property owner to strictly comply with the ordinance?

Unnecessary hardship exists when compliance would unreasonably prevent the owner from using the property for a permitted purpose (leaving the property owner without any use that is permitted for the property) or would render conformity with such restrictions unnecessarily burdensome.

An applicant may not claim unnecessary hardship because of conditions which are self-imposed or created by a prior owner (for example, excavating a pond on a vacant lot and then arguing that there is no suitable location for a home or claiming that they need more outbuilding space than that permitted to store personal belongings). Courts have also determined that economic or financial hardship does not justify a variance. When determining whether unnecessary hardship exists, the property as a whole is considered rather than a portion of the parcel. The property owner bears the burden of proving unnecessary hardship.

VARIANCE APPLICATION

WE BELIEVE IT WOULD BE UNREASONABLE TO STRICTLY COMPLY WITH THE ORDINANCE BECAUSE IT WOULD REQUIRE THE MOVEMENT OF EXISTING HOME AND FOUNDATION FURTHER TO THE NORTH OF PROPERTY LINE.

- (3) Do unique physical characteristics of your property prevent compliance with the ordinance? If yes, please explain.

Unique physical limitations of the property such as steep slopes or wetlands that are not generally shared by other properties must prevent compliance with the ordinance requirements. The circumstances of an applicant (growing family, need for a larger garage, etc.) are not a factor in deciding variances. Nearby ordinance violations, prior variances or lack of objections from neighbors do not provide a basis for granting a variance.

THERE ARE NO UNIQUE PHYSICAL CHARACTERISTICS OF THIS PROPERTY OTHER THAN THE EXISTING HOME IS CURRENTLY NOT IN COMPLIANCE.

- (4) What would be the effect on this property, the community or neighborhood and the public interest if the variance was granted? How can these impacts be mitigated.

These interests are listed as objectives in the purpose statement of an ordinance and may include: drainage, visual impact, and fire safety and building code requirements.

THE EFFECT TO THE COMMUNITY, NEIGHBORHOOD, AND GENERAL PUBLIC INTEREST WOULD ONLY BE TO CONTINUE AND ENHANCE TYPICAL ARCHITECTURE OF AREA HOMES WITH COVERED FRONT PORCHES AND PLEASING AESTHETICS. THE VARIANCE REQUESTED WOULD STILL MAINTAIN 87% OF THE MINIMUM SETBACK.

The undersigned hereby attests that the above stated information is true and accurate and further gives permission to Planning & Development staff and Board of Adjustment members to view the premises, in relation to the Appeal request made herein, during reasonable daylight hours.

 - b. For purposes of this ordinance and this provision only, a modification in wastewater flow or contaminant load or both may result in; a change in roofline, the conversion of storage area to building area or floor area, re-wiring, re-insulating, re-constructing a foundation, enclosing open porches, decks or patios, replacing drywall, plaster or paneling, removal or construction of interior walls. A modification in wastewater flow or contaminant load or both does not result in the construction of open decks, patios or porches, garages, re-roofing, painting, wiring, re-siding, window replacement or the replacement of equipment or appliances.

 - ☐ A to-scale survey of the property with the following information provided.
 - ☐ Size and location of all existing structures on the property and their distances from property lines (any street yard setback should be taken from the edge of the road right of way), environmental features such as an ordinary high water mark (lake or stream) or wetland, and any onsite septic tank and associated septic field (if applicable).
 - ☐ Location and dimensions of the proposed structure(s) and their resulting setback distances from property lines (any street yard setback should be taken from the edge of the road right of way), environmental features such as an ordinary high water mark (lake or stream) or wetland, and any onsite septic tank and associated septic field (if applicable).
 - ☐ Construction plans
 - ☐ A filing fee of \$550 (non-refundable) is required at the time of application submittal time to cover the costs agenda preparation, public hearing notification, site visits, etc....
- ☐ 4. Submit the above information by the filing deadline (see Board of Adjustment Schedule handout) with the Department of Planning and Development. Once Planning & Development staff have confirmed the application is substantially completed, Planning & Development will provide you with a date-stamped copy of your variance application.
- ☐ 5. Submit a copy of your date-stamped variance application to your local Township for placement on the agenda of the Town Planning Commission and/or the Town Board.
- ☐ 6. Your first meeting will be with the Town Planning Commission, except for the Town of Wheatland. The Town of Somers has a Board of Appeals.

**VARIANCE PROCEDURES &
PUBLIC HEARING VARIANCE STANDARDS**

NOTE: You must attend, or the Commission/Board will not be able to act on your request.

- ☐ 7. Your second meeting will be with the Town Board.

NOTE: You must attend, or the Board will not be able to act on your request.

- ☐ 8. Your third meeting will be with the County Board of Adjustments.

