PERSONAL STATEMENT

Thank you for the opportunity to apply for consideration as a member of the Kenosha County Commission on Aging and Disability Services.

I believe I could offer my work on this commission as an experienced diagnostician, educational psychologist, teacher, grant writer and administrator in a Supervisory Union, comprised of seventeen school districts, for children and young adults ages 3 - 21 with special needs. This included very bright children, children with physical disabilities (motor, sight or hearing impaired), emotionally disturbed, brain-damaged, learning disabled and the mentally challenged children and young adults.

I also worked with parents, teachers, school counselors, school administrators and school boards discussing ways to maximize the educational experience of their children.

When my parents became seriously ill, I returned from New Hampshire and my parents returned from Indiana to Kenosha, where I began to care for them and to investigate their diagnoses and treatment plans. After spending time with them, I realized that my mother's original diagnosis, Parkinson's Disease and Alzheimer's, did not match her symptoms. I took her to Mayo Clinic, where she was correctly diagnosed with Progressive Supra-nuclear Palsy; my father suffered from cancer and a severe stroke. I began to research what programs could assist each of them as their terminal diseases progressed. I was surprised and relieved to find that some programs already in place to support them as they got worse.

I began working for Kenosha County, a pilot county In Wisconsin, which was a one of 8 pilot states in the US, developing, with others, the "WEJT" program, which, in time, became the Welfare-to-Work Grants Program. My duties included supervision of sub-contractors, development of a database and programming to make the data useful to service providers, administrators and evaluators, and maintaining communication with the County Executive.

As a result of my work in Kenosha County, I was offered a position at the University of Wisconsin - Madison Institute for Research on Poverty. I acted as a consultant to various states that were trying to implement a Welfare-to-Work programs. I was part of a team developing tools that would help counties and states determine what components of their programs were most efficient and which components should be modified or discontinued. In addition to my Welfare to Work responsibilities, I wrote computer programs tracking individuals receiving services from various governmental agencies.

I hope that my life experiences as summarized above, as well as the fact that I am physically handicapped and elderly, will allow me to be of service as a member of this commission.

AN ORDINANCE TO CREATE CHAPTER 23

WHEREAS, Kenosha County continues to experience unprecedented economic development and in support of this development - Kenosha County has and continues investment in our local transportation infrastructure to ensure traffic safety and efficiency, and

WHEREAS, in the absence of strategic, defined criteria to evaluate requests for new access along County Trunk Highways (CTH), many of the safety and efficiency benefits provided by our infrastructure investments will likely be jeopardized, and

WHEREAS, the Highways and Planning & Development Services Divisions began work in March of 2021 to research and develop a comprehensive CTH Access Management Plan with a corresponding County Ordinance that proactively addresses this issue, and

WHEREAS, as the Plan was being developed, it was shared with all our community's Towns, Villages and the City for review and input to secure their support,

NOW THEREFORE BE IT RESOLVED, that the Kenosha County Board of Supervisors does hereby ordain and create Chapter 23 of the Municipal Code of Kenosha County as attached.

C. DEFINITIONS

23.04-1 ACCESS or ACCESS DRIVEWAY: The connection of a field entrance, driveway, private road, or public road to a CTH for motorized vehicles to one or multiple parcels.

23.04-2 ACCESS PERMIT: A permit issued by the Commissioner granting permission to enter onto the CTH right of way for the purpose of constructing a field entrance, access driveway, private road, or public road onto a CTH or to modify an existing entrance, access driveway, or road.

23.04-3 AVERAGE DAILY TRAFFIC (ADT): The average number of vehicles passing over a given point along a roadway in a 24-hour time period. The number may be determined by actual counts or by estimates based on available data.

23.04-4 COUNTY TRUNK HIGHWAY (CTH) or HIGHWAY: Any segment of a highway that is under jurisdiction of the Kenosha County Highway Division.

