#### ADVERTISEMENT FOR BIDS

# KENOSHA COUNTY DPW ROAD IMPROVEMENT PROJECT RD 16-003

IN: CTH S AT: AMAZON WEST DRIVEWAY TO CTH H

# KENOSHA COUNTY WISCONSIN

May 2020

Notice is hereby given that Kenosha County will <u>ONLY</u> be receiving and accepting bids for the CTH S Road Improvement Project, from the Amazon West Driveway to CTH H, via the online electronic bid service through QuestCDN.com. Electronic bids will be accepted until 10:00 a.m. on the 29<sup>th</sup> day of May, 2020. At that time, the bids will be opened, reviewed, and displayed (if accepted) through an online virtual meeting at <a href="https://global.gotomeeting.com/join/143815789">https://global.gotomeeting.com/join/143815789</a>. To access the electronic bid form, download the project documents and click the online bidding button at the top of advertisement. The electronic bid form will be available for completion beginning May 19, 2020.

The Contract Documents, including plans and specifications, are on file and available for inspection at the Kenosha County website at <a href="https://www.kenoshacounty.org/CivicAlerts.aspx?AID=1614">https://www.kenoshacounty.org/CivicAlerts.aspx?AID=1614</a>. Bid results will be posted to this same website once they are verified.

All **bidders must file** a "Bidders Proof of Responsibility Form" with the Kenosha County Highway Commissioner on or before 3:00 p.m. on May 22, 2020 (Form PA-10). Bidders Proof of Responsibility Form can be submitted electronically by email at <a href="Clement.Abongwa@kenoshacounty.org">Clement.Abongwa@kenoshacounty.org</a>.

CONTRACT DOCUMENTS may be obtained <u>ONLY</u> from QuestCDN. Bid documents may be examined online at <u>www.rasmith.com/questcdn.htm</u> or downloaded under login after **May 12, 2020**, for a **non-refundable fee of \$40.00**. Input QuestCDN eBidDoc No. 7048756 on the website's Project Search page. Contact QuestCDN.com at 952-233-1632 or <u>info@questcdn.com</u> for assistance in downloading this project information or for assistance in membership registration.

A certified check or bid bond payable without condition to Kenosha County in an amount not less than five percent (5%) of the bid shall be submitted with each bid as a guarantee that if the bid is accepted a proper contract and bond will be executed and filed within ten (10) days after the acceptance of the bid. If such bidder fails to execute and file such contract and bond, the amount of the check or bid bond shall be forfeited as liquidated damages.

No bid shall be withdrawn after the opening of bids without the consent of the Kenosha County Department of Public Works for a period of sixty (60) days after the time of opening bids. Each bidder agrees upon submission of bid that if the same be accepted within said time period, he shall be bound by the terms of acceptance hereinafter contained.

The Kenosha County Department of Public Works reserves the right to reject any or all bids received, or to accept any bid which may be most advantageous to, and in the best interest of Kenosha County. Each successful bidder will be required to furnish a satisfactory performance bond in the sum of the full amount of the contract.

Approximate quantities of work to be expected are as follows:

ITEM	QTY	UNIT
Clearing & Grubbing	51	STA

## 2. <u>Preparation of Proposal</u>

The Owner will <u>ONLY</u> be receiving and accepting bids for the CTH S Road Improvement Project, Amazon West Driveway to CTH H, via the online electronic bid service through QuestCDN.com. To access the electronic bid form, download the project documents and click the online bidding button at the top of advertisement. The electronic bid form will be available for completion beginning May 19, 2020, or sooner.

Along with the Bid, the Bidder must submit the Bidder's prequalification statement, bid bond or cashier's check, material supplier, and subcontractor list. The Bidder's prequalification statement and bid bond or cashier's check should be submitted electronically before the time specified in the Advertisement for Bids.

The Owner will only consider Bids submitted electronically. Bidder shall specify a unit price for each of the separate items listed in the Bid, with resulted total compiled via electronic bidding, for the total sum for which he/she will perform all the Work or furnish all of the material specified. The Owner, at its discretion, will compare Bids, in whole or in part, on a unit basis.

Bidding shall be as set forth in the electronic Bid Form. Each Bid Item shall include all of the Contractor's costs, such as transportation, insurance, bonds, delays, labor, machinery, tools, and all materials necessary with the requirements of these Specifications. Each Unit Price shall be entered to the nearest cent and no fractions of cents are allowed for these prices.

No bid will be accepted which does not contain an adequate or reasonable price for each and every item named in the Bidding Schedule on the contract bid upon.

#### 3. Bid Bond or Bid Guarantee:

A bid may be rejected if a bidder fails to meet any one of the following insurance requirements:

(a) Each bidder shall submit with their bid a cashier's check or bid bond in the amount of five percent (5%) of the total bid price. Check or bid bonds shall be payable to Kenosha County. This check/bond is to insure against withdrawal from competition subsequent to

- the bid submittal and to guarantee performance when the contract is awarded. This check/bond will be returned to all bidders immediately upon awarding the contract.
- (b) The check/bond of the successful bidder will be retained until the successful bidder furnishes Kenosha County with an acceptable performance bond for 100% of the bid/contract price. The performance bond must be submitted to Kenosha County within ten (10) days from date of award. The performance bond shall be forfeited on failure to perform on any part if this specification and contract outlined in this bid or any addendums. Such bond shall be issued from a reliable surety company having a current A.M. Best rating of A- or better, licensed or otherwise authorized to do business in the State of Wisconsin and acceptable to Kenosha County.
- (c) To be acceptable to Kenosha County as a surety for <u>Bid Bonds and Performance Bonds</u>, a Surety company shall comply with the following provisions.
  - i. The Surety Company must be licensed or otherwise authorized to do business in the State of Wisconsin and must be rated by A.M. Best at A- or better.
  - ii. The Surety Company shall have been in business and have a record of successful continuous operation for at least five years.
  - iii. A Wisconsin licensed resident or non-resident Agent who holds a current Power of Attorney from the Surety Company issuing the bond shall sign all bonds.

#### 4. Prequalification Data

Each bidder must submit a prequalification statement in accordance with Section 66.0901 and as amended. Prequalification forms (Kenosha County Form PA-10) shall be submitted to the Kenosha County Director of Public Works Office located at 19600 75th Street, Bristol, Wisconsin 53104.

Any bidder may be required by the Owner to submit additional data to satisfy the Owner that such bidder is prepared to fulfill the contract if it is awarded to him.

# 5. Examination of Site and Specifications

(a) Bidders shall inform themselves of all the conditions under which the work is to be performed concerning the site of the work, the structure of the ground, the obstacles which may be encountered, whether shown on the plans or not, and all other relevant matters concerning the work to be performed.

The Contractor should visit the site and make himself/herself aware of site conditions in order to base his/her bid upon observed site conditions.

The Contractor to whom a Contract is awarded will not be allowed any extra compensation by reason of any such matters or things concerning which the Contractor did not inform himself prior to bidding. The successful Contractor must employ, as far as possible, such methods and means in the carrying out of his work as will not cause any interruption or interference with any other Contractors.

(b) The Bidder is expected to base his bid on materials and equipment complying fully with the Contract Drawings and Specifications, and in the event he names or includes in his bid materials or equipment which do not conform, he will, if awarded a contract, be

responsible for furnishing materials and equipment which fully conform at no change in his contract price.

- (c) Nondiscrimination. In connection with work under this contract, the Contractor agrees not to discriminate against any employee or applicant for employment because of age, race, religion, color, handicap, developmental disability, or sex. The foregoing shall be interpreted liberally to forbid unjust discrimination. All complaints received in this regard by the County shall be forwarded to the County Clerk who shall refer the matter to the state or federal agency having authority to investigate and determine such charges of discrimination. A final determination finding discrimination in such a case, including any appeals taken shall make the employer ineligible to bid on contracts with the County for a period of four years from the date of such final adjudication.
- (d) Bidders must satisfy themselves by personal examination of the locations of the proposed work and by such other means as they may prefer as to the correctness of any quantities listed in the Proposal, and shall not, after submission of their Proposal, dispute or complain of such estimate, nor assert that there was any misunderstanding in regard to the nature or amount of work to be done.
- (e) Before submitting a Proposal, each Contractor should read the complete Contract Documents, including Advertisement for Bids, Instructions to Bidders, the Form of Contract, and the Specifications, all of which contain provisions applicable not only to the successful bidder, but also to any of his subcontractors.

#### 6. <u>Interpretation of Proposed Contract Documents</u>

If any person contemplating submitting a bid for any contract on this project is in doubt as to the true meaning of any part of the Contract Drawings, Specifications, or other sections of the Contract Document, he may submit to the Owner a written request for an interpretation thereof. The person submitting the request will be responsible for its prompt delivery.

Any interpretation of the Contract Document or Contract Drawings will be made only by addendum duly issued or delivered to each person receiving a set of such documents. The Owner will not be responsible for any other explanations or interpretations of the Contract Documents or Contract Drawings.

## 7. Bidding Requirements

- (a) Each bidder shall submit only one bid.
- (b) Each bidder must submit with his Proposal, special data, if any, in respect to items of equipment, alternates, or other items which any section of the Contract Document requires to be submitted with each Proposal.
- (c) Electronic bids must be submitted prior to when the countdown clock shown on the Quest vBid site has reached 0:00.

#### 8. Approximate Quantities

In cases where any part or all of the bidding is to be received on a unit price basis, the quantities stated in the Proposal will not be used in establishing final payment due the successful Contractor. The quantities stated on which unit prices are so invited are approximate only, and each bidder shall make his own estimate from the Contract Drawings of the quantities required on each item and calculate his unit price bid for each item accordingly. Bids will be compared on the basis of number of units stated in the Bidding Schedule. Such estimated quantities, while made from the best information available, are approximate only. Payment on the contract will be based on actual number of units installed on the completed work.

# 9. <u>Conditions in Contractor's Proposal</u>

A bidder shall not stipulate in his Proposal any conditions not contained in the Form of Proposal contained in the Contract Documents.

#### 10. "Or Equal" Clause

Whenever in any section of the Contract Documents any article, material, or equipment is defined by describing a proprietary product by using the name of a manufacturer or vendor, the term "or equal", if not inserted shall be implied. The specific article, material, or equipment mentioned shall be understood as indicating the type, function, minimum standard of design, efficiency, and quality desired and shall not be construed in such a manner as to exclude manufacturer's products of comparable quality, design and efficiency, as approved by the Engineer.

If any bidder proposes to furnish an item or material which he claims to be of equal value, utility or merit to a named product or material in the specifications, the bidder, supplier, or manufacturer shall submit a written statement to Kenosha County 5 days prior to the bid opening date. The statement shall name and describe the item or material claimed to be equal and shall include supporting data along with a request for approval.

# 11. Standard Manufacturer

Whenever the terms "standard", "recognized", or "reputable" manufacturer are used, they shall be construed as meaning manufacturers who have been engaged in the business of fabricating materials, equipment or suppliers of the nature called for by the Specifications for a reasonable period of time prior to the date set for opening of bids, and who can demonstrate to the satisfaction of the Owner that said manufacturer has successfully installed equipment, materials or supplies of the type proposed to be furnished in at least three instances and that the performance of such materials, equipment or supplies has been satisfactory.

Manufacturers who have been engaged in the business of manufacturing said materials, equipment or supplies for a period of over twelve months prior to the date fixed for opening bids shall, unless a longer period of time is specifically stated in the Specifications, prima facie be deemed to have been engaged in such business for a reasonable length of time.