NOTE: You must attend, or the Board of Adjustments will not be able to act on your request. At this meeting you will be asked to brief the Board on your request for a variance and state your reasons for hardship (see Public Hearing Variance Standards handout).

- ☐ 9. If the Board of Adjustments grants your variance request you may obtain your zoning permit from the Office of Planning and Development. The permit will be issued if all requirements from this office have been addressed, including sanitation and if you are the current owner of the property.

Zoning permits issued in accordance with Board of Adjustments approval are valid for 18 months and may not be renewed without Board of Adjustment approval. Variances are approved for specific sizes and dimensions. No additions shall be approved which affect the area for which the variance was granted unless approved by the Board of Adjustments.

PUBLIC HEARING VARIANCE STANDARDS

- ☐ YOUR PUBLIC HEARING WILL BE BASED ON THE FOLLOWING STANDARDS FROM THE KENOSHA COUNTY GENERAL ZONING AND SHORELAND/FLOODPLAIN ZONING ORDINANCE.

CHAPTER 12.36-1 **INTENT**

- ☐ It is the intent of this section of the Ordinance to recognize that under certain conditions and circumstances, it may be necessary to obtain a variance from the terms of this Ordinance so long as said variance will not be contrary to the public interest, and where, owing to special conditions, a literal enforcement of the provisions of the Ordinance will result in unnecessary hardship or practical difficulties and where the granting of such variance will uphold the spirit of this Ordinance and contribute to the justice of the particular case in question. Any variance granted under the terms of this ordinance shall, however, relate only to area requirements and not to use. Furthermore, it is the intent of this section to establish a Board of Adjustments for the purpose of reviewing applications for variances as well as reviewing orders and decisions made by the Office of Planning and Development.

CHAPTER 12.36-13 **STANDARDS AND GUIDELINES**

- ☐ In determining whether a variance is to be granted, the following standards and guidelines must be met in view of the evidence presented and in making its decision, these standards and guidelines shall be addressed by the board of adjustment:
1. The existence of special conditions or exceptional circumstances on the land in question.
 2. The experiencing of unnecessary hardships or practical difficulties on the land in question either presently or in the future.
 3. That these hardships or difficulties are the result of the aforementioned special conditions existing on the land and are not self-inflicted.
 4. That the existence of these special conditions will restrict the use of the land if the Ordinance is applied literally so as to render the land useless.
 5. That the limitation on the use of the land does not apply generally to other properties in the district.
 6. That limiting the use of the property does not afford compensating gains to the public health, safety and welfare.
 7. That the variance(s) requested are the minimum variance(s) needed to alleviate difficulties or hardships.
 8. That the use of the parcel in question presently does conform to the ordinance.

**VARIANCE PROCEDURES &
PUBLIC HEARING VARIANCE STANDARDS**

9. That granting the variance applied for will not affect the public health, safety, morals and welfare of the community and other properties in the area.
 10. That with respect to those areas located within the floodland districts, a variance would not permit a change in the boundaries of the FPO Floodplain Overlay District; would not permit a lower degree of flood protection in the floodland districts than the floodplain elevation; would not allow any residential, commercial, institutional, or park basement or crawlway to be located below the 100-year recurrence interval flood elevation; would not allow a change or alteration of an historic structure, including its use, which would result in the structure losing its designation as an historic structure; further, that the variance for the proposed action would not require an amendment to the floodplain zoning ordinance; and furthermore, that the variance would not have the effect of granting or increasing a use property which is prohibited in the floodland districts or any action contrary to the provisions of Chapter NR 116 of the Wisconsin Administrative Code.
 11. In addition to the criteria in subd. (10) above to qualify for a variance under FEMA regulations, the following criteria must be met:
 - a. The variance shall not cause any increase in the regional flood elevation;
 - b. Variances can only be granted for lots that are less than one-half acre and are contiguous to existing structures constructed below the RFE; and
 - c. Variances shall only be granted upon a showing of good and sufficient cause, shall be the minimum relief necessary, shall not cause increased risks to public safety or nuisances, shall not increase costs for rescue and relief efforts and shall not be contrary to the purpose of the ordinance.
- ☐ Variances may be granted for example for reasons of topography, environmental protection or where permitted by state statute but in no event may a variance be granted where the primary reason for obtaining a variance is to obtain a more profitable use of the property, personal inconvenience, construction errors, economic reasons, self-created hardships, or where the property is presently a non-conforming use. Furthermore, variances may not be granted for the purpose of altering the sanitary requirements of this ordinance except for existing structures.
 - ☐ The Board of Adjustments in considering the propriety of granting a variance shall not consider the number of persons for or against the granting of a variance but shall base their decision solely upon the equities of the situation involved.
 - ☐ Variances may be granted in the form of an area or distance variance, however, use variances shall be specifically prohibited under this Ordinance.
 - ☐ When a floodplain variance is granted the Board shall notify the applicant in writing that it may increase risks to life and property and flood insurance premiums could increase up to \$25.00 per \$100.00 of coverage. A copy shall be maintained with the variance record.