23.04-5 FIELD ENTRANCE: An access driveway that does not serve a residential, commercial, or industrial parcel and that is infrequently used. Examples may include driveways that serve agricultural, utility, or recreational parcels.

23.04-6 INTERSECTION FUNCTIONAL AREA: The area of an intersection or interchange where motorists make decisions regarding turning, stopping, accelerating, exiting, merging, and weaving. This area includes the physical intersection area, but also extends upstream and downstream along all intersection approaches.

23.04-7 PARCEL: The area of land outside the public highway right of way and within the property lines of a given piece of property.

23.04-8 ROADWAY: Any road, street, alley, expressway, highway, avenue, parkway, lane, drive, boulevard, circle, bypass, or other pathways not controlled by Kenosha County that are intended for the public use of motorized vehicles to obtain access to more than two parcels.

23.04-15 VISION TRIANGLE, DEPARTURE: A triangular shaped area, at all field entrances, industrial, commercial and multi-family residential accesses as well as all public roadways, in which obstructions to the line of sight of vehicle operators are controlled. No structure or improvement of any kind shall be permitted within the vision triangle. No vegetation within the vision triangle may exceed 30 inches in height. See Exhibit B for details.

D. REGULATIONS

23.05-1 AUTHORITY

The Commissioner shall review, implement, and enforce this ordinance pursuant to authority granted by, but not limited to, Wisconsin Statutes 83.

23.05-2 EXISTING ACCESS

Any use of access to a CTH (via driveway or road) prior to the effective date of the ordinance shall be permitted and continued in its current use and design in perpetuity. Any modification to an existing access driveway or public roadway after the effective date of the ordinance shall require an approved access permit before construction (refer to Section 23.08-3 for details).

23.05-3 TEMPORARY ACCESS

The Commissioner may approve a temporary access permit if it is determined that the requested access driveway will not pose a safety hazard to the motoring public. The applicant shall be responsible to remove the temporary access driveway within 180 calendar days from the date of approval and restore the highway right of way to its former condition and to the Commissioner's satisfaction.

23.05-4 VACATED ACCESS

If the Division determines that the use of an access driveway has been discontinued for a period of at least two years, the Division shall notify the owner by certified mail that the access is to be considered vacated. The Division shall allow the owner thirty (30) calendar days to reply. If after thirty (30) days the Division determines the access driveway has been abandoned, it shall be considered vacated and its use shall not be permitted. Any further use of this access driveway after deemed vacated shall require a permit and be considered a new access driveway under the ordinance.

23.05-5 APPLICATIONS FOR PERMIT

No person shall construct or modify an access driveway along a CTH unless an approved permit has been obtained from the Division. Entrance to or exit from a CTH shall be prohibited except at designated access driveways. No person shall alter, in any way, existing appurtenances or features within the highway right of way including but not limited to ditches, drainage ways, culverts, bridges, or pavement surfaces (including existing access driveways) until or unless a permit has been obtained from the Division.

23.05-6 ACCESS RESPONSIBILITIES

The person or persons that are serviced by an access driveway or public roadway shall be responsible for its operations and maintenance. The extent of these limits begin/end at the edge of shoulder of the CTH. This includes the segment of the access driveway that is located within the CTH right of way.

23.05-7 SUBDIVISION OF LAND

Before any parcel of land is subdivided, it shall be proven that access can be provided to each proposed parcel in such a way that the proposed access driveways shall be in conformance with this ordinance.

23.05-8 CHANGE OF USE

Any future improvement or alteration of an existing access driveway shall require an approved permit. A change of use application shall be conducted in the same manner as if it were an application for a new access driveway. A change of use may include, but not limited to the following:

- Changing from a residential to commercial or industrial use
- Changing from an agricultural to a residential, commercial, or industrial use

- Changing from a single to multiple residential use
- Subdividing a parcel to accommodate additional residences or businesses
- Changing the land use of commercial or industrial business
- Relocating the access driveway to accommodate existing or changing land use

The Commissioner shall determine if there has been a change in use to an access driveway which will affect safe and efficient ingress and egress to and use of a CTH. The determination shall be based primarily on a significant change in the volume of traffic or type of vehicle using the access driveway. Upon such determination, the Commissioner may grant an access permit for the change of use, require modifications to the existing access driveway to meet standards of the ordinance, or deny the request for the change of use.