#### 12. Major Equipment

In cases where the Proposal Form under the paragraph titled "Major Equipment Items" includes a tabulation of the major items of equipment to be furnished and installed on the Proposal, each

bidder shall state in the space provided, the installed price of each item of equipment of the manufacturer named. In addition, he may state in the spaces provided the names of alternate manufacturers who offer equipment on this project, and the installed price for such equipment.

Prior to the award of a construction contract, the Owner will determine the source of all items of major equipment to be incorporated in the project, based on the details, expected performance, and the installed prices of the items offered in the Proposal accepted.

Each manufacturer who offers an item of major equipment on this project shall file at least ten (10) days prior to the date set for opening of bids, two (2) complete copies of a detailed description of the equipment offered, list of comparable installations, and performance curves or data. One (1) copy of such data shall be filed directly with the Engineer.

#### 13. <u>Material Substitution</u>

If restrictions of any Governmental Authority prohibit the purchase or use of certain items that are required by the Contract Drawings and Specifications, substitution for such items will be determined by the Owner and the Engineer after the award of a construction contract.

Each Contractor shall base his bid on furnishing all items exactly as shown on the Contract Drawings and as described in the Contract Specifications. The successful Contractor will not be authorized to make any substitution on his own initiative, but in each and every instance must obtain a properly authorized Contract Supplement to his Contract before installing any work in variance with the Contract requirements.

#### 14. License or Royalty Fees

If the project is designed so as to require or permit the use of a process or processes (as distinguished from article, apparatus, or equipment) for which licenses or royalty fees will be charged, such fees for the use of such processes will be paid directly by the Owner to the patentee, licensee, or owner of such a process, and bidder shall not include such fees in their bids. If by the acceptance of a bid, the Owner shall have determined to use any patented process, the Owner will enter into a separate contract with the patentee, licensee, or owner of the process, and the Owner will make payment therefore to the owner, or licensee of such patented process. This provision, however, does not apply on royalties for patented items incorporated in this work.

#### 15. Material Tests

Attention of bidders is directed to the Material Test, which will be required on this Contract. All laboratory tests shall be made by a testing laboratory employed by the Contractor and approved by the owner. The cost of tests shall be paid by the Contractor. The Contractor shall supply and ship to the laboratory, all materials to be tested, whether indicated herein or requested by the Owner or Engineer. The cost of these materials and cost of tests shall be merged in the prices stated on items making up the Total Base Bid.

#### 16. Supplemental Unit Prices

On a lump sum proposal or partial lump sum proposal, if the bidding schedule includes a supplementary schedule of unit prices for fixing cost basis for changes, the Owner reserves the

right to reject any or all of such supplemental unit prices which it deems to be excessive or unreasonable.

# 17. <u>Withdrawal of Proposals</u>

Any bidder may withdraw his proposal at any time prior to the scheduled closing time for the receipt of proposals, but no proposal may be withdrawn after the scheduled closing time for the receipt of proposals within the period of time stated in the Advertisement for Bids.

## 18. <u>Signing of Proposal</u>

- (a) Proposals which are not signed by individuals making them should have attached thereto a power of attorney evidencing authority to sign the proposal in the name of the person to whom it is signed.
- (b) Proposals which are signed for a co-partnership should be signed by all of the co-partners or by an attorney-in-fact. If signed by an attorney-in-fact, there should be attached to the proposal a power of attorney, evidencing authority to sign the proposal.
- (c) Proposals which are signed for a corporation should have the correct corporate name thereof signed in handwriting or in typewriting, and the signature of the president or other authorized officer of the corporation should be manually written below the written or typewritten corporate name following the word "BY".
- (d) For any legal entity, the authority of the person signing for such legal entity shall be attached to the Proposal.

## 19. <u>Definition of Award</u>

The contract shall be deemed to have been awarded when formal notice of award has been duly served upon an intended awardee (i.e., the bidder to whom the Owner contemplated awarding a contract) by some officer or agent whom the Owner duly authorized to give such notice.

#### 20. Execution of Contracts and Bonds

Each contract must be executed in three (3) original counterparts and no more, and there shall be executed original counterparts of the Contractor's Performance Bond (and Labor and Materials Bond, if required) in equal number to the executed original counterpart of the Contract. One copy of such executed documents will be retained by the owner, the other two will be delivered to the Contractor. The successful Contractor must provide compensation insurance and public liability as outlined in the General Conditions of the Contract. The costs of executing the bonds and contract insurance, including all notarial fees and expenses are to be paid by the Contractor to whom the contract is awarded.

#### 21. Commencement and Completion of Work

Upon award of a Contract, the Owner shall determine the date on which the Contractor shall commence work. This date will not be prior to the time stated in the Proposal Form. Attention to all bidders is also directed to the number of calendar days, or date, stated in the Proposal Form for completion of the work to the point of final acceptance by the Owner.

# 22. <u>Make-up of Contract Document</u>

The attention of bidders is directed to the make-up of this Contract Document. The specifications governing work to be performed on this project and included in this document are composed of two parts: Project Specifications and General Specifications.

The General Specifications define and describe the major construction materials and construction methods for this project.

Materials and construction methods defined and described in the Project Specifications shall govern in cases of any variances between the General Specifications and Project Specifications. Whenever more than one construction material and/or construction method is defined and described in the General Specifications, the particular material and/or method to be used on this project shall be the one stated in the Project Specifications.

The General Specifications and the Project Specifications together with the Contract Drawings and Proposal Forms, define and describe the work to be performed on this Project.

#### 23. Payment

Contractors will be paid at intervals stated in the Contract.

#### 24. Guarantee

The attention of all bidders is directed to the conditions that on any contract which includes equipment items, the Contractor and his Surety will be held responsible by the Owner, that all items of equipment purchased and installed under this Contract fully meet the type, quality, design and the performance guarantee defined in the Major Equipment and Project Specifications, and in actual operation actually perform the functions for which installed. Further, that the Owner may withhold final payment until such performance and operation are demonstrated.

In view of such a contract requirement, it is suggested that the successful Contractor purchase all items of equipment under adequate guarantees or bonds from the manufacturers to protect the obligation of the Contractor to the owner on items of equipment.

#### 25. Award of Contract

- A. The Contract shall be awarded to the lowest responsive, reasonable bidder(s) including responsive efforts to utilize small and minority owned businesses.
- B. In case of error in the extension of prices, the unit bid prices shall govern. The Owner reserves the right to waive any informality in bids at his discretion.

# 26. Performance and Payment Bond:

A bid may be rejected if a bidder fails to meet any one of the following requirements:

1. The successful respondent shall supply, no later than five (5) business days after award of contract a Payment and Performance Bond in the amount of 100% of the total bid price,

issued by an insurance company licensed by the Wisconsin Department of Insurance, covering the faithful performance of this contract, in all terms and conditions thereof throughout the full term thereof between the County and the respondent and which will further indemnify and save harmless the County from all cost and damages by reason of the respondent's default, breach or failure to satisfactorily complete any of the following terms. If certificate is not submitted within five (5) business days, Kenosha County, at its sole discretion, may void the contract and award to the next low, responsive and responsible bidder.

- 2. Payment to all entities, individuals, and the like furnishing labor or materials in connection with this contract: and
- 3. Successful, full and satisfactory completion, including the dates specified between the County and the vendor, of the installation, ongoing operation and performance, consumable supplies and maintenance herein concerned. In the event of any breach on the part if the vendor, the Surety and/or the County shall have the right to take possession, custody, and control of any work site and/or installation and to complete and operate same forthwith, with any cost attributed thereto borne the respondent or the Surety. In the event of control and operation of any site(s) by the County or Surety, the County shall incur no financial obligation to the Respondent, and shall recover from the Respondent or Surety and cost of cover, i.e. additional cost, if any, incurred by the County in operating any site(s) during the breach by the respondent.

#### 27. Change Orders:

County shall have the right at any time during the progress of the Work to increase or decrease the Work. Promptly after being notified of a change, Contractor shall submit an itemized estimate of any cost or time increases or decreases it foresees as a result of the change. Except in an emergency endangering life or property, no addition or changes to the Work shall be made except upon written order of County, and County shall not be liable to the Contractor for any increased compensation without such written order. No officer, employee or agent of the County is authorized to direct any extra or changed work orally.

A Change Order, in a format acceptable to both the County and the Contractor, shall be issued and executed promptly after an agreement is reached between Contractor and the County concerning the requested changes. All change orders shall be incorporated into the contract. Contractor shall promptly perform changes authorized by duly executed Change Orders. The Contract Amount and Contract Time shall be adjusted in the Change Order in the manner as County and Contractor shall mutually agree.

			-	Base Bid Total:	

NOTE: Kenosha County reserves the right to select or reject the Base Bid in the best interest of the County.

#### II. PROPOSAL CONDITIONS:

#### (1) <u>TOTAL BASE BID</u>:

It is expressly understood and agreed that the foregoing Total Base Bid is the basis for establishing the comparison of bids only and is not to be construed to be a lump sum proposal.

It is further understood that the quantities in the Bidding Schedule for the unit price items are approximate only, and that payment on a Contract will be made only on the actual quantities of work completed in place, measured on the basis defined in the General Conditions.

The undersigned has carefully checked the above Bidding Schedule against the Contract Drawings and Specifications before preparing this Proposal and accepts said quantities as substantially correct, both as to classification and amount, and as correctly listing the complete work to be done in accordance with the Plans and Specifications.

#### (2) <u>BID SECURITY</u>:

Accompanying this Proposal is a (Certified Check) (Bank Draft) (Bid Bond) in the amount of DOLLARS (\$

payable to (which protects) the Owner, and which it is agreed, will be retained by the Owner as liquidated damages if the undersigned fails to execute the Contract in conformance with the FORMS OF CONTRACT incorporated in the Contract Documents, and furnish a Performance Bond as specified within ten (10) days from the notification of the award of the Contract to the undersigned.

In submitting this Proposal, it is understood and agreed by the undersigned, that the right is reserved by the Owner to reject any or all Proposals. It is further understood and agreed that this Proposal may not be withdrawn for a period of sixty (60) days from the opening thereof.

#### (3) STARTING AND COMPLETION:

- A. Kenosha County anticipates awarding this Contract on or after June 5, 2020.
- B. Kenosha County anticipates issuing a formal notice to proceed after June 19, 2020.
- C. Upon receipt of written Notice to Proceed the Contractor shall complete all work under the Contract prior to November 1, 2021.

The undersigned further agrees that should he/she fail to complete the above described work under above Item C within the limits stated above, liquidated damages in the sum of Twenty Five Hundred Dollars (\$2,500.00) for each calendar day the work remains uncompleted beyond said completion date will be paid by the Contractor to Kenosha County as stated in the Contract Form.

# (4) <u>SUBCONTRACTOR LISTING</u>:

The undersigned proposes to employ the following listed subcontractors for the following enumerated classes of work and not to alter or add to such list without the written consent of the Owner. All project subcontractors must be listed as a condition of this proposal.