A variance within any floodland district shall not:

1. Damage the rights or property values of other persons in the area;
2. Allow actions without the amendments to this ordinance or map(s) required in 12.60.040 Amendments; and
3. Allow any alteration of an historic structure, including its use, which would preclude its continued designation as an historic structure.

Statutory Standards

- ☐ The applicant for a variance must clearly show the Board of Adjustments that three statutory standards that govern granting a variance will be met. These three standards require the existence of an unnecessary hardship, the presence of a unique property limitation, and the protection of the public interest.
- ☐ Unnecessary Hardship
 - ❖ A situation where, in the absence of a variance, an owner can make no feasible use of a property, or strict conformity is unnecessarily burdensome.
 - ❖ The hardship or difficulty must be peculiar to the zoning parcel in question and different from that of other parcels, not one which affects all parcels similarly.
- ☐ Unique Property Limitation
 - ❖ Unique physical characteristics of the property must prevent the applicant from developing in compliance with the zoning ordinance.
- ☐ Protection of the Public Interest
 - ❖ Granting of a variance must neither harm the public interest nor undermine the purposes of the ordinance. The public interest includes the interests of the public at large, not just that of nearby property owners.
 - ❖ Conditions may be attached to a variance to protect adjoining properties and to preserve the essential character of the neighborhood.
 - ❖ A variance should include only the minimum relief necessary to allow reasonable use of a property.

VARIANCE WORKSHEET

YOUR THREE STATUTORY STANDARDS TO PROVE BEFORE THE BOARD OF ADJUSTMENTS. (BE READY TO DISCUSS AT THE MEETING)

UNNECESSARY HARDSHIP -

THE PROPOSED CONSTRUCTION IS NEEDED FOR THE REASONABLE USE OF THE HOME AND IN MAINTAINING A SAFE FRONT ENTRY/EXIT.

UNIQUE PROPERTY LIMITATION -

THE EFFECT TO THE COMMUNITY, NEIGHBORHOOD, AND GENERAL PUBLIC INTEREST WOULD ONLY BE TO COMPLEMENT AREA ARCHITECTURE WITH COVERED FRONT PORCHES.

* CURRENT STRUCTURE WAS BUILT PRIOR TO CURRENT ORDINANCE LIMITATIONS AND IS NOT CURRENTLY IN COMPLIANCE -

PROTECTION OF THE PUBLIC INTEREST -

THE CURRENT NON COMPLIANT HOME HAS NOT CAUSED ANY HARM TO THE PUBLIC AND THE ADDITIONAL INCURSION INTO THE SETBACK WOULD BE MINIMAL, WHILE ADDING TO THE PUBLIC INTEREST OF IMPROVING THE EXISTING STRUCTURE.

12.31.010 A-1 agricultural preservation district.**(a) Primary Purpose and Characteristics.**

The Kenosha County Board of Supervisors recognizes that the rapid conversion of farm land to urban use has led to increasing public concern over such conversion. This concern centers on the perceived loss of the local agriculture economic base, loss of agricultural land as a valuable natural resource with the attendant loss of the aesthetic and environmental values associated with that resource, and the loss of the rural lifestyle and the unique cultural heritage which emanates from that lifestyle, and the attendant high costs of providing urban services as well as resolving potential urban-rural conflicts which arise as a result of urban encroachment into rural areas. Therefore, the A-1 Agricultural Preservation District is intended to maintain, enhance, and preserve agricultural lands historically utilized for crop production and the raising of livestock. The preservation of such agricultural lands is intended to conserve energy, prevent urban sprawl, maintain open space, retain natural systems and natural processes, control public cost, preserve the local economic base, promote local self-sufficiency, preserve the rural life-style, and maintain regional, state and national agricultural reserves. The District is further intended to prevent the premature conversion of agricultural land to scattered residential, commercial and industrial uses.

It is recognized that it is neither possible nor practicable to list all of the principal and accessory uses that are compatible with those listed below and therefore, it is intended that the following list of principal and accessory uses only be illustrative. Any individual aggrieved by a failure to list a particular principal or accessory use in this subsection shall have the right to file a petition with the Kenosha County Department of Planning and Development pursuant to section [12.55](#) of this ordinance for a determination as to the similarity of the intended use with the principal and accessory uses listed below.

An Area Variance is authorization by the Kenosha County Board of Adjustments to vary one or more of the dimensional or physical requirements of the applicable zoning law, code or ordinance in connection with some proposed construction.

