Possible Attachments Required for this Application

- 1. <u>Performance Evaluation</u> of the existing POWTS. (Typically required for existing systems installed after 7-1-1980).
- 2. <u>Detailed Site Plan</u> Can be an embellished existing plan already on file with the County, highlighting the proposed additions and modifications to the POWTS.
- 3. <u>Maintenance Agreements</u> May need to be entered into if the original is outdated or none existed.
- 4. <u>Affidavits</u> May need to be entered into if the proposed project results in the existing system being undersized or is now serving more than one (1) building.
- 5. <u>Soil Testing</u> May be required if none is on file and the depth to a seasonal highwater table is in question.
- 6. <u>Product Information</u> Any specialized products being used or added onto an existing POWTS must have literature provided with the permit application to document that its use is approved in Wisconsin.
- 7. <u>State Approval</u> Depending on the addition or modification being done to the existing POWTS. A state approval from the Department of Safety & Professional Services may be required before a permit can be issued.
- 8. <u>County On-site Visit</u> May be required before a permit is issued. May also be needed at the time of any soil testing. Please consult the Sanitarian before a soil test is performed.

If you have questions regarding additional information you may need to include with your application, please contact the Kenosha County Sanitarian at the phone number listed on the letterhead of this form.