#### DRUG FREE WORKPLACE CERTIFICATION

The undersigned contractor/vendor hereby certifies that it will provide a drug-free workplace program by: (1)Publishing a statement notifying its employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the offeror's workplace, and specifying the actions that will be taken against employees for violations of such prohibition;

- (2) Establishing a continuing drug-free awareness program to inform its employees about:
  - (i) The dangers of drug abuse in the workplace;
  - (ii) The offeror's policy of maintaining a drug-free workplace;
  - (iii) Any available drug counseling, rehabilitation, and employee assistance programs; and
- (iv) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;
- (3) Giving all employees engaged in performance of the contract a copy of the statement required by subparagraph (1);
- (4) Notifying all employees, in writing, of the statement required by subparagraph (1), that as a condition of employment on a covered contract, the employee shall:
  - (i) Abide by the terms of the statement; and
- (ii) Notify the employer in writing of the employee's conviction of, or plea of guilty or nolo contendere to, any violation of Wisconsin ACT 181 and Wisconsin State Statute 103.503 or of any controlled substance law of the United States or of any state, for a violation occurring in the workplace NO later than five days after such conviction.
- (5) Notifying Kenosha County government in writing within 10 calendar days after receiving notice under subdivision (4) (ii) above, from an employee or otherwise receiving actual notice of such conviction. The notice shall include the position title of the employee; (6) Within 30 calendar days after receiving notice under subparagraph (4) of a conviction, taking one of the following actions with respect to an employee who is convicted of a drug abuse violation occurring in the workplace:
- (i) Taking appropriate personnel action against such employee, up to and including termination; or
- (ii) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a federal, state, or local health, law enforcement, or other appropriate agency; and
- (7) Making a good faith effort to maintain a drug-free workplace program through implementation of subparagraphs (1) through (6).

bparagraphs (1) through (6).

## KENOSHA COUNTY DPW ROAD IMPROVEMENT PROJECT RD 16-003

#### IN: CTH S AT: AMAZON WEST DRIVEWAY TO CTH H

## KENOSHA COUNTY WISCONSIN

May 2020

#### 1. COMPONENT PARTS OF THE CONTRACT

Each Contract consists of the following component parts, all of which are as fully a part of this Contract as if herein set out verbatim, or, if not attached, as if attached hereto.

(a)	Contract Form
(b)	Addenda Nos,, and
(c)	Special Provisions
(d)	General Conditions
(e)	Project Specifications
(f)	General Specifications
(g)	Contract Drawings (Plans)
(h)	Instructions to Bidders
(i)	Advertisement for Bids
(j)	Contractor's Proposal

In the event that any provision in any of the above component parts of the Contract conflicts with any provision in any other of the component parts, the provision in the component part first listed above, shall govern over any other component part which follows it alphabetically, except as may be otherwise specifically stated.

#### 2. INDEMNITY AND INSURANCE REQUIREMENTS:

The project Contractor must carry adequate insurance in accordance with the following Kenosha County insurance requirements:

- a) Contractor agrees to indemnify, hold harmless and defend Kenosha County, its officers, agents and employees from any and all liability including claims, demands, losses, costs, damages and expenses of every kind (including financial or consequential damages) and description or damage to persons or property arising out of or in connection with or occurring during the course of this agreement where such liability is founded upon or occurring out of the acts or omissions of the Contractor, its agents or employees.
- b) Contractor agrees to protect itself and Kenosha County under the indemnity agreement set forth in the above paragraph. Contractor will at all times during the terms of this Contract keep in force and effect commercial general liability, contractor's environmental (pollution) liability or project specific sudden and accidental pollution coverage included under the commercial general liability policy, automobile liability, excess/umbrella liability, worker's compensation, and employer's liability insurance policies issued by a company or companies rated A- VII or better by AM Best and authorized to do business in the State of Wisconsin with the following minimum limits of coverage;

c)	Commercial Gene	ral Liability <sup>*</sup>	<
----	-----------------	----------------------------	---

i.	Each Occurrence	\$1,000,000
ii.	General Aggregate	\$2,000,000
iii.	Products - Comp/Op Agg	\$2,000,000

d) Contractor's Environmental (Pollution) Liability (legal liability for pollution conditions due to your operations)

i.	Each Incident	Ź	\$1,000,000
ii.	Aggregate		\$1,000,000

In lieu of a separate environmental policy, project specific Sudden and Accidental Pollution coverage included under your commercial general liability policy that does not

erode the GL and aggregate limits is acceptable.

e`	) /	Automo	bil	e l	[ ia]	hil	it	V
_	, ,	lutomo	$\sigma_{11}$	. •	Liu	$\sigma_{\mathbf{I}}$	ıιι	y

		i.	Combined Single Limit	\$1,000,000
f)	Excess/Umbrella Liability			
,	ř	i.	Each Occurrence	\$1,000,000
		ii.	Aggregate	\$1,000,000
g)	Worker's Compensation		Statutory Limits	

## h) Employer's Liability\*

i.	Each Accident	\$100,000
ii.	Disease Each Employee	\$100,000
iii.	Disease Policy Limit	\$500,000

<sup>\*</sup>Or such higher limits sufficient for these insurance policies to be scheduled under the Umbrella policy.

- i) Coverage afforded shall apply as a primary with **Kenosha County** named as an additional insured on the commercial general and excess/umbrella liability policies. **Contractor** shall give 30days advance written notice of cancellation or non-renewal during the term of this Contract.
- j) The hold harmless, indemnity and insurance provisions of this contract shall survive the termination of this contract and shall remain operative until the time that all potential claims or potential civil actions by the parties or by third parties shall expire under existing law.
- k) If any policies are written on a claims-made basis, Contractor shall not discontinue or change liability insurance policies in effect during any part of this contract without buying an extended reporting period to cover potential claims that may have occurred during the term of this agreement.
- l) Upon execution of this Contract, the **Contractor** shall furnish **Kenosha County** with a certificate of insurance, showing evidence of the above requirements.
- m) Contractor shall notify Kenosha County immediately upon the commencement of any litigation against Contractor where there is any possibility Kenosha County may be made a party thereto.

#### 3. GENERAL

Perform the work under this construction contract for Kenosha County project RD 16-003, CTH S, Amazon West Driveway to CTH H in Kenosha County, Wisconsin as the plans show and execute the work as specified in the State of Wisconsin, Department of Transportation (WisDOT) Standard Specifications for Highway and Structure Construction, 2020 Edition, as published by WisDOT, and these special provisions.

### 4. SCOPE OF WORK

The work under this contract shall consist of excavation common, base aggregate dense, concrete curb and gutter, asphalt paving, storm sewer, pavement marking, permanent signing, traffic control, a bridge structure, erosion control, restoration, and all incidental items necessary to complete the work as shown on the plans and included in the proposal and contract.

#### 5. PROSECUTION AND PROGRESS

Begin work within ten calendar days after the engineer issues a written notice to do so.

Provide the start date to the engineer in writing within a month after executing the contract but at least 14 calendar days before the preconstruction conference. Upon approval, the engineer will issue the notice to proceed within ten calendar days before the approved start date.

To revise the start date, submit a written request to the engineer at least two weeks before the intended start date. The engineer will approve or deny that request based on the conditions cited in the request and its effect on the owner's scheduled resources.

When, in the fall of 2020, after the new westbound travel lanes are substantially completed and as approved by the engineer to allow for opening the new CTH S westbound roadway to westbound traffic, and weather conditions or seasonal restrictions preclude the satisfactory performance of further work under this contract, the engineer will, in writing, suspend operations until the spring of 2021. Resume construction operations in the spring of 2021 within ten days after the date on which a written order to do so has been issued by the engineer. The contractor may be allowed to continue work through the winter only with prior approval in writing from Kenosha County and the engineer. Any request made to continue work through the winter must include provisions for ongoing erosion control, maintaining traffic, emergency vehicle access, and Kenosha County maintenance operations (predominantly snow plows).

#### 6. TRAFFIC

Complete all work in accordance with the requirements of section 643 of the standard specifications, as detailed in the traffic control plans, and as herein described. All variations from the traffic control plans shall be approved in writing at least 48 hours prior to any traffic control change. Notify the engineer at least 48 hours prior to any traffic control changes.

Maintain emergency access at all times along CTH S and all side roads throughout the project. Maintain access to all properties within the project limits at all times. Methods and materials utilized to maintain access to properties are incidental to the project.

No operations shall proceed until all traffic control devices for such work are in the proper location.

Close CTH S to through traffic from the beginning of the project to the west side of 38<sup>th</sup> Street. Detour CTH S traffic as shown on the plans.

Construct CTH S from 38<sup>th</sup> Street (including the 38<sup>th</sup> Street intersection) to the end of the project in stages as described below. Keep CTH S, from 38<sup>th</sup> Street to the end of the project, open to one lane of traffic in each direction at all times, except for one 24-hour period sometime between 7:00 PM Friday and 6:00 AM Monday, to construct Stage 2A to reopen the CTH S intersection with 38<sup>th</sup> Street to one lane of traffic in each direction.

The adjacent WisDOT sponsored project (ID 3210-00-75, CTH S from CTH H to Brumback Boulevard) will install a temporary median cross-over just beyond this east project limits (Sta. 113+00'WB' to Sta. 116+00'WB') no later than August 29, 2020 to accommodate a switch in traffic pattern for Stage 2 construction.

## Stage 1 – 38th Street to End Project

Maintain one lane of CTH S traffic in each direction on the existing roadway. Construct the north half of the finished roadway (the westbound roadway), including lane and shoulder final HMA pavement surface, shoulders, curb and gutter, storm sewer, shared-use path, and other incidental items.

Maintain traffic on the existing 96<sup>th</sup> Avenue roadway and construct the new 38<sup>th</sup> Street roadway from CTH S up to the existing 96<sup>th</sup> Avenue roadway. Do not close 96<sup>th</sup> Avenue (Stage 1B) until the new 38<sup>th</sup> Street connection to 96<sup>th</sup> Avenue is complete and open to traffic.

Coordinate traffic control switches with the adjacent WisDOT project ID 3210-00-75. Work performed west of Sta. 113+00'WB' is included under this contract.

## Stage 2 – 38th Street to End Project

Shift both directions of CTH S traffic onto the new westbound lanes constructed under Stage 1 construction. Close the existing CTH S roadway to through traffic to construct the new eastbound finished roadway, including lane and shoulder final HMA pavement surface, shoulders, curb and gutter, storm sewer, and other incidental items.

Do not shift traffic until the crossover constructed under project ID 3210-00-75 is in place, which is required under that contract by August 29, 2020. Coordinate traffic control switches with the adjacent WisDOT project ID 3210-00-75.

## Winter Shutdown - Entire Project Length

Maintain traffic along the entire project length during winter shutdown. Remove detour signs or cover detour signs during the winter shutdown. Covering or removal and reinstallation of detour signs is incidental to the contract.

Methods for opening the roadway to traffic will depend on the amount of work completed in 2020 during Stage 1:

*Option 1 - Westbound roadway completed in 2020. Eastbound roadway east of 38<sup>th</sup> Street and other select locations as needed completed in 2020* 

Close the north lane of the existing CTH S roadway and close the south lane of the newly constructed CTH S westbound lanes to traffic. Maintain one lane of westbound traffic on the north lane of the newly constructed CTH S westbound lanes. Maintain one lane of eastbound traffic on the south lane of the existing CTH S roadway. Maintain traffic access across the median openings on temporary pavement. Maintain all traffic control devices and appurtenances during the winter shutdown in accordance with section 643 of the standard specifications. Maintenance of traffic control during the winter shutdown is incidental to the Traffic Control item.

Option 2 – Westbound roadway completed in 2020. No portion of eastbound roadway completed in 2020

Close the existing CTH S roadway and maintain two directions of traffic on the newly constructed CTH S westbound lanes for the entire length of the project. Coordinate traffic control at the east end of the project with the adjacent WisDOT project ID 3210-00-75 to utilize the cross-over constructed under that contract. Utilize the existing concrete pavement left in place in front of the Amazon Sortation facility near the west end of the project as a cross-over.