The burden will be on you as property owner to provide information upon which the board may base its decision. At the hearing, any party may appear in person or may be represented by an agent or attorney. You or your agent must convince the zoning board to make a ruling in your favor. The board must make its decision based only on the evidence submitted to it at the time of the hearing. Unless you or your agent is present, the board may not have sufficient evidence to rule in your favor and must then deny your application.

(1) Describe alternatives to your proposal such as other locations, designs and construction techniques.

Attach a site map showing alternatives you considered in each category below:

(A) Alternatives you considered that comply with existing standards. If you find such an alternative, you can move forward with this option with a regular permit. If you reject compliant alternatives, provide the reasons you rejected them.

—

—

—

(B) Alternatives you considered that require a lesser variance. If you reject such alternatives, provide the reasons you rejected them.

(2) Will there be an unnecessary hardship to the property owner to strictly comply with the ordinance?

Unnecessary hardship exists when compliance would unreasonably prevent the owner from using the property for a permitted purpose (leaving the property owner without any use that is permitted for the property) or would render conformity with such restrictions unnecessarily burdensome.

A Hardship Variance is requested due to serious safety concerns for the occupants of the home. The current living quarter's location relative to the curvature of 93rd Street when travelling in the westbound direction has in the past caused serious damage to the living quarters and substantial risk of harm to the occupants. On three separate occasions vehicles travelling from east to west on 93rd Street have missed the curve in the road and have struck the residence as summarized below and detailed in this Application.

July 28th, 2023 -- Kenosha County Incident Number 23-331792, (Hit and Run) (Report and Photos Attached) (Resulted in Physical Damage to County and Personal Property Vehicle)

March 2007 – An intoxicated driver of a tandem axial truck missed the curve and drove through the kitchen, living room and garage. Fortunately, the occupants of the house arrived 5 minutes after the accident. Damage to the Dwelling was over \$ 100,000. (See Detailed Pictures Attached in this Application).

August 1989 -- A vehicle missed the curve, hit the garage, and travelled down the hill ending up approx. 40 feet from the lake shore. (Pictures Attached)

- 3) Do unique physical characteristics of your property prevent compliance with the ordinance? If yes, please explain.

As the location of the existing 1947 house poses Hazardous and Life-Threatening conditions to the Occupants in the Living Quarters of the current home, a request to relocate a planned new home with alternative setbacks is being requested through this Hardship Variance Application. For your reference in considering this Hardship Variance, I believe it is worth noting that several of the current setbacks of this 1947 home are less than the current codes require with a current setback of (15') from the Road Right of Way and an approximate (54') setback from the High-Water Mark on the Lake Side. In addition, the southern edge of the paved shoulder of 93rd Street has been remains an abundantly wide shoulder of approx. 8 feet from the edge of the road and approx. 20 feet from the centerline of 93rd Street. Therefore, for the placement of the anticipated new residence, I am requesting a further reduced setback from the Right of Way of the Road of 5 feet. This 5 foot setback will be from the Right of Way to the " Non-Living Quarters (The Garage) of the structure. In addition, I am requesting a reduced Setback from the Ordinary High-Water Mark so as to provide a Substantial SAFER location for the Living Quarter and occupants as depicted in the attached site plan.

Unique physical limitations of the property such as steep slopes or wetlands that are not generally shared by other properties must prevent compliance with the ordinance requirements. The circumstances of an applicant (growing family, need for a larger garage, etc.) are not a factor in deciding variances. Nearby ordinance violations, prior variances, or lack of objections from neighbors do not provide a basis for granting a variance.

- (4) What would be the effect on this property, the community or neighborhood and the public interest if the variance was granted? How can these impacts be mitigated.

These interests are listed as objectives in the purpose statement of an ordinance and may include drainage, visual impact, and fire safety and building code requirements.

The main purpose for granting this Variance would be to ensure the safety of the occupants in the living quarters from serious injury or death. The requested relocation of the house will not interfere with the site line view of either property owner on the east or west property lines nor the general community.

The undersigned hereby attests that the above stated information is true and accurate and further gives permission to Planning & Development staff and Board of Adjustment members to view the premises, in relation to the Appeal request made herein, during reasonable daylight hours.

6. This section is only applicable for properties within the unincorporated townships of Kenosha County (townships of Brighton, Paris, Randall, Somers & Wheatland).

If you are proposing to construct a principal building such as a new residence or new commercial building, an addition thereto, or a detached accessory building >150 sq. ft. in area, it is required that a [professional surveyor](#) be hired to complete a foundation survey of the property after the foundation is installed for the permitted building and submit said survey document to this office in order to prove that the proposed building has been constructed in the correct location and meets setback requirements.

This section is not applicable for sheds ≤150 sq. ft. in area or other accessory structures such as decks, fences and pools.

I anticipate that a foundation survey will be submitted to this office no later than _____ (insert date).