General maintenance and repairs to an existing access driveway shall not require a permit application. Modifications to an existing access driveway that shall not require a change of use application include paving, replacing or repairing a culvert, and/or other maintenance activities.

23.05-9 SHARED ACCESS

Shared, or joint, access driveways are encouraged whenever possible to minimize the number of access points and interruption of traffic flow. The Division shall be consulted when a shared access driveway is proposed so the Division can provide guidance for its location and design elements. The location of the shared access driveway shall meet location and spacing requirements described herein and should be placed so that the centerline of the access driveway resides along the centerline between the adjacent parcels. If a shared access driveway cannot be located on the centerline of the adjacent parcel, the landowners shall develop legal documentation outlining the rights and responsibilities for the ownership, operations, and maintenance of the shared access driveway. Multiple access driveways should be discouraged when shared access or interior roadways are present and/or a viable alternative.

Operations and maintenance of shared access driveways shall be the responsibility of the landowners whom the shared access driveway accommodates. Disagreements and matters regarding the operations and maintenance of the shared access driveway shall be considered a civil matter and resolved as such.

23.05-10 MULTI-JURISDICTIONAL ACCESS

For County-designated highways that straddle or repeatedly meander across the Kenosha County boundary line, access management should be discussed between Kenosha County and the adjacent County agency to determine which agency has access permitting jurisdiction on the subject highway (or what highway segments each County has permitting jurisdiction) and develop consistent access management policies that shall be implemented and enforced by both agencies.

23.05-11 LOCAL PLAN DEVELOPMENT AND SITE REVIEW

Local municipalities shall discuss access management with the County as part of local planning efforts such as comprehensive plans, neighborhood plans, and economic district plans (e.g., tax incremental funding districts) when CTH are involved. Local municipalities should discuss proposed plans for new or redeveloped parcels with the County when access driveways along CTHs are involved. This communication shall occur before the proposed development is approved.

23.05-12 DEVELOPMENT CORRIDOR ACCESS MANAGEMENT

The Commissioner may authorize a study to determine if a CTH section requires a development corridor access management plan (DCAMP). A DCAMP is a detailed plan for a section of CTH that defines individual parcel access points in order to preserve efficient traffic flow and safety as development occurs. If the study supports the development of a DCAMP, the Commissioner shall coordinate creation of a DCAMP and recommend it to the Committee for consideration and approval. An approved DCAMP shall govern permitted access with a specified CTH corridor and may supersede guidance provided in the ordinance. Refer to Exhibit D for a list of corridors with a DCAMP.

E. ACCESS SPACING AND FREQUENCY

23.06-1 One access driveway per parcel shall be allowed unless otherwise provided in this ordinance.

23.06-2 Where a property owner owns more than one adjacent parcel with frontage on the same side of the CTH, all of which are zoned or used for agriculture, no more than four (4) field entrances shall be allowed per mile.

23.06-3 Non single-family residential and non-agricultural parcels may be allowed up to two (2) access driveways, provided each access driveway meets the criteria of this ordinance or were determined to

safely accommodate all traffic movements at each access driveway in the opinion of the Commissioner.