#### Stage 3

Close the inside lanes of traffic in both the eastbound and westbound directions and maintain one lane of traffic in each direction on the outside lanes of each of the eastbound and westbound roadways. Construct the remaining median curb and gutter, storm sewer, and other incidental items necessary to complete the project.

#### Night Work – Entire Project

Night work is allowed during non-peak hours from 7:00 PM until 6:00 AM Sunday evening through Friday morning with prior written authorization from the engineer. Close CTH S to through traffic during night work to construct culvert pipe and storm sewer pipes crossing the existing roadway. Place portable changeable message signs at least 3 days prior to the night

closure. Maintain emergency vehicle access through the entire construction zone during night work at all times. Do not close CTH S for night work more than 2 consecutive nights or for more than 5 nights in total under this contract.

#### 7. UTILITIES

This contract does not come under the provision of Administrative Rule Trans 220.

There are known underground and overhead utility facilities located within the project limits. There are known utility adjustments required for this project. Coordinate construction activities with a call to Digger's Hotline or a direct call to the utilities that have facilities in the area as required per statues. Use caution to insure the integrity of underground and overhead facilities.

The following utilities have facilities within the project. Anticipated utility relocation work has begun and may be occurring simultaneously with the start of road construction operations. Contact each utility company listed in the plans prior to bidding to obtain confirmation on the status of utility relocation work within the project limits.

**AT&T** Wisconsin has underground and aerial fiber optic and copper cable throughout the project. Conflicts are currently being relocated are anticipated to be completed by July 31, 2020. Utility relocations may be occurring simultaneously with road construction operations.

**Kenosha Water Utility** has water and sanitary sewer lines south of CTH S and west of CTH H, which are outside the proposed project limits. Relocations are not anticipated.

**Private Water System – 96th Avenue Residents** own a private well water system that has water mains running north and south along both the east and west sides of 96th Avenue. No relocations are anticipated; however, these will not be marked by Digger's Hotline or the local community. Contact Bill Rock at 262-358-5575 or rockhouse4@yahoo.com to have these lines located.

**Spectrum** has underground and aerial facilities throughout the project. Conflicts are currently being relocated and are anticipated to be completed by July 31, 2020. Utility relocations may be occurring simultaneously with road construction operations.

WE Energies (Electric) has underground and aerial facilities throughout the project. Conflicts are currently being relocated are anticipated to be completed by July 31, 2020. Utility relocations may be occurring simultaneously with road construction operations. We Energies will install permanent street lighting at the CTH S intersection with 120th Avenue, 100th Avenue, and 38th Street only upon completion of the intersection. Notify WE Energies upon completion of road work at these side roads.

WE Energies (Gas) has underground facilities throughout the project that are anticipated to be in conflict with road construction. The majority of relocation work is planned to be completed prior to construction. As part of WE Energies' relocations, temporary gas main was installed around the homes waiting to be demolished near Sta. 10425'WB' LT and Sta. 105+25'WB' LT. WE Energies will relocate and discontinue in place this temporary gas main after these two houses have been demolished.

Coordinate construction activities with a call to Diggers Hotline or a direct call to the utilities for the underground facilities in the area, as required per state statutes. Use caution to maintain the integrity of utilities. Coordinate with the engineer to adjust plans as needed to avoid any unanticipated utility conflicts.

#### 8. PAYMENT AND PERFORMANCE BOND - WAIVERS OF LIEN

The Contractor shall be required to furnish a Payment and Performance Bond, including labor and materials, in the amount of the total amount of the Contract. Said Bond shall name the Owner and be delivered to the Owner at the time of execution of the Contract. The Contractor shall be required to file waivers of lien from all suppliers, subcontractors, etc., with the Owner prior to receiving payment on the project.

#### 9. EMERGENCY VEHICLE INGRESS & EGRESS

The Contractor shall conduct his operations in a manner, which does not restrict emergency vehicle access throughout the duration of the contract except as provided in the Traffic Control Specifications.

## 10. SCHEDULE OF CONSTRUCTION OPERATIONS

Prior to commencement of any work under this Contract, the Contractor shall confer with the Engineer and other representatives of the Owner and prepare a detailed schedule of construction operations. This schedule shall be subject to the approval of the Owner, and the Owner reserves the right to subsequently modify the schedule should he deem it necessary.

#### 11. WORK BY OTHERS

The Kenosha County Department of Public Works utilizes the various project sites on a daily basis. The Contractor shall be aware that work by the Kenosha County Department of Public Works, and/or other Contractors may be going on during the Contract work and the Contractor is expected to cooperate with others.

The Wisconsin Department of Transportation (WisDOT) is reconstructing the CTH S roadway from the end of this project at CTH H to Brumback Boulevard under WisDOT Project ID 3210-00-75 in 2020 and 2021. Coordinate construction and traffic control operations on a weekly basis with the construction representatives for WisDOT Project ID 3210-00-75. Do not interfere with construction or traffic control operations of WisDOT Project ID 3210-00-75.

#### 12. PERMITS

The Contractor shall be responsible for obtaining and paying for all necessary Federal, State, and Local permits, which may be required for contract operations.

## KENOSHA COUNTY DPW ROAD IMPROVEMENT PROJECT RD 16-003

#### IN: CTH S AT: AMAZON WEST DRIVEWAY TO CTH H

## KENOSHA COUNTY WISCONSIN

May 2020

CONTRACT

THIS CONTRACT made on	the	day of		, 20	by and	l between
	, hereinafter o	called the "C	CONTRACTOR	" and the C	ounty of	`Kenosha
Wisconsin, hereinafter called the	e "OWNER".					
WITNESSETH, that the Contrac	ctor, and the O	wner for the	consideration s	tated herein a	agree as	follows:

## ARTICLE I. SCOPE OF WORK

The Contractor shall perform everything required to be performed and shall provide and furnish all the labor, materials, necessary tools, equipment, expendable and otherwise, and all utility and transportation services required to perform and complete in workmanlike manner all of the work required for the CTH S Road Improvement Project, from the Amazon West Driveway to CTH H, in Kenosha County all in strict accordance with the Contract Drawings and Specifications including any and all addenda prepared by the Kenosha County Department of Public Works and R. A. Smith, Inc., Consulting Engineers, which Contract Drawings and Specifications are made a part of the Contract, and in strict compliance with the Contractor's Proposal and the other sections of the Contract Documents shall do everything required by this contract and other documents constituting a part thereof.

#### ARTICLE II. THE CONTRACT PRICE

The Owner shall pay to the Contractor for the performance of this Contract, subject to any additions or deductions provided herein, in current funds, the contract price computed as follows:

The foregoing Total shall be the basis for establishing the amount of Payment and Performance Bond and is not to be construed to be a lump sum contract price. The foregoing quantities of the unit price items are approximate only, and it is understood and agreed that payment shall be made only on the actual quantities of work completed in place, measured on the basis defined in the Contract Conditions and the Contract Specifications, and at the unit prices stated above.

#### ARTICLE III. SPECIAL CONTRACT REQUIREMENTS

## 1. <u>Component Parts of the Contract</u>

Each Contract consists of the following component parts, all of which are as fully a part of this Contract as if herein set out verbatim, or, if not attached, as if attached hereto:

- 1. Addenda Nos. \_\_\_\_\_, \_\_\_\_, and \_\_\_\_\_
- 2. Special Provisions of the Contract
- 3. Project Specifications
- 4. General Specifications
- 5. Contract Drawings
- 6. Instructions to Bidders
- 7. Advertisement for Bidders
- 8. Contractor's Proposal
- 9. This Instrument

In the event that any provision in any of the above component parts of this Contract conflicts with any provision in any other of the component parts, the provision in the component part first enumerated above shall govern over any other component part which follows it numerically, except as may be otherwise specifically stated.

This Contract is intended to conform in all respects to applicable statutes of the State of Wisconsin, and if any part or provision of this Contract conflicts therewith, the said statute shall govern.

#### 2. <u>Starting and Completion</u>

- a. Kenosha County anticipates awarding this Contract on or after June 5, 2020.
- b. Kenosha County anticipates issuing a formal notice to proceed after June 19, 2020.
- c. Upon receipt of written Notice to Proceed the Contractor shall complete all work under the Contract prior to November 1, 2021.

#### 3. <u>Liquidated Damages for Delay</u>

The Contractor guarantees that he/she can and will complete the work within the time limit stated in the Contract Documents, or within the time as extended by the Owner. Inasmuch as the damage and loss to Kenosha County which will result from the failure of Contractor to complete the work within the stipulated time, will be most difficult or impossible of accurate assessment, the damages to Kenosha County for such delay and failure on the part of the Contractor shall be liquidated in the sum of <a href="Two Thousand Five Hundred Dollars">Two Thousand Five Hundred Dollars</a> (\$2,500.00) for each calendar day, Sundays and Holidays included, by which the Contractor shall fail to complete the work or any part thereof in accordance with the provisions hereof, and such liquidated damages shall not be considered as a penalty. If the Owner can, with certainty, establish actual damage and loss to the Owner caused by the Contractor's failure to complete the project on time, and that amount is higher than the liquidated damages provided for herein, then at its option Owner may charge against the contract monies due said actual damages rather than liquidated damages.

#### ETHICS COMPLIANCE ADDENDUM

It is agreed and understood by all parties to this contract that:

- 1. In addition to ethical standards set forth in Wisconsin Statutes section 19. 59 for all county employees and officials [either elected or appointed] Kenosha County has adopted an ethics policy that is applicable to county employees in conducting county business. That policy may be reviewed at <a href="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/MCKC20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/McKc20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/McKc20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/McKc20?bidId="https://www.kenoshacounty.org/DocumentCenter/View/578/McKc20?bidId="https://www.kenoshacounty.org/DocumentCe
- 2. This ethics policy is intended to ensure that public trust in Kenosha county government is maintained and that decisions affecting the county and its citizens are made fairly and impartially for the benefit of all citizens and not for personal gain. This policy precludes the misuse or misappropriation of county property or funds for personal use or otherwise, use or disclosure of confidential information for personal gain or otherwise, elimination of conflicts of interests, receipt of gifts or favors or other considerations of value by county employees, the use of the employee's public position to influence or gain unlawful benefits or to influence or gain advantages or privileges for the employee, and the conducting of personal business or campaigning during working hours.
- 3. This policy, furthermore, requires employees to disclose and report to the proper authorities any violation of this policy or State Statute by either other employees or by any non-employee or citizen seeking to or aiding or abetting in efforts to circumvent this policy. Any employee failing to make such disclosure or report is subject to discipline. This contract also requires that any party contracting with Kenosha County also report any such violation to either the District Attorney or Corporation Counsel for Kenosha County.
- 4. By executing this contract, each party certifies that it knows of no conflicts of interest or appearance of a conflict or appearance of an impropriety on the part of any current or former county official or employee who may have had a role on deciding which proposal or bid will be accepted, and
- 5. By executing this contract, each party certifies that no attempt has been made by anyone on behalf of the party submitting a proposal or bid to directly or indirectly illegally influence the awarding of a contract by promise of or delivery of any consideration or any thing of value to a current or former County official or employee or family or household member of a current or former County official or employee, or in any other manner contrary to law, and
- 6. The parties acknowledge that Kenosha County is a municipal corporation legally bound to comply with the Wisconsin Open Meetings and Public Records laws and that as such, unless otherwise allowed for by law, all aspects of this agreement are subject to open discussion and disclosure are a matter of public record. It is furthermore agreed to that no party will take any action to obstruct the operation of these laws. If records are created or maintained or in the custody of the provider, as an independent contractor, they, along with the raw data used to create the record, are, nevertheless, public records. Within legal constraints related to confidentiality and privacy protection, such records must be made immediately available to the public upon request and in the format in which they were created. Provider agrees to hold the County harmless and to indemnify the County for all costs, fees, including all attorney fees and judgments and damages of whatever kind for which the County may be held liable due to the provider's failure to comply with the Wisconsin Public Records and Open Meetings laws.