We understand this deadline needs to be flexible due to reasons such as weather, construction delays, etc., however a due date later than 18 months from the date of permit issuance will not be accepted. If a foundation survey is not received by the anticipated

due date, the property owner will receive an automated letter notifying them of past due status. If a mutually agreed revised due date is not set, and a foundation survey is not submitted, violation and enforcement will proceed.

7. This section is only applicable for properties within the Village of Somers.

If you are proposing to construct a principal building such as a new residence or new commercial building, it is required that a [professional surveyor](#) be hired to complete a foundation survey of the property after the foundation is installed for the permitted building and submit said survey document to this office in order to prove that the proposed building has been constructed in the correct location and meets setback requirements.

I anticipate that a foundation survey will be submitted to this office no later than _____ (insert date).

If you are proposing to construct a residential or commercial building addition or detached accessory building >150 sq. ft. in area you have the option to hire a [professional surveyor](#) to complete a foundation survey of the property after the foundation is installed for the permitted building and submit said survey document to this office in order to prove that the proposed building has been constructed in the correct location and meets setback requirements.

Alternatively, the property owner may sign a waiver of liability of foundation survey waiving their obligation to have to hire a professional surveyor at this time, stating that they will build the structure according to code and that if the structure is ever found to violate the code requirements they agree to comply with said ordinance by removal of and relocation of said structure and pay all associated and consequent costs and damages. This waiver document is a legal document that is recorded against the property title in the Register of Deeds. *In the future a lending agency (such as a bank) or a prospective buyer of the property may require that said waiver be released prior to commencing with a loan or sale transaction. To do so, a plat of survey will need to be completed by a professional surveyor showing the location of the permitted structure. If said structure is found by this department to be constructed in the correct location and meets setback requirements, then a release of waiver document will be prepared at the cost of 20.00-dollars to the applicant and issued to the property owner or real estate agent so that it can be recorded with the Register of Deeds, thereby effectively releasing the original waiver of liability document.*

Choose one of the following options:

I anticipate that a foundation survey will be submitted to this office no later than _____ (insert date).

or

I anticipate that the property owner will visit Planning & Development to have their signature notarized (driver's license required) and pay for the recordation of a waiver of liability document in the form of 30.00-dollars cash or check payable to the "Register of Deeds" no later than _____ (insert date).