23.06-4 For parcels that front more than one highway, access driveways shall be granted only on the lower classified highway. If two or more highways of the same classification are for consideration, the highway with the lower ADT shall provide access to the parcel. At their discretion, the Commissioner may grant access to a different highway should the Commissioner find that granting access elsewhere to be in the best interest of public safety. The classification of highways are as follows:

- Interstate highways (highest classification)
- US or state trunk highways
- County trunk highways
- Local roadways and streets (lowest classification)

23.06-5 Access permits shall not be issued where the horizontal distance between the proposed access driveway and an adjacent access driveway shall become less than the following distances, measured from the centerline of the proposed access driveway to the centerline of another access driveway, unless there is no alternate to providing access to a parcel:

a. 600 feet for rural CTH, 300 feet for semi-urban CTH, 200 feet for urban CTH

b. Agricultural parcels may have a field entrance at a distance not less than 300 feet from the centerline of the proposed field entrance to the centerline of an existing access driveway.

Where possible, access driveways connecting to a CTH should not be staggered or offset (e.g., creating T-intersections) but should connect with the CTH directly across from a road or access driveway on the other side of the CTH.

23.06-6 ROAD or STREET: Access permits shall not be issued where the horizontal distance between the proposed access driveway and an intersecting public roadway shall become less than the greater value of the following conditions, measured from the centerline of the proposed access driveway to the centerline of the intersecting highway, unless there is no alternate to providing access to a parcel:

a. 600 feet for rural CTH, 300 feet for semi-urban CTH, and 200 feet for urban CTH.

b. Within the intersection's functional area (to be determined by the Commissioner).

23.06-7 INTERSECTING ROAD ACCESS: A new road, in addition to the spacing requirements to adjacent access driveways outlined in Section 23.06-6, shall be at least the following distance, as measured from the centerline of the proposed road to the centerline of the intersecting highway measured along the CTH.

a. 1,000 feet for rural CTH, 600 feet for semi-urban CTH, and 500 feet for urban CTH from the nearest public highway intersection

Where possible, driveways connecting to a CTH should not be staggered or offset (e.g., creating T-intersections) but should connect with the CTH directly across from a road or access driveway on the other side of the CTH.

23.06-8 For access driveways located on a non-CTH roadway approach of an intersection with a CTH and within the functional area of said intersection, the Division shall be consulted to review and determine the access driveway location and design elements. The Division should provide written authorization approving the access driveway location and design elements before the access driveway is approved by the local municipality.

23.06-9 Agricultural parcels may be allowed to provide a wider field entrance to accommodate large agricultural equipment, upon approval by the Commissioner. A second field entrance may be considered if the side of the property contiguous with the CTH is more than 600 feet. The new field entrance shall adhere to standards stated in Section 23.06-5 and Section 23.06-6 regarding field entrance location, density, and spacing.

F. ACCESS DRIVEWAY DESIGN STANDARDS

23.07-1 APPLICABILITY LIMITS

Access driveways and roads with access onto CTHs shall comply with the following design standards:

a. The design standards described in this section shall be applied regardless of the presence of a culvert.

23.07-2 CULVERTS

a. Not all access driveways require a culvert. The Division shall determine the need for a culvert for a proposed access driveway or public roadway.

b. Culverts, when used, shall extend 3 feet beyond each edge of the access driveway as shown on Exhibit A.

c. Corrugated steel pipe culverts are allowed; however, double wall plastic or concrete pipe culverts are preferred.

d. Apron endwalls shall be provided.

e. The size (diameter) of a culvert, if needed, will be determined by the Division to allow for proper drainage.

f. All culverts shall be placed under at least 1 foot of cover, be at least 10 feet from the nearest culvert, and be at least 10 feet from the nearest lot line.

1. When a shared access is established, the 10-foot offset from the nearest lot line may not be required at the discretion of the Division.

23.07-3 SIDE SLOPES

Slopes forming the sides of the access driveway shall not be steeper than detailed hereinafter or that of the slopes forming the sides of the highway, whichever is less:

a. 4:1 for urban CTH

b. 6:1 for semi-urban CTH

c. 10:1 for rural CTH

23.07-4 PITCH

A pitch of 2% minimum away from the roadway to the center of the ditch flow line or to the edge of the shoulder if no ditch is present shall be maintained for all access driveways and public or private road accesses as shown on Exhibit A.