7. That any subsequent finding of a violation of either the County's ethics policy or Wisconsin Statutes sections, 19.59, 946.12 and 946.13 by any party or any agent of any party acting either alone or acting in concert with a current or former Kenosha County official or employee may result, at the sole option of Kenosha County, in this agreement being declared null and void and / or may result in the party violating this policy being debarred from submitting proposals, bids or contracting with

## INSTRUCTIONS FOR EXECUTION OF PAYMENT BOND AND EXECUTION OF PERFORMANCE BOND

The penal amount of the Payment and Performance Bond for a unit price Contract shall be the summation of the correct and checked extension of the unit prices with the estimated number of units.

The form of bonds attached hereto shall be used for each Contract. This form contemplates one corporate surety only. In case co-sureties will be furnished, proper forms therefrom shall be obtained.

If the principal is an individual, his full Christian name, and residence shall be inserted in the body thereof, and he shall sign the bond with his usual signature on the line opposite the scroll seal.

If the principals are partners, their individual names shall appear in the body of the bond, with the recital that they are partners composing a firm, naming it.

If the principal is a corporation, the name of the State in which incorporated shall be inserted in the appropriate place in the body of the bond. Said instrument shall be executed and attested under the corporate seal as indicated in the form. If the corporation has no corporate seal, the fact shall be stated, in which case a scroll or adhesive seal shall appear following the corporate name. This also applies to execution by the surety.

If persons other than the President and Secretary are executing the Contract, then a copy of the Corporate Resolution adopted by the Board of Directors authorizing the parties to bind the corporation to this Contract must be attached to this Contract.

The date of the bond must not be prior to the date of the Contract for which it is given.

A Power of Attorney authorizing the execution of the bond by an attorney-in-fact, or Agent, shall be attached to the executed counterpart of the bond. If the bond is executed by an out-of-state agent, the executed counterpart of the bond shall be countersigned by a licensed resident agent.

#### PAYMENT AND PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS, that \_\_\_\_\_

as Principal, and
as Surety, are held and firmly bound unto
in the full and just sum of
Dollars
(\$) lawful money of the UNITED STATES OF AMERICA for the payment of which sum
of money well and truly to be made, we bind ourselves, heirs, executors, administrators, successors and
assigns, jointly and severally, firmly by these presents.
WHEREAS: The Principal has entered into a certain written Contract, dated the day of
, 20, with the
for complete, as
described in the foregoing Contract and Article of Agreement.
NOW THE CONDITIONS OF THIS OBLIGATION ARE SUCH, that if the said Principal shall
in all respects well and truly keep and perform the said Contract, and shall pay all sums of money due or
become due, for any labor, materials, apparatus, fixtures or equipment furnished for the purpose of
constructing the work provided in said Contract, and shall defend, indemnify and save harmless said
against any and all liens, encumbrances, damages, claims, demands, expenses,
costs and charges of every kind except as otherwise provided in said specifications and other Contract
Documents, arising out of or in relation to the performance of said work and the provisions of said
Contract, and shall remove and replace any defects in workmanship or materials which may be apparent
or may develop within a period of one (1) year from the date of final acceptance, then this obligation shall

be null and void; otherwise it shall remain in full force and effect.

And said Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Contract, or to the work to be performed thereunder or the specifications accompanying the same shall in anyway affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract or to the work or to the specifications.

#### GENERAL CONDITIONS TO THE CONTRACT

#### 1 - DEFINITIONS

The following terms used in these Contract Documents are respectively defined as follows:

(a) "Project"

The entire improvement proposed by the Owner to be constructed in whole or in part pursuant to the within Contract or Contracts.

(b) "Owner" or "Department"

The contracting party initiating the project as set forth in the Contract acting through its authorized representative in accordance with specific duties delegated to such representative.

(c) "Contractor"

The person, persons, firm or corporation to whom the within Contract is awarded by the Owner, and who is subject to the terms of said Contract. Also the agents, employees, workmen, or assignees of the Contractor.

(d) "Subcontractor"

A person, firm or corporation, other than the Contractor, supplying labor and materials or labor only, on work at the site of the project.

(e) "Work"

All materials, labor, supervision, use of tools, and equipment necessary to complete the project in full compliance with the terms of the Contract.

(f) "Engineer"

R. A. Smith, Inc. or other Engineers appointed by the Owner for the supervision of construction of the project.

(g) "Surety"

The person, firm or corporation that has executed as Surety the Contractor's Performance Bond, securing the performance of the within Contract. Also the person, firm or corporation that has executed as Surety the Contractor's payment bond which guarantees payment to all persons supplying labor and material utilized in the prosecution of the work included in the Contract.

#### (h) "Notice"

Where in any section of the Contract Document there is any provision in respect to the giving of any notice, such notice shall be deemed to have been given (as to the Owner) when written notice shall be delivered to the Engineer of the Owner, or shall have been placed in the United States mails, addressed to the Chief Executive Officer of the Owner, at the place where the bids or proposals for the Contract were opened; (as to the Contractor) when a written notice shall be delivered to the Chief Representative of the Contractor at the site of the project to be constructed under the Contract, or when such written notice shall have been placed in the United States mails, addressed to the Contractor at the place stated in the Proposal as the address of his permanent place of business; (as to the Surety) on the Performance Bond when a written notice is placed in the United States mails, addressed to the Surety at the home office of such Surety, and when two (2) copies of such notice shall have been filed with the Owner.

#### 2 - INTENT OF CONTRACT DOCUMENTS

The Sections of the Contract Document and the Contract Drawings are complementary and what is called for by any one shall be binding as if called for by all. The intention of the Contract Document is to include in the contract price the cost of all labor and materials, water, fuel, tools, plants, equipment, light, transportation, and all other expenses as may be necessary for the proper execution and completion of the work included in the Contract.

In interpreting the Contract Documents, words describing materials which have a well-known technical or trade, meaning unless otherwise specifically defined in the Contract Documents, shall be construed in accordance with such well-known meanings recognized by Architects, Engineers, and the trade.

Any work shown on the Contract Drawings and not covered in the Contract Specifications, or included in the Contract Specifications and not shown on the Contract Drawings, shall be executed by the Contractor as though both shown on the Contract Drawings and included in the Contract Specifications. If the Contract Drawings and the Specifications should be contradictory in any part, the Contract Specifications shall govern.

#### 3 - CONTRACT DRAWINGS AND SPECIFICATIONS

All work shall be executed in strict conformity with the Contract Drawings and Specifications, and the Contractor shall do no work without proper drawings and instructions.

Unless otherwise provided in the Special Provisions of the Contract and/or in the Contract Specifications, the Owner will furnish the Contractor, free of charge, all copies of Drawings and Specifications reasonably necessary to carry out the work.

Figured dimensions of the Contract Drawings shall be taken as correct, but shall be checked by the Contractor before starting construction. Any errors, omissions or discrepancies shall be brought to the attention of the Engineer and his decision thereon shall be final. All notes on the Contract Drawings shall be followed. Correction of errors or omissions on the Contract Drawings or the Contract Specifications may be made by the Engineer when such correction can reasonably be considered necessary for the proper execution and completion of the work.

#### 4 - EXISTING UTILITIES AND PIPING

The location of existing piping and underground utilities such as sanitary sewers, gas mains, storm sewers, water mains, electrical duct lines, telephone lines, etc., as shown on the Contract Drawings have been determined from information available from the records of the parent utility companies or from actual field surveys. However, the Owner does not assume responsibility for the possibility that during construction, utilities other than those shown may be encountered or that actual locations may be different from those shown on the Contract Drawings.

At the locations wherein detailed positions of these facilities become necessary to the new construction, the Contractors shall, at their own expense, furnish all labor and tools to either verify and substantiate the record drawing locations, or definitely establish the position of the facilities.

Any pipe or service inadvertently damaged, shall be repaired or replaced to the Owner's satisfaction at the Contractor's expense. All pipe so crossed shall be supported across the trench excavation to the Engineer's satisfaction.

It shall be the responsibility of the Contractor to make all necessary arrangements with the utility companies to locate their facilities including service laterals in the field during construction operations and to relocate any portions of their facilities as required to permit the installation of work included in these Contracts.

#### 5 - SHOP DRAWINGS

The Contractor, as soon as possible, after the approval of the source and purchase of items of materials and equipment, shall submit to the Engineer, shop or setting drawings and schedules for every item of equipment or material to be incorporated in the work which is fabricated or manufactured off the site, including but not limited to those pertaining to structural and reinforcing steel, electrical, plumbing, carpentry, heating and ventilation. The Contractor shall make any corrections in the drawings required by the owner or the Engineer and re-submit same without delay, together with drawings first submitted. Six (6) final copies of all corrected and approved shop or setting drawings shall be submitted to the Engineer who, after checking, will retain three (3) copies and return three (3) copies to the Contractor.

The Engineer's approval of shop drawings of equipment and materials shall extend only to determining the conformity of such equipment and materials with the general features of the Contract Drawings and Contract Specifications prepared by the Engineers. It shall be the responsibility of the Contractor to determine the correctness of all dimensions and minor details of such equipment and materials so that they will fit into the completed work, and so that when incorporated in the work, correct operation will result.

#### 6 - SCHEDULE OF EQUIPMENT ITEMS

As soon as possible after the execution of the Contract on all contracts incorporating manufactured items, the Contractor shall submit to the Owner for approval, the name of the manufacturer of each item proposed to be purchased, together with a complete description of the item and catalog cuts. No final purchase of major equipment shall be made until the written approval of the Owner is obtained, and no deviation from the selected manufacturers as stated in the Contract will be accepted.

#### 7 - "OR EQUAL" CLAUSE

Whenever in any section of the Contract Documents any article, material, or equipment is defined by describing a proprietary product, by using the name of a manufacturer or vendor, the term "or equal", if not inserted shall be implied. The specific article, material or equipment mentioned shall be understood as indicating the type, function, minimum standard of design, efficiency, price, and quality desired and shall not be construed in such a manner as to exclude manufacturer's products of comparable quality, design, price, and efficiency, as approved by the Engineer.

Requests for approvals shall be submitted to Kenosha County in accordance with the Instructions to Bidders.

#### 8 - SCHEDULE AND UNIT PRICES

Promptly following the execution of the Contract Documents, the Contractor shall prepare and transmit to the Owner an original and three (3) copies of an itemized breakdown showing the unit quantities of each item and the corresponding unit prices divided between labor, material and other costs of all items of labor, equipment or supplies to be incorporated into the Project. The breakdown, when approved, will be used primarily in determining payment due the Contractor on periodical estimates.

#### 9 - INSPECTION

The Owner and his representative shall at all times have access to the work wherever and whenever it is located in performance or progress, and the Contractor shall provide proper facilities for such access and inspection.

The Owner shall have the right to reject materials and workmanship, which are defective, or to require their correction. Rejected workmanship shall be satisfactorily corrected, and rejected materials shall be removed from the premises without charge to the Owner. If the Contractor does not correct such condemned work and remove rejected materials within a reasonable time fixed by written notice; the Owner may remove them and charge the expense to the Contractor.