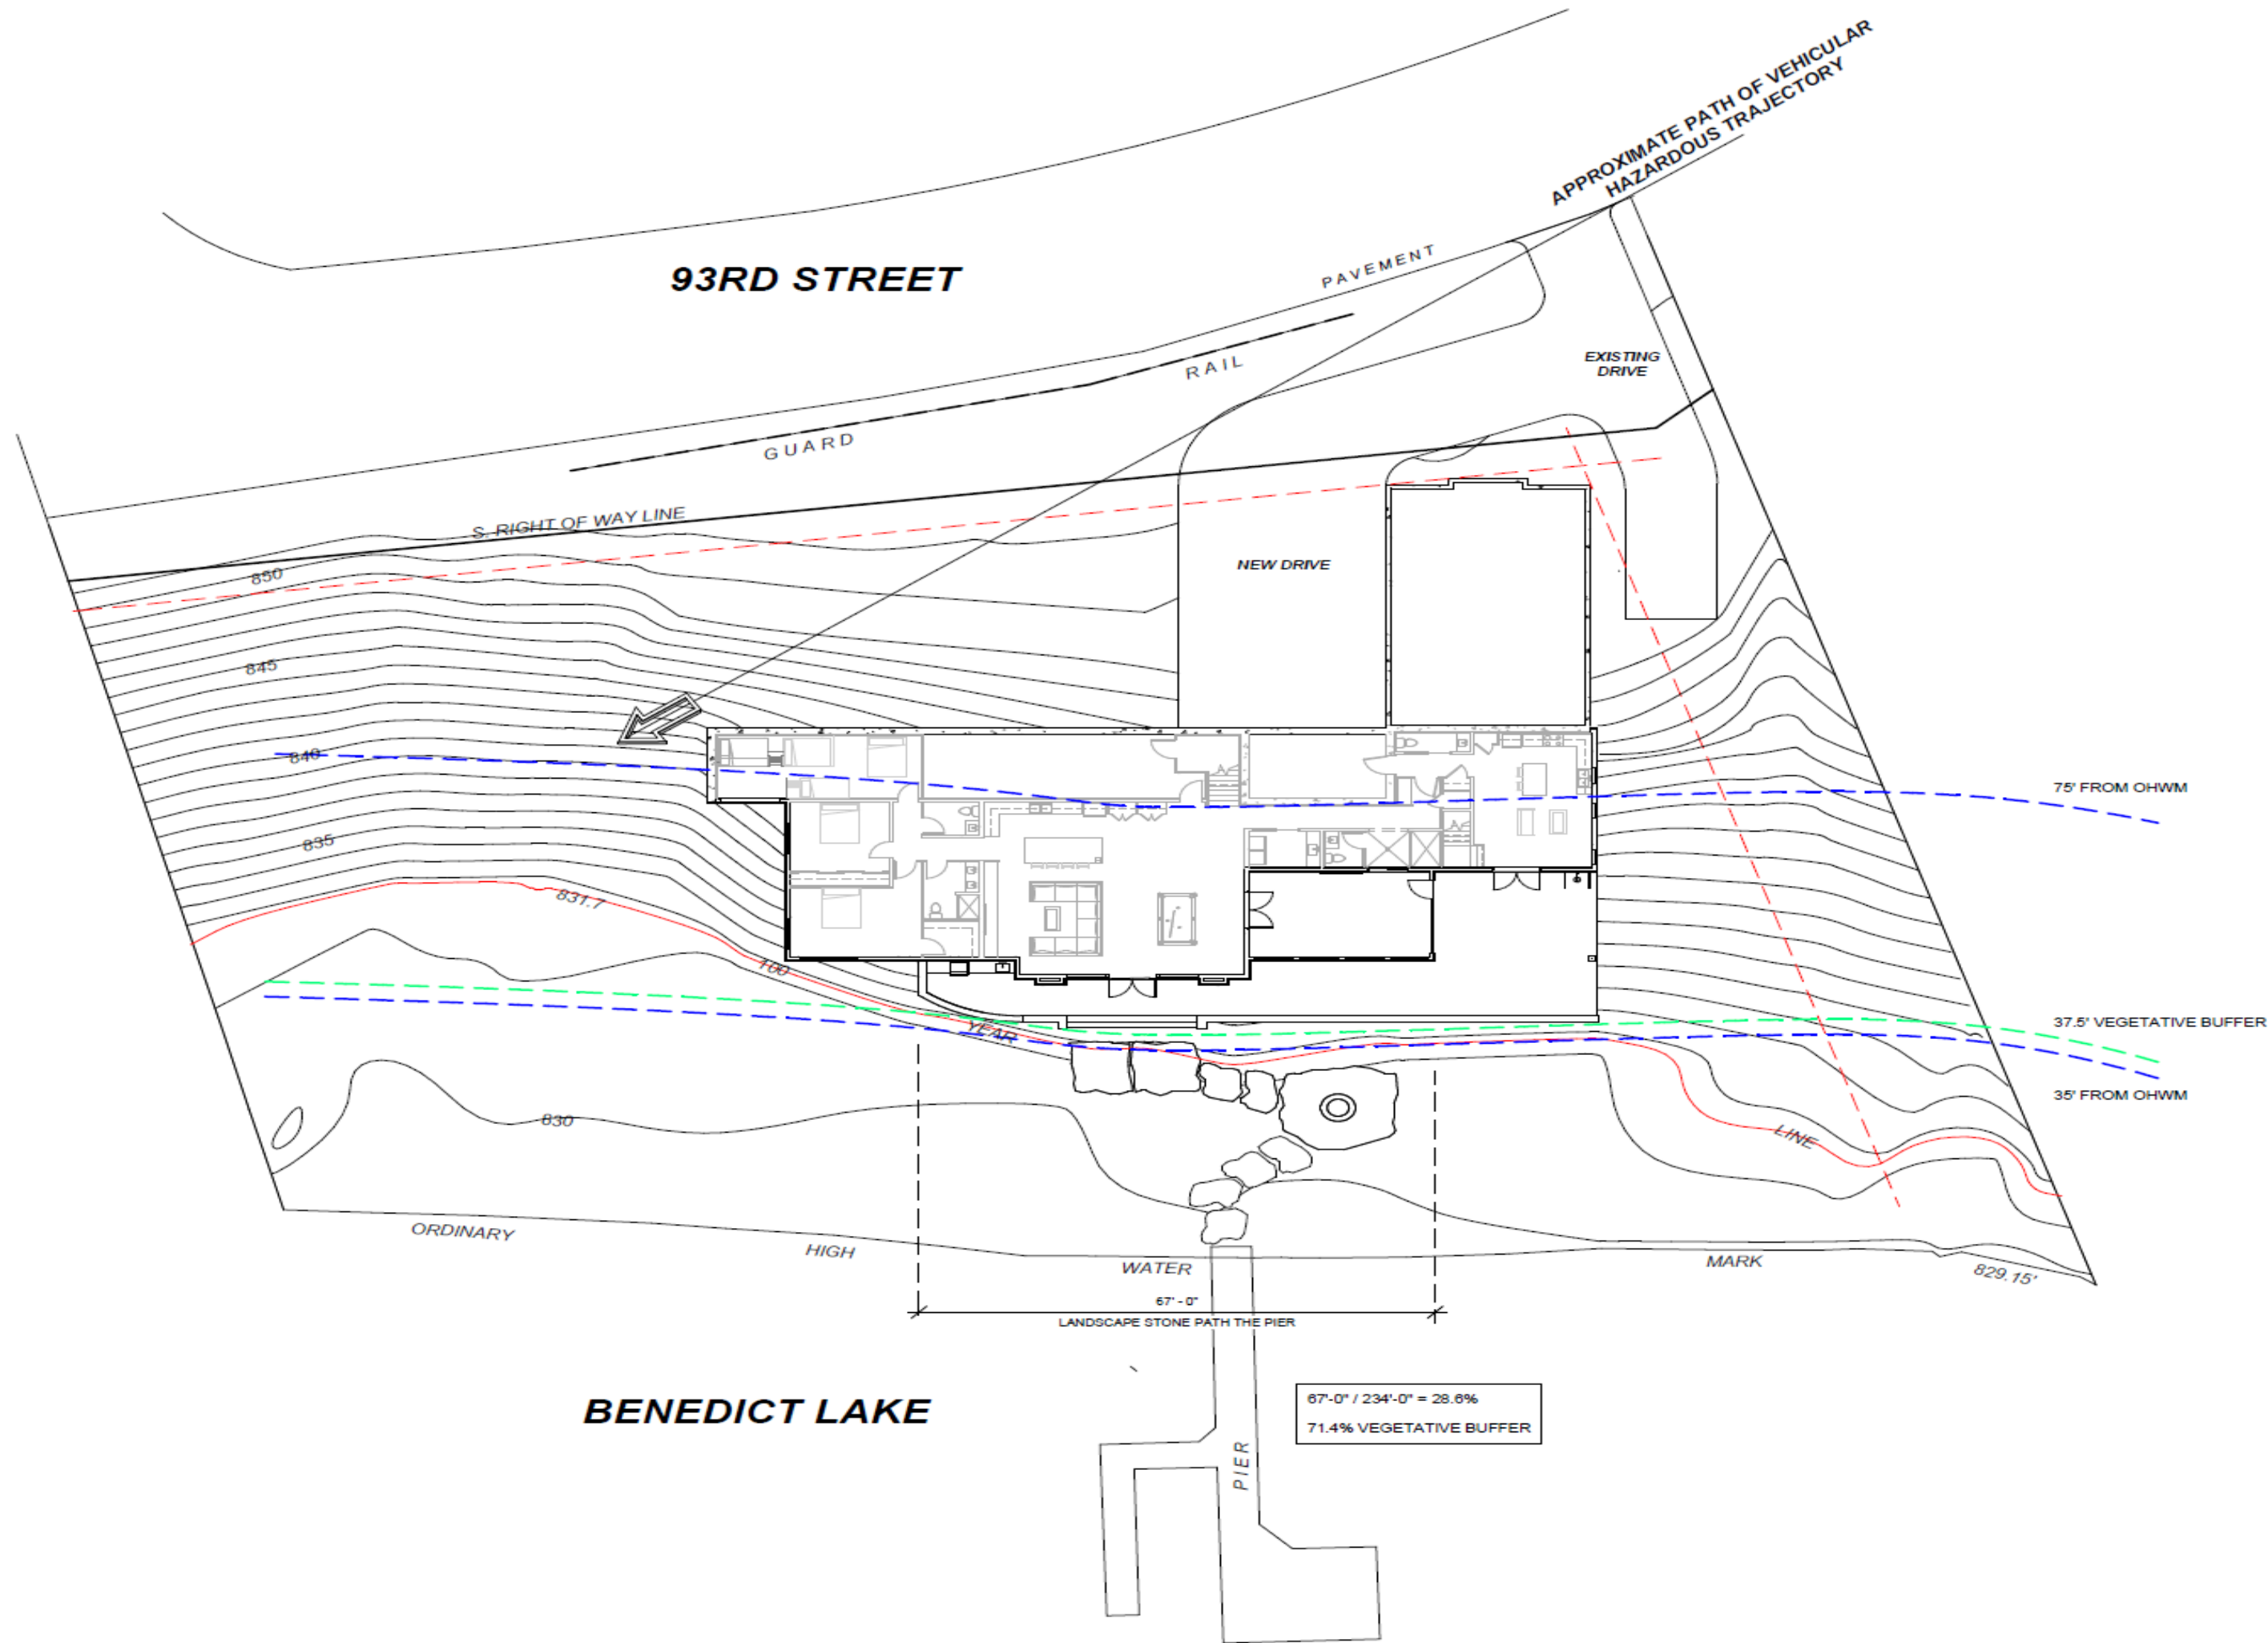

8. Does your project involve the placement of any fill material on the subject property such as dirt, gravel, landscape timbers, rock, shoreline protection material, etc....?