23.07-5 CLEAR ZONE

Retaining walls, landscape timbers, boulders, riprap, etc. shall be prohibited on in-slopes and in the highway right of way, unless otherwise approved by the Division.

23.07-6 SURFACE

Pavement of access driveways shall consist of asphalt or compacted crushed aggregate. Concrete may be allowed within the highway right-of-way if the CTH roadway surface to which the access driveway abuts is also made of concrete.

23.07-7 RELATIVE ALIGNMENT

Access driveways located on opposite sides of a highway shall be located directly opposite each other whenever possible.

23.07-8 ANGLE RELATIVE TO HIGHWAY

The centerline of that part of the access driveway lying on the highway right-of-way shall always be at right angles to the pavement. (90° ± 10°)

23.07-9 BACKING ONTO HIGHWAY

Interior turnarounds shall be provided as necessary such that vehicles do not need to back out onto the highway.

23.07-10 DEPARTURE VISION TRIANGLES

Departure vision triangles shall be provided and maintained at all field entrances, industrial, commercial and multi-family residential accesses as well as all public roadways. They shall be free of all obstructions in accordance with Exhibit B. Departure vision triangles shall be measured from a point 3.5 feet above the center of the proposed access driveway or public roadway and 14.5 feet away from the edge of traveled way to two points 3.5 feet above the center of each oncoming direction of travel from the CTH. The Commissioner may approve an access driveway permit that cannot meet the departure vision triangle requirements should the Commissioner find there is no alternate to providing departure vision triangles to a parcel.

23.07-11 APPROACH VISION TRIANGLES

Public roadway intersections should also meet approach vision triangle requirements as shown in Exhibit C. Approach vision triangles shall be measured from a point 3.5 feet above the center of the proposed public roadway to two points 3.5 feet above the center of the nearest oncoming lane of the highway at a distance of "A" or "B" (as shown on Exhibit C) from the point where the CTH meets the proposed public roadway.

23.07-12 SIGHT DISTANCE

Sight distance requirements for all access driveways are required as shown on Exhibit C.

23.07-13 WIDTH – FIELD ACCESS

Any access driveway serving a farm or field (field entrance) shall have a width greater than 20 feet, but less than 35 feet measured at right angles to the centerline of the driveway except as increased by permissible radii.

23.07-14 WIDTH – SINGLE FAMILY RESIDENTIAL

Any access driveway serving a single-family residential property shall have a width that ranges from 20 to 30 feet measured at right angles to the centerline of the driveway except as increased by permissible radii.

23.07-15 WIDTH - INDUSTRIAL/COMMERCIAL/MULTI-FAMILY RESIDENTIAL

Any access driveway serving an industrial/commercial/multi-family residential property shall have a width that ranges from 20 to 35 feet measured at right angles to the centerline of the driveway except as increased by permissible radii.

23.07-16 ASSOCIATED ROADWAY IMPROVEMENTS

Improvements to the CTH roadway at access driveway locations such as turn lanes or bypass lanes may be required at the discretion of the Highway Commissioner based upon the results of the traffic analysis within the TIA.

G. ADMINISTRATION, PERMITS AND VARIANCES

23.08-1 ADMINISTRATION OF ORDINANCE

a. Pursuant to Chapters 83 and 86 of the Wisconsin State Statutes, the Commissioner has the authority to administer the ordinance on behalf of the County. Applications for access permits shall be made to the Commissioner prior to beginning construction of an access driveway. The Commissioner shall review the proposed development or construction and shall either grant or deny the proposed access permit based upon the provision, standards, and requirements of the ordinance within thirty (30) calendar days.

b. No person as defined by Section 23.03-5 shall resist, obstruct, or interfere in any way with the Commissioner in the enforcement of the ordinance or fail to obey the Commissioner's order.