Should it be considered necessary or advisable by the Owner at any time before final acceptance of the entire work, or at any other time, to make an examination of work already completed by removing or tearing out same, the Contractor shall on request promptly furnish all necessary facilities, labor and materials. If such work is found to be defective in any material respect due to fault of the Contractor or his subcontractors, he shall bear all the expense of such examination and of satisfactory reconstruction. If, however, such work is found to meet the requirements of the Contract, the actual cost of labor and materials necessarily involved in the examination and replacement, plus 15% will be allowed the Contractor.

All materials to be incorporated in the work, all labor performed, all tools, appliances and methods used shall be subject to the inspection and approval or rejection of the Owner.

If any authorized agent of the owner shall point out to the Contractor, his foreman or agent, any neglect or disregard of the contract provisions, such neglect or disregard shall be remedied and

further defective work be at once discontinued, but the right of final acceptance or rejection of the work will not be waived by reason thereof, nor by any other act of the Owner or its agents.

The Contractor shall execute the work only in the presence of the Engineer or Inspectors during the working hours of the day, unless provision has been made for work on other shifts. The presence of the Engineer or Inspector shall in no way relieve the Contractor of the responsibility of his contract, or be any warrant for furnishing of bad material or poor workmanship.

The inspection and supervision of the work by the Engineers is intended to aid the Contractor in applying labor, materials and workmanship in compliance with the contract provisions. Such inspection and supervision, however, shall not operate to release the Contractor from any of his contract obligations.

#### 10 - SUPERINTENDENCE

The Contractor will give personal superintendence to the work, or have at the site of the work, at all times, a competent foreman, superintendent, or other representative, satisfactory to the Owner and having the authority to act for the Contractor.

Insofar as is practicable, and excepting in the event of discharge by the Contractor, or in the event of proven incompetence, the individual who has been accepted by the Owner to represent the Contractor shall so act, and shall follow without delay instructions of the Engineer in the prosecution of the work in conformity with the Contract.

#### 11 - LABOR

The Contractor shall employ none but competent and skilled workmen and foremen in the prosecution of work on this Contract. The Owner shall have the authority to order the removal from the work any Contractor's employee who refuses to or neglects to obey any of its instructions or those of the Engineer or Inspectors, relating to the carrying out of the provisions and intent of the provisions of the Contract, or who is incompetent, unfaithful, abusive, threatening or disorderly in his conduct, and any such person shall not again be employed on this Project.

## 12 - <u>INSPECTION AND TESTING OF MATERIAL</u>

Attention of the Contractor is directed to the material tests required on this Contract. All laboratory tests shall be made by a testing laboratory employed by the Contractor and approved by the Owner. The cost of tests shall be paid by the Contractor. Unless otherwise provided in the Special Provisions of the Contract and/or in the Contract Specifications, the Contractor shall furnish the materials to be tested and incidental materials and labor required at the site in connection with the tests, the cost of which shall be considered as included in the price or prices set forth in the Contract for contract items.

#### 13 - PROTECTION OF WORK

The Contractor shall continuously maintain adequate protection of all his work from damage, and shall protect the Owner's and adjacent property from injury arising in connection with this Contract.

The Contractor shall be responsible for any and all damage to property, public or private, that may be caused by his operations in the performance of his Contract, and the Contractor shall

defend any suit that may be brought against himself and/or the Owner on account of damage inflicted by his operations, and shall pay any judgments awarded to cover such damage.

#### 14 - <u>COST OF SERVICES</u>

The Contractor shall be required to pay the established water rates obtained from the Owner. Large quantities of water for flushing trenches, filling mains, or other operations shall be drawn only at night, or at times specifically authorized by the Owner.

The cost of all power, lighting and heating required during construction shall be paid by the Contractor and its cost merged in this Contract price.

#### 15 - USE OF JOB SITE

The Contractor shall confine his equipment, apparatus, the storage of materials and operations of his workman to limits indicated by the law, ordinances, permit or directions of the Owner and shall not encumber the premises with his materials.

The Contractor shall not load or permit any part of the structure to be loaded with a weight that will endanger its safety. The Contractor shall observe and enforce the Owner's instructions regarding signs, advertisements, fires and smoke.

#### 16 - USE OF PRIVATE LAND

The Contractor shall not use any vacant lot or private land as a plant site, depository for materials, as a spill site, or for any other purpose without the written authorization of the Owner of the land (or his agent). A copy of written authorization shall be filed with the Owner.

#### 17 - ACCESS TO PRIVATE PROPERTY AND SCHEDULE OF CONSTRUCTION

Prior to commencement of any work under this Contract, the Contractor shall confer with the Engineer and other representatives of the Owner and prepare a detailed schedule of construction operations.

This schedule shall be subject to the approval of the Owner, and the Owner reserves the right to subsequently modify the schedule should he deem it necessary.

All construction work shall be prosecuted in a fashion, which will cause a minimum of interference with pedestrian and vehicular traffic. Access to alleys and private driveways shall also be provided as soon as possible.

At the close of each day's construction work, at least one lane of traffic shall be maintained on all streets.

#### 18 - SUBCONTRACTS

The Contractor shall notify the Owner, in writing, of the names of the subcontractors proposed on the Contract and shall not employ any subcontractors until the Owner's approval in writing has been obtained.

The Contractor agrees to be fully responsible to the Owner for the acts or omissions of his subcontractors and of anyone employed directly or indirectly by him or them, and this Contract obligation shall be in addition to the liability imposed by law upon the Contractor.

Nothing contained in the Contract Documents shall create any contractual relationship between any subcontractors and the Owner. The Contractor agrees to bind every subcontractor (and every subcontractor of a subcontractor) by the terms of the General and Special Provisions of the Contract, the Contract Drawings and Specifications, as far as applicable to his work, unless specifically noted to the contrary in a subcontract approved in writing as adequate by the Owner.

#### 19 - ASSIGNMENT OF CONTRACT

No assignment by the Contractor of any construction contract, or any part thereof, or of the funds to be received there under by the Contractor, will be recognized, unless such assignment has had the written approval of the Owner and the Surety has been given due notice of such assignment and has furnished written consent thereto. Such written approval by the Owner shall not relieve the Contractor of the obligations incurred by him under the terms of this Contract. In addition to the usual recitals in assignment contracts, the following language must be set forth:

"It is agreed that the funds to be paid to the assignee under this assignment are subjected to a prior lien for services rendered or materials supplied for the performance of the work called for in said contract in favor of any persons, firms, or corporations rendering such services or supplying such materials".

#### 20 - OTHER CONTRACTS

The Owner may award other contracts for additional work at the site of the project (or other locations) and the Contractor shall fully cooperate with such other Contractors and carefully fit his own work to that provided under other contracts as may be directed by the Owner. The Contractor shall not commit or permit any act, which will interfere with the performance of work by any other contractor.

#### 21 - OWNER'S RIGHT TO DO WORK

If the Contractor neglects to prosecute the work to be performed on this Contract properly, or fails to perform any provision of this Contract, the Owner, after three days' written notice to the Contractor and his Surety, may, without prejudice to any other remedy he may have, make good such deficiencies and may deduct the cost thereof from the payment due the Contractor.

#### 22 - TERMINATION FOR BREACH

In the event that any of the provisions of this Contract are violated by the Contractor or by any of his subcontractors, the Owner may serve written notice upon the Contractor and the Surety of its intention to terminate this Contract, such notice to contain the reasons for such intention to terminate this Contract, and unless within ten (10) days after the serving of such notice upon the Contractor, such violation shall cease and satisfactory arrangements for correction is made, the Contract shall upon expiration of said ten (10) days cease and terminate. In the event of any such termination, the Owner shall immediately serve notice thereof upon the Surety and the Contractor, and the surety shall have the right to take over and perform the Contract; provided, however, that if the Surety does not commence performance thereof within thirty (30) days from

the date of the mailing to such Surety of notice of termination, the Owner may take over the work and prosecute the same to completion by contract or force account and the expense of the Contractor and his Surety shall be liable to the Owner for any excess cost thereby occasioned the Owner.

In cases where the Contractor has failed to complete minor items of work within the time set for completion of the Contract, but limited to cases where the value of such uncompleted work does not exceed five percent (5%) of the total construction cost of the work, then the Owner shall have the privilege, without terminating this Contract, of completing said items of work and then deducting from the sums due the Contractor under this Contract the total cost which the Owner incurs in completing such minor items of work. In such cases the Owner may complete such minor items of work by force account or by employing some other Contractor to complete such minor items of work. In the event the Owner desires to adopt this procedure, he shall deliver to the Contractor a written statement, enumerating and describing the items not completed, or imperfectly completed, and shall in such statement demand that the Contractor within a time to be fixed in such statement by the Owner, and then if the Contractor refuses to comply, or if he neglects to comply with time stated, the Owner may proceed as in above set forth. The time within which the Contractor shall be required to complete the items set forth in such statement must depend on the amount of time reasonably required for the performance of the work in question, but shall not in any event be less than ten (10) days, nor more than thirty (30) days.

#### 23 - MATERIALS AND WORKMANSHIP

Unless otherwise stipulated in the Contract Specifications, all workmanship, equipment, materials and articles incorporated in the work covered by this Contract shall be new and of the best grade of their respective kinds for the purpose. The Contractor shall furnish to the Owner for his approval the name of manufacturers or machinery, mechanical or other equipment, which he contemplates installing, together with their performance capacities and other pertinent information.

If not otherwise provided, materials or work called for in this Contract shall be furnished and performed in accordance with well-known established practice and standards recognized by Architects, Engineers and the trade.

When required by the Contract Specifications or when called for by the Owner, the Contractor shall furnish the owner, for approval, full information concerning the materials or articles which he contemplates incorporating in the work. Samples of materials shall be submitted for approval when so directed. Machinery equipment, materials and articles installed or used without such approval shall be at the risk of subsequent rejection. All materials and workmanship shall be guaranteed by the Contractor and the Surety for a period of one year from the date of final acceptance, and this guarantee must be covered in the Surety Bond for the Contract.

No material of any kind shall be installed in the project until it has been inspected by the Engineer. All material rejected shall be immediately removed from the site of the work and not again offered for inspection. Any material or workmanship found at any time to be defective shall be remedied at once regardless of previous inspections.

At any time during the course of construction of this project, when, in the opinion of the Engineer, provisions of the Contract Drawings, Specifications or Contract Conditions are being violated by the Contractor or his employees, the Engineer shall have the right and authority to

order all construction to cease or materials to be removed, until arrangements satisfactory to the Engineer are made by the Contractor for resumption of the work in compliance with the provisions of the Contract. It shall not be construed as a waiver of defects if the Engineer shall not order the work stopped or more material removed, as the case may be.

#### 24 - <u>CUTTING AND PATCHING</u>

The Contractor shall do all cutting, fitting or patching of his work that may be required to make its several parts fit together or to receive work of other Contractors shown upon, or reasonably implied by the Contract Drawings and Specifications for the completed project.

Any cost caused by defective or ill-timed work shall be borne by the party responsible therefore.

The Contractor shall not endanger any work by cutting, digging or otherwise shall not cut or alter the work of any Contractor without the consent of the Owner, or of the Owner's authorized representative.

#### 25 - GUARANTEES

All work to be performed under this Contract shall be constructed in compliance with the Contract Drawings, the Contract Specifications and standard construction codes, and must be guaranteed by the Contractor and his Surety for a period of one (1) year from the date of final acceptance by the Owner against defective workmanship and material of any nature. On all items of equipment to be incorporated in the completed project, the Contractor and his Surety must guarantee that the type, quality, design and performance will fully meet the requirements of the Contract Specifications.