PUBLIC HEARING VARIANCE STANDARDS

- ❑ YOUR PUBLIC HEARING WILL BE BASED ON THE FOLLOWING STANDARDS FROM THE KENOSHA COUNTY GENERAL ZONING AND SHORELAND/FLOODPLAIN ZONING ORDINANCE.

CHAPTER 12.36-1 **INTENT**

- ❑ It is the intent of this section of the Ordinance to recognize that under certain conditions and circumstances, it may be necessary to obtain a variance from the terms of this Ordinance so long as said variance will not be contrary to the public interest, and where, owing to special conditions, a literal enforcement of the provisions of the Ordinance will result in unnecessary hardship or practical difficulties and where the granting of such variance will uphold the spirit of this Ordinance and contribute to the justice of the particular case in question. Any variance granted under the terms of this ordinance shall, however, relate only to area requirements and not to use. Furthermore, it is the intent of this section to establish a Board of Adjustments for the purpose of reviewing applications for variances as well as reviewing orders and decisions made by the Office of Planning and Development.

CHAPTER 12.36-13 **STANDARDS AND GUIDELINES**

- ❑ In determining whether a variance is to be granted, the following standards and guidelines must be met in view of the evidence presented and in making its decision, these standards and guidelines shall be addressed by the board of adjustment:
 1. The existence of special conditions or exceptional circumstances on the land in question.
 2. The experiencing of unnecessary hardships or practical difficulties on the land in question either presently or in the future.
 3. That these hardships or difficulties are the result of the aforementioned special conditions existing on the land and are not self-inflicted.
 4. That the existence of these special conditions will restrict the use of the land if the Ordinance is applied literally so as to render the land useless.
 5. That the limitation on the use of the land does not apply generally to other properties in the district.
 6. That limiting the use of the property does not afford compensating gains to the public health, safety and welfare.
 7. That the variance(s) requested are the minimum variance(s) needed to alleviate difficulties or hardships.
 8. That the use of the parcel in question presently does conform to the ordinance.

9. That granting the variance applied for will not affect the public health, safety, morals and welfare of the community and other properties in the area.
10. That with respect to those areas located within the floodland districts, a variance would not permit filling and development contrary to the purpose and intent of the Camp Lake/Center Lake FWO Floodway Overlay District; would not permit a change in the boundaries of the FPO Floodplain Overlay District, FWO Camp Lake/Center Lake Floodway Overlay district or the FFO Camp Lake/Center Lake Floodplain Fringe Overlay District; would not permit a lower degree of flood protection in the floodland districts than the residential, commercial, institutional, or park basement or crawlway to be located below the 100-year recurrence interval flood elevation; would not allow a change or alteration of an historic structure, including its use, which would result in the structure; further, that the variance for the proposed action would not require amendment to the floodplain zoning ordinance' and furthermore, that the variance would not have the effect of granting or increasing a use property which is prohibited in the floodland districts or any action contrary to the provisions of Chapter NR 116 of the Wisconsin Administrative Code.

- ☐ Variances may be granted for example for reasons of topography, environmental protection or where permitted by state statute but in no event may a variance be granted where the primary reason for obtaining a variance is to obtain a more profitable use of the property, personal inconvenience, construction errors, economic reasons, self-created hardships, or where the property is presently a non-conforming use. Furthermore, variances may not be granted for the purpose of altering the sanitary requirements of this ordinance except for existing structures.
- ☐ The Board of Adjustments in considering the propriety of granting a variance shall not consider the number of persons for or against the granting of a variance but shall base their decision solely upon the equities of the situation involved.
- ☐ Variances may be granted in the form of an area or distance variance, however, use variances shall be specifically prohibited under this Ordinance.

Statutory Standards

- ☐ The applicant for a variance must clearly show the Board of Adjustments that three statutory standards that govern granting a variance will be met. These three standards require the existence of an unnecessary hardship, the presence of a unique property limitation, and the protection of the public interest.
- ☐ Unnecessary Hardship
 - ❖ A situation where, in the absence of a variance, an owner can make no feasible use of a property, or strict conformity is unnecessarily burdensome.
 - ❖ The hardship or difficulty must be peculiar to the zoning parcel in question and different from that of other parcels, not one which affects all parcels similarly.

**VARIANCE PROCEDURES &
PUBLIC HEARING VARIANCE STANDARDS**

- ❑ Unique Property Limitation
 - ❖ Unique physical characteristics of the property must prevent the applicant from developing in compliance with the zoning ordinance.
- ❑ Protection of the Public Interest
 - ❖ Granting of a variance must neither harm the public interest nor undermine the purposes of the ordinance. The public interest includes the interests of the public at large, not just that of nearby property owners.
 - ❖ Conditions may be attached to a variance to protect adjoining properties and to preserve the essential character of the neighborhood.
 - ❖ A variance should include only the minimum relief necessary to allow reasonable use of a property.