23.08-2 LIMITS OF APPLICATION OF ORDINANCE

The ordinance shall apply to all land within the rights of way of Kenosha County highways. Whenever it is questionable as to whether an object or part of an object is within the jurisdiction of the ordinance, the entire object shall be considered to be entirely within that jurisdiction.

23.08-3 PERMIT APPLICATION REQUIRED

No person shall construct an access driveway to a County Trunk Highway or change the use of an existing access driveway or make modifications to an existing access driveway without a permit granted pursuant to the ordinance.

23.08-4 UNIQUE ACCESS APPLICATION

If the applicant proposes a use not covered by these guidelines, the Commissioner shall make the determination of the applicable criteria based on the need to preserve highway capacity and safety. Access proposals which conflict with safe driving standards may not be allowed.

23.08-5 SUPPLEMENTAL APPLICATION MATERIAL

The Highway Commissioner may require scale drawings, plat of survey, or sketches showing the location of proposed and any existing access driveways, drainage calculations, contour map, and a traffic study to be included with the permit request form.

a. Access driveways and public roadways with less than 100 peak hour trips will require a sketch showing the location of the proposed as well as any existing access driveways and a traffic statement, at a minimum.

b. Access driveways and public roadways with 100 to 500 peak hour trips will require a scale drawing or plat of survey of the site showing the location of the proposed as well as any existing access driveways, drainage calculations, contour map for verification of drainage, and an abbreviated TIA, at a minimum.

c. Access driveways and public roadways with more than 500 peak hour trips will require a scale drawing or plat of survey of the site showing the location of the proposed as well as any existing access driveways, drainage calculations, contour map for verification of drainage, and a full TIA, at a minimum.

23.08-6 CONDITIONAL APPROVAL

When a permit is approved, the Commissioner may include conditions on the approved access permit such that if the specific conditions are not met, the access driveway permit approval is rescinded.

23.08-7 WORK PRIOR TO APPROVAL

Applicants commencing work prior to issuance of an approved permit shall be subject to denial of permit; an order for removal and restoration as provided above; and prosecution, fines and court costs as provided by Section 86.07 (2) of the Wisconsin State Statutes.

23.08-8 VARIANCES

The Commissioner may authorize, in specific cases, such variance from the terms of the ordinance where the literal enforcement of the ordinance would, given the unique conditions of the property of the applicant, result in an unnecessary hardship, or result in an access driveway location that would have a greater impact on mobility and safety. The Commissioner shall maintain a record of all variances granted including any conditions on the approval.

23.08-9 NEED FOR VARIANCE

If an access permit is requested for a parcel that cannot reasonably meet the requirements listed in Section 23.06-5 through 23.06-8, such as minimal frontage to the CTH or the location would pose a safety hazard to the traveling public, the Commissioner shall make the determination of the applicable criteria based on the need to preserve highway capacity and safety. Access driveway proposals which conflict with safe driving standards may not be allowed.

23.08-10 VARIANCE MINIMUM REQUIREMENTS

A variance shall:

a. Be consistent with the spirit and purpose of the ordinance.
b. Not be granted unless it is shown that the variance will not be contrary to the public interest and will not be damaging to the right of other persons or property values in the area.
c. Not be granted solely based on economic gain or loss.
d. Not be granted for self-created hardship.

23.08-11 PERMIT EXPIRATION

All access permits shall include a completion date for the construction of the access. If permitted work is not finished by this date, the permittee shall not complete the work unless authorized by a subsequent permit or an approved time extension.

23.08-12 ACCESS CONSTRUCTION COST APPROPRIATION

The applicant shall be liable for the cost of all materials including culverts, labor, equipment, and other incidentals connected with the construction of the access driveway. The entire cost of installing and maintaining the access driveway and culvert, including restoration, shall be the financial responsibility of the applicant unless otherwise specified on the approved permit.