In placing orders for equipment, the Contractor shall purchase same only under a written guarantee from the respective manufacturers that the equipment supplied will function satisfactorily as an integral part of the completed project in accordance with the Contract Drawings and Specifications and that the manufacturer will repair or otherwise make good any defects in workmanship or materials which may develop within a period of one (l) year from the date of final acceptance. Furthermore, the Contractor shall require that the manufacturer agree in writing at the time the order for equipment is placed that he will be responsible for the proper functioning of the equipment in cooperation with the Contractor, and that whenever necessary during the installation period or tuning-up period following the construction period, the manufacturer will cooperate as may be necessary for initial successful operation and will supply, without additional cost to the Owner, such superintendence and mechanical labor as may be necessary to make any adjustments, and to supply additional parts and labor needed to make the equipment function satisfactorily, even if same was not shown on the approved shop drawings. Two (2) copies of each guarantee of agreement shall be furnished to the owner by the Contractor.

#### 26 - FINAL TESTS

After completion of the work to be performed on this Contract, the Contractor shall make any and all tests required by Municipal or State regulations, and, where so provided in said regulations, shall furnish the Owner with certificates of inspection by the Municipal or State regulatory bodies. The Contractor shall also make all tests required by the National Board of Fire Underwriters for the purpose of determining insurance rates or other protection of the Owner or

the public, and all tests needed to determine complete and faithful compliance with all provisions of this Contract.

#### 27 - CLEANING UP AND FINAL INSPECTION

The Contractor shall at all times keep the site of the work free from accumulation of waste material or rubbish caused by his employees on the construction work, and at the completion of the work he shall remove all his rubbish from and about the work and all his tools, equipment, scaffolding, and surplus materials, and shall leave the completed work clean and ready for use. In case of dispute, the Owner may remove the rubbish and surplus materials and charge the cost to the several Contractors, if more than one is employed on the project, in proportion to the amounts as shall be determined by the Owner to be just.

When requested by the Engineer, the Contractor shall, in the case of sewer and water main and other subsurface construction, remove sheeting, clean up the area, restore subgrade and/or pavement, replace topsoil, seed areas, etc., for individual sections of the work as they are completed rather than upon completion of the project.

On or before completion of the work the Contractor shall, without charge, tear down and remove all buildings and other structures built by him for facilitating the carrying out of the work, and shall remove all rubbish of all kinds from the grounds which he has occupied and shall leave the work clean and in good condition.

All sewers, conduits, pipes and appurtenances and all tanks, pump wells, chambers, buildings and other structures shall be kept clean during construction and as the work, or any part thereof, approaches completion, the Contractor shall systematically and thoroughly clean and make any needed repairs to them. He shall furnish at his own expense suitable tools and labor for removing all water and clearing out all dirt, mortar and foreign substances. Any undue leakage of water into the structures, such as to make the work, in the opinion of the Engineer, fall short of first class work shall be promptly corrected by the Contractor at his own expense. Cleaning and repairs shall be arranged, as far as practicable, to be completed upon finishing the construction work.

Notice to begin final cleaning and repairing, if such is needed; will be given by the Engineer who, at the time, will make his final inspection of the work. The Engineer will not approve the final estimate of any portion of the work until after the final inspection is made and the work found satisfactory.

#### 28 - CONTRACTOR'S INSURANCE

The Contractor shall not commence work under this Contract until he has obtained all insurance required under this paragraph. Certificates of Insurance, together with duplicates of the policies, fully executed by officers of the Insurance Company, shall be filed with the Engineer and Owner for approval. The Contractor shall not allow any subcontractor to commence work on his subcontract until all similar insurance required for the subcontractor has been so obtained and approved. The Contractor shall also submit the original insurance policies for inspection and approval of the Owner before work is commenced. Said policies shall not thereafter be cancelled, permitted to expire, or to be changed without ten-(10) days' notice in advance to the Owner and consented to by the Owner, and the policy shall so provide.

- (a) Compensation Insurance: Before any work is commenced, the Contractor shall take out and maintain during the life of this Contract, Worker's Compensation Insurance for all of his employees employed at the site of the Project. In case any work shall be sublet, the Contractor shall require the Subcontractor similarly to provide Worker's Compensation Insurance for all of the latter's employees, unless such employees are covered by the protection afforded by the Contractor. In case any class of employees engaged in work under this Contract at the site of the Project is not protected under the Worker's Compensation Statute, the Contractor shall provide for any such of his employees, and shall provide or cause such Subcontractor to provide Employer's Liability Insurance for the protection of his employees not protected by the Worker's Compensation Statute.
- (b) Public Liability and Property Damage Insurance: The Contractor shall take out and maintain during the life of this Contract such Comprehensive Public Liability and Property Damage Insurance as shall protect him, the Owner, and any Subcontractor during the performance or work covered by this Contract from claims or damages for personal injury, including death, as well as for claims for property damages, which my arise from operation under this Contract, whether such operations be by himself or by any Subcontractor, or by anyone directly or indirectly employed by either of them, or in such a manner as to impose liability on the Owner, and the amounts of such insurance shall name the Owner as insured along with the Contractor, and shall hold harmless the owner against all suits and claims arising from or as the result of the operations of the Contractor or his Subcontractors. In absence of specific regulations, the amount of coverage shall be as follows:

Comprehensive Public Liability Insurance in an amount not less than \$1,000,000 for injuries, including accidental death to any one person, and subject to the same limit for each person in an amount not less than \$2,000,000 on account of one accident, and Property Damage Insurance in an amount not less than \$500,000.

In addition to the above, the Contractor's Liability and Property Damage Insurance shall be endorsed to provide contractual liability coverage for an owner.

- (c) Insurance Covering Special Hazards: Special hazards as determined by the Owner, shall be covered by rider or riders in the Comprehensive Public Liability and/or Property Damage Insurance Policy or Policies herein elsewhere required to be furnished by the Contractor, or by separate policies of insurance in the amounts as defined in the Special Provisions of the Contract, included herewith.
- (d) Automobile Insurance: The Contractor shall take out and maintain during the life of the Contract, Automobile Public Liability Insurance in amounts not less than \$1,000,000 and Property Damage Liability Insurance in an amount not less than \$1,000,000 if any teams or motor vehicles are engaged in operations within the terms of this Contract on the site of the work to perform thereunder. Such insurance shall cover the use of all such teams and motor vehicles engaged in operating within the terms of this Contract on the site of the work to be performed thereunder, unless such coverage is included in the insurance specified in Paragraph (b) above.
- (e) Subcontractor's Insurance: The Contractor shall require Subcontractors, if any, not protected under the Contractor's insurance policies to take out and maintain insurance of the same nature and in the same amounts as required of the Contractor for Comprehensive Public Liability and Property Damage.

(f) Fire Insurance: The Contractor shall take out and maintain a fire, extended coverage, vandalism and malicious mischief insurance policy protecting the Contractor and the Owner up to the date of final acceptance of the completed work performed under this Contract, in an amount equal to the value of the work completed.

#### 29 - PROOF OF CARRYING INSURANCE

The Contractor shall furnish to the Owner satisfactory proof of carriage of the insurance required in a reliable company or companies before commencing any work. Such proof shall consist of certificates executed by the respective insurance companies and filed with the Owner. The Contractor shall also submit the original insurance policies for inspection and approval of the Owner before work is commenced. Said policies shall not thereafter be cancelled, permitted to expire, or be changed without notice of ten (10) days' in advance to the Owner and consented to by the Owner.

If the Contractor does not furnish evidence of insurance coverage required for fire, extended coverage, vandalism and malicious mischief insurance as required under Paragraph 28 (f) above, he shall be deemed to be self-insured for these insurance requirements.

#### 30 - CONTRACT SECURITY

The Contractor shall furnish a Surety Bond, or Bonds (form attached) in an amount at least equal to 100 percent (100%) of the contract price as security for the faithful performance of this Contract. The Performance Bond must contain a separate binding provision that the Surety will guarantee the payment of all persons performing labor and furnishing materials in connection with this Contract.

# 31 - DAMAGE CLAIMS TO BE PAID BY CONTRACTOR - OWNER TO BE HELD HARMLESS

The Contractor in the performance of this Contract, shall put up and maintain barriers and lights as will effectively prevent the happening of any accident in consequence of any depressions, holes or the accumulation of any obstruction or hazards of any nature whatsoever made or suffered upon the premises, public sidewalks, highways, or areas within the immediate vicinity of said construction; and shall hold the Owner safe and harmless for the happening of any accident claimed or alleged to be the result of any negligence which is the proximate result of the doing or performing any work or service in connection with the immediate vicinity; and Contractor and his Surety or liability carrier will assume such liabilities and will pay on demand any and all damage or damages occasioned as herein specified.

The Contractor shall well and truly save and indemnify and keep harmless the Owner against all liability, judgments, costs and expenses which may in any way come against the Owner in consequence of the granting of this Contract to said Contractor, or which may in any way result from the carelessness or neglect of the said Contractor, or the agents, employees, or workmen of said Contractor in any respect whatsoever.

#### 32 - CLAIMS AND PAYMENT FOR LABOR, MATERIAL OR WORK

The Contractor shall save the Owner harmless from all claims or demands of any Subcontractor employed by the Contractor or from any claims or demands of any person, firm or corporation furnishing any material, apparatus, fixtures, services, machinery or labor to the Contractor herein for the doing of the work referred to herein, and it is expressly understood and agreed that the liability of whatsoever kind or nature, including those referred to and established by Sec. 779.16 and 289.53 of the Wisconsin Statutes of 1955 and acts supplementary thereto.

Further, the Contractor shall pay all claims for work and labor performed and materials furnished in or about the work herein referred to, and Surety shall undertake that the Contractor will pay all claims for work or labor performed and materials furnished, and that the said Contractor shall pay to each and every person or party entitled thereto all claims for work or labor performed and materials furnished for on, in, or about said building or under this Contract.

#### 33 - DEFENSE OF CLAIMS OR SUITS BY REASON OF PATENT INFRINGEMENT

The Contractor shall pay for all royalties and patents for any patented product used by him or incorporated in the work, and shall defend all claims or suits for infringement of any patent right brought against himself or the Owner, and shall save the Owner harmless from loss on account thereof; the Contractor shall indemnify and save harmless the Owner and its officers and agents from all damages, judgments, claims and expenses arising from the infringement of any letters patent, or patent right, or because of any royalty, fee or license for the use, arrangement or operation of any tools, machinery, appliances, devices, or materials which may be used by the Contractor or furnished by him in fulfillment of the requirements of this Contract. In the event of any claim or action at law on account of such patents or fees, it is agreed that the Owner may retain out of the monies which are or which may become due the Contractor under this Contract, a sum of money sufficient to protect itself against loss, and to retain the same until said claims are paid or satisfactorily adjusted.

#### 34 - PERMITS, SURVEYS AND COMPLIANCE WITH LAWS

The Contractor shall procure and pay for all permits, licenses, and bonds necessary for the prosecution of the work and/or required by Municipal, State and Federal Regulations and Laws, unless specifically provided otherwise in the Special Provisions of the Contract, and/or in the Contract Specifications.

The Contractor shall give all notices, pay all fees, and comply with all Federal, State and Municipal Laws, Ordinances, Rules and Regulations, and Building and Construction Codes bearing on the conduct of the work. This contract, as to all matters not particularly referred to and defined therein, shall notwithstanding be subject to the provisions of all pertinent ordinances of the Municipality within whose limits the work is constructed which ordinances are hereby made a part hereof with the same force and effect as if specifically set out herein.