23.08-13 HOLD HARMLESS

The applicant agrees to hold harmless and indemnify Kenosha County, its officers, agents, and employees against any loss or damage for any personal injury or property damage sustained by reason of the exercise of this permit.

23.08-14 DIGGERS HOTLINE

The applicant shall call Diggers Hotline (800-242-8511) and any other underground utilities not listed with Diggers Hotline prior to the commencement of excavation.

23.08-15 HIGHWAY CONSIDERATIONS DURING ACCESS CONSTRUCTION

a. All work within the right of way shall be done in such a manner so as not to interfere with traffic on the adjoining highway unless authorized by the Highway Commissioner.

b. During construction of the access driveway, the applicant shall keep the highway free of mud and debris. The highway will be swept clean at the direction of the Highway Commissioner.

c. The applicant shall restore the highway right-of-way to the satisfaction of the Commissioner within seven (7) days after completion of the access driveway construction, weather permitting.

H. APPEALS AND VIOLATIONS

WHEREAS, in 2021 the Kenosha County Highway Division engaged in preparatory steps for a resurfacing project intended to extend road surface useful-life on a 2.6-mile section of County Trunk Highway (CTH) EM from CTH Z to the Stateline, and

WHEREAS, because this section of CTH EM is in the Village of Twin Lakes, County Highway Division staff engaged Village staff to inform them and coordinate communication for the Project with residents, and

WHEREAS, during these discussions, the Village expressed an interest in having the County investigate the feasibility of incorporating a multi-use path feature as part of the Project because pedestrians and bikers regularly use the vehicle travel-lanes on this densely populated section of CTH EM, and

WHEREAS, the rolling topography combined with a narrow and curvy road foot-print along this section of CTH EM make pedestrian and biking activities risky and complicate stormwater management, and

WHEREAS, the County and Village recognized that collaborating on this project would leverage resources and allow the Project to include safety improving path features, improved stormwater management and extend the useful-life of the road surface, and

WHEREAS, Kenosha County and the Village of Twin Lakes worked to develop an Intergovernmental Agreement (IGA) that outlines how this Project can be jointly performed and funded.

NOW THEREFORE BE IT RESOLVED, that the Kenosha County Board of Supervisors hereby approves the attached IGA and authorizes the Kenosha County Highway Commissioner and County Administration to process and sign documents required for the Project's execution.

CTH EM Improvement Project
Intergovernmental Agreement (IGA) between
Kenosha County and the Village of Twin Lakes

I. Background:

In 2021 Kenosha County was developing a plan to resurface CTH EM from CTH Z to the Stateline. As part of project preparation, the County engaged the Village of Twin Lakes to discuss several stormwater infrastructure features in the project area that would need to be replaced prior to the resurfacing project, likely requiring limited road closures to perform.

As part of these discussions, the Village expressed an interest in having the County investigate the feasibility of incorporating some type of multi-use path feature as part of the resurfacing of this urban-speed limit road (25 MPH). The Village indicated this stretch of CTH EM is densely populated and the vehicle travel lanes are regularly used by residents for biking and walking – even though it is narrow, contains varied topography (hills, curves, etc.) and numerous non-conforming driveways/related features.

The Village and County agreed that if a path-type feature could somehow be incorporated into the road resurfacing project, it would improve traffic safety (pedestrian, bike, vehicle) - and add significant value for Village residents.

Given the topography and related physical characteristics of the project area, it was determined that it is not practical to construct a conventionally designed multi-use path adjacent to CTH EM. Notwithstanding this, the County and Village worked with an engineering consultant to develop an "enhanced shoulder" concept that will improve the road's safety and functionality.

The selected design concept attempts to:

- Optimize the use of the existing right-of-way (ROW), limiting the need for additional ROW acquisition.
- Minimize disruption to existing topography.
- Integrate the road and enhanced shoulder features with existing, non-conforming driveways.
- Provide for stormwater management improvements by using a combination of surface and below-grade stormwater infrastructure.
- Create conditions for bikes and/or pedestrians to safely traverse this section of roadway with an expanded paved area outside of the vehicle lanes.

Working collaboratively, it appears the Village and County can leverage resources to design and rehabilitate CTH EM in a manner that not only preserves the road's travel surface, but also improves stormwater management and enhances resident safety – these reasons form the basis for this IGA.

II. DEFINITION OF OBLIGATIONS

Recognizing the value and advantages to our community's residents of incorporating safety, functional and stormwater management improvement features with the CTH EM Resurfacing Project, both the County and Village agree to support the development and execution of the Project by agreeing to the following:

A. County Obligations

1. **Design Development:**
   The County has selected RA Smith as the design engineering consultant for this project to develop the required drawing and specifications necessary to bid and construct this Project. The County is responsible for coordinating all design activities and communications with RA Smith. The Village will be included in the design development process, having at a minimum – opportunities for review/input at the 30%, 70% and 100% design development stages.

2. **Project & Construction Management** – The County is responsible for all Project Management activities and will be responsible for selecting and directing a Construction Manager (CM) for the construction phase of this Project. The CM will be tasked with managing the construction of the Project, including coordinating communications, contractor supervision, scheduling and traffic control coordination.

3. **Supplemental Funding Source Identification** – the County will be responsible for identifying grant and other program funding opportunities that it may have access to for the Project. The County will also make available to the Village, grant application resource assistance if requested.

B. Village Obligations

1. **Design Participation**
   The Village will work with the County and RA Smith to assist in design development, providing input based on a more intimate knowledge of the Project area's challenges and opportunities. The Village will at a minimum – have opportunities for review/input at the 30%, 70% and 100% design development stages.

2. **Project Support** – the Village will provide project support through communications with the Project Team and Village residents to ensure community awareness of the project and associated milestone events/activities. The Village will work with the County to minimize disruptions to the project area's residents and assist in resolving any project related issues that may arise.

3. **Supplemental Funding Source Identification**
   The Village will actively work to pursue the identification of viable project funding sources to minimize the level of local resources necessary to fund the Project. The County will make available grant-writing staff/resources for this project at the Village's request.

III. PROJECT SCHEDULE SUMMARY

The following is a summary of Project milestone activities and target dates:

1-1-22 thru 11-1-22 – Design/engineering specifications development.

11-15-22 thru 12-15-22 – Advertise for bids

12-15-22 thru 1-15-23 – Bids review & Award

4-15-23 thru 10-15-23 – Project construction

IV. PROJECT FUNDING

Both the County and Village will work to identify and secure supplemental funds that will minimize the local costs for this Project. Here is the projected Project cost estimate and targeted funding allocation:

Total Estimated Project Cost: (includes 10% contingency)	**$2,860,000**

Targeted Fund Sources Allocation:

1.	Local Road Improvement Program	$ 985,000
2.	County Match	$1,425,000
3.	Village Match	$ 250,000
4.	*Other Sources	$ 200,000
	Total Project Funding	**$2,860,000**

*During 2022 the County and Village will pursue non-local funding sources for this Project. If less than the "Other Sources $200,000" is raised, the County will fund the difference and if more than $200,000 is raised from other sources, the excess amount will be used to reduce the County's match.

V. Project Cost and/or Scope Changes

If Project circumstances change, or new information is discovered that:

- Creates a situation whereby actual Project Costs exceed the original estimate, or
- The Village and County mutually agree to alter the scope of the Project, either increasing or decreasing Project costs, then

both parties agree to fund the Project's revised costs, by using the proportional allocation of 80% County/20% Village. The Village's minimum contribution commitment to the project is the above noted $250,000. Within thirty (60) days of the completion of the Project, County will invoice the

Village for its share of the cost. Within sixty (60) days of the receipt of such invoice, Village will remit total payment to County.