#### 35 - ACCIDENT PREVENTION

Precautions shall be exercised at all times for the protection of persons (including employees) and property. The safety provisions of applicable laws, building and construction codes shall be observed. Machinery equipment and all hazards shall be guarded (or hazards eliminated) in accordance with the safety provisions of the manual of Accident Prevention in Construction, published by the Associated General Contractors of America, to the extent that such provisions are not in contravention of applicable law.

The Contractor shall put up and maintain such barriers and supply such watchmen as will effectively prevent accidents and, in addition, during night hours he shall put up and maintain sufficient lights and flares to warn and safeguard the public against accidents. The Contractor in executing the work on this project shall not unnecessarily impede or interfere with traffic on public highways or streets, and the Owner is to be the sole judge as to what constitutes unnecessary interference with traffic, or as to what constitutes a hazard in traffic. The Contractor shall confer with him and keep local Police and Fire Departments fully informed as to streets or alleys which are to be closed to traffic for construction purposes.

### 36 - SANITARY CONVENIENCE

The Contractor shall provide and maintain on the construction work at all times suitable sanitary facilities for use of those employed on this contract without committing any public nuisance. Pit type toilets shall be of proper design and fly-tight. All toilet facilities shall be subject to approval of local and state departments of health.

# 37 - NOTICE TO START WORK

The Contractor shall notify the Engineer in writing forty-eight (48) hours before starting work at the site of this Contract of his intention to do so. In case of a temporary suspension of work, he shall give a similar notice before resuming work.

### 38 - WORK IN BAD WEATHER

No construction work shall be done during stormy, freezing or inclement weather, except as can be done satisfactorily and in a manner to secure first class construction throughout, and then only subject to permission of the Owner.

### 39 - MEASUREMENT OF WORK

Unit Price Basis: If any or all of the work to be performed under this contract is on a unit price basis, the actual number of units of each unit price item of work actually performed may be more or less than the number stated in the Bidding Schedule of the Proposal, or included in the Contract, but no variation in the contract unit price will be made on that account. Payment will be made only for the actual number of units incorporated in the work, or for the actual number of units of work performed, and at the contract unit price for each such unit.

# 40 - <u>OWNER'S RIGHT TO WITHHOLD CERTAIN AMOUNTS AND MAKE</u> APPLICATION

The Owner may withhold from payments to the Contractor, in addition to retained percentage, such an amount or amounts as may be necessary to cover:

- (a) Payments that may be earned or due for just claims for labor or materials furnished in and about the work.
- (b) For defective work not remedied.
- (c) For failure of the contractor to make proper payments to the Subcontractors.

- (d) Reasonable doubt that this Contract can be completed for the balance then unpaid.
- (e) Evidence of damage to another Contractor.
- (f) Liquidated damages due to failure to meet contract completion dates.

The Owner will disburse and shall have the right to act as agent for the Contractor in disbursing such funds as have been withheld pursuant to this paragraph to the part or parties who are entitled to payment therefrom. The Owner will render to the Contractor a proper accounting of all such funds disbursed in behalf of the Contractor.

The Owner also reserves the right, even after full completion and acceptance of the work, to refuse payment of the final ten percent (10%) due the Contractor until it is satisfied that all Subcontractors, material suppliers and employees of the Contractor have been paid in full.

### 41 - CHANGES - PAYMENT

The Owner may authorize changes in the work to be performed or the materials to be furnished under the provisions of this Contract.

Adjustment, if any, in the amounts to be paid to the Contractor by reason of any such changes shall be determined by one or more of the following methods:

- (a) By unit prices contained in the Contractor's original bid and incorporated in his construction contract.
- (b) By a supplemental schedule of prices contained in the Contractor's original bid and incorporated in this construction contract.
- (c) By an acceptable lump sum or unit price proposal by the Contractor.
- (d) On a cost-plus limited basis not to exceed a specified limit (defined as the cost of labor, materials and insurance) plus a specified percentage of the cost of such labor, materials and insurance provided the specified percentage does not exceed fifteen percent (15%) of the aggregate of the cost of such labor, materials and insurance, and shall in no event exceed a specified limit.

No claim for an addition to the contract price will be valid unless authorized as aforesaid.

In cases where a lump sum proposal is submitted by the Contractor in excess of Five Hundred Dollars (\$500.00) and the Owner considers the proposal so submitted is excessive or unreasonable for the changes or added work contemplated, the Owner reserves the right to request a proposal for the same changed items from other Contractors. If a proposal for such added work is obtained from other Contractors at a lesser amount, the Owner reserves the right to make an award of such work to another Contractor, unless the Contractor on this Contract agrees to do the added work or changed work for the price named by the other Contractor.

It shall be expressly understood and hereby agreed to by the Contractor that no claim for extra work will be recognized by the Owner unless same has been ordered, in writing, by the Owner, or unless claim for such added work has been filed by the Contractor within five (5) days after the end of the calendar month in which such alleged work was performed. Inspectors and Resident

Engineers are not authorized to act for the Owner in giving orders for the Owner for extra or additional work, either in writing or verbally.

### 42 - DEDUCTION FOR UNCORRECTED WORK

If the Owner deems it expedient to accept work damaged or not done in accordance with the Contract, an equitable adjustment will be made with a proper deduction from the contract price for unsatisfactory work.

### 43 - FINAL ACCEPTANCE OF THE WORK

The Contract shall be deemed as having been finally accepted by the Owner when its governing body, by formal resolution, accepts the work.

### 44 - CORRECTION OF WORK AFTER FINAL PAYMENT

Neither the final payment on this Contract by the Owner nor any provision in these Contract Documents shall relieve the Contractor or Surety of the responsibility for negligence in the furnishing and installation of faulty materials or for faulty workmanship which shows up within the extent of the period provided by law nor of the responsibility of remedying such faulty workmanship and materials.

### 45 - OWNER'S RIGHT TO USE UNCOMPLETED WORK

The Owner shall have the right to take possession of and use portions of the work prior to final acceptance without waiving rights against the Contractor or his Surety for defects in the work or failure to complete same in its entirety.

### 46 - PAYMENTS

Pay estimate periods shall close on the last day of each calendar month so that completed estimates can be computed for processing. On each partial payment during the progress of the project, the Owner will retain an amount in accordance with Chapter 66.29 Wisconsin Statutes. The value of work installed will be computed by deducting the estimated cost of street surfacing and site restoration work on those portions of the work installed from the unit bid price extensions for the various items of work. No payment will be made for material stored at the job site.

### 47 - SITE RESTORATION

The Contractor shall restore the entire site and adjacent properties to the same condition it was prior to the start of work by the Contractor. All items including but not limited to alleys, parking lots, gravel shoulders, driveways, water pipes and laterals, storm sewers, retaining walls, fences, ditches, stone rip-rap, sanitary sewers and laterals, gas mains, culverts, utility poles, signs, mail boxes, walks, sod, shrubs, trees, asphalt walks, etc., shall be protected by the Contractor, and such items as the Contractor finds it impossible to protect from damage or removal shall be replaced in kind by the Contractor.

# 48 - DELAYS

If the work of the Contractor is delayed because of any acts or omissions of any other Contractor, the Contractor shall have no claim against the Owner on that account other than an extension of time.

In case any action in court is brought against the Owner or Engineer, or any officer or agent of either of them, for the failure, omission or neglect of the Contractor, utility company or owner of other facilities within the project area to perform any of the covenants, acts, matters or things by this Contract undertaken, or for injury or damage caused by the alleged negligence of the Contractor or his subcontractors or his or their agents, or in connection with any claim based on lawful demands of subcontractors, workmen, material men, or suppliers, the Contractor shall indemnify and save harmless the Owner and Engineer and their officers or agents, from all losses, damages, costs, expenses, judgments or decrees arising out of such action.

#### PROJECT SPECIFICATIONS

#### 1. General.

Perform the work under this construction contract for Kenosha County project RD 16-003, CTH S, Amazon West Driveway to CTH H in Kenosha County, Wisconsin as the plans show and execute the work as specified in the State of Wisconsin, Department of Transportation (WisDOT) Standard Specifications for Highway and Structure Construction, 2020 Edition, as published by WisDOT, and these special provisions.

### 2. Scope of Work.

The work under this contract shall consist of excavation common, base aggregate dense, concrete curb and gutter, asphalt paving, storm sewer, pavement marking, permanent signing, traffic control, a bridge structure, erosion control, restoration, and all incidental items necessary to complete the work as shown on the plans and included in the proposal and contract.

### 3. Prosecution and Progress.

Begin work within ten calendar days after the engineer issues a written notice to do so.

Provide the start date to the engineer in writing within a month after executing the contract but at least 14 calendar days before the preconstruction conference. Upon approval, the engineer will issue the notice to proceed within ten calendar days before the approved start date.

To revise the start date, submit a written request to the engineer at least two weeks before the intended start date. The engineer will approve or deny that request based on the conditions cited in the request and its effect on the owner's scheduled resources.

When, in the fall of 2020, after the new westbound travel lanes are substantially completed and as approved by the engineer to allow for opening the new CTH S westbound roadway to westbound traffic, and weather conditions or seasonal restrictions preclude the satisfactory performance of further work under this contract, the engineer will, in writing, suspend operations until the spring of 2021. Resume construction operations in the spring of 2021 within ten days after the date on which a written order to do so has been issued by the engineer. The contractor may be allowed to continue work through the winter only with prior approval in writing from Kenosha County and the engineer. Any request made to continue work through the winter must include provisions for ongoing erosion control, maintaining traffic, emergency vehicle access, and Kenosha County maintenance operations (predominantly snow plows).

### **Utility Relocation Schedule**

Utility relocation work is anticipated to be completed in August 2020. Schedule road construction operations to account for utility relocation work occurring simultaneously with road construction. Contact each individual utility company to determine the current status of relocation work and their anticipated completion schedule. Refer to the Utilities section of these specifications for more information.

### **Demolition Schedule**

Demolition of the existing buildings by others on parcel #15 & #16 (9300 and 9220 38<sup>th</sup> Street) as shown in the Plat section (plat #RD16-003) of the plans is anticipated to be complete in August 2020. Do not encroach onto or construct any improvements across these parcels prior to verification from Kenosha County that the buildings have been completely demolished.

### Fish Spawning

There shall be no instream disturbance of Kilbourn Road Ditch as a result of construction activity under or for this contract, from March 15 to June 1 both dates inclusive, in order to avoid adverse impacts upon the spawning of fish species.

Any change to this limitation will require submitting a written request by the contractor to the engineer, subsequent review and concurrence by the Department of Natural Resources (DNR) in the request, and

final approval by the engineer. The approval will include all conditions to the request as mutually agreed upon by Kenosha County and DNR.

# Northern Long-eared Bat (Myotis septentrionalis)

Northern Long-eared Bats (NLEB) have the potential to inhabit the project limits because they roost in trees. Roosts may not have been observed on this project, but conditions to support the species exist. The species and all active roosts are protected by the Federal Endangered Species Act. If an individual bat or active roost is encountered during construction operations, stop work and notify the engineer.

In accordance to the final 4(d) rule issued for the NLEB, the DNR has determined that the proposed activity may affect, but will not result in prohibited take of the NLEB. The activity involves tree removal, but will not occur within 0.25 miles of a known hibernacula, nor will the activity remove a known maternity roost tree or any other tree within 150 feet of a known maternity roost tree.

If additional trees need to be removed, no clearing shall occur without prior approval from the engineer, following coordination with the WDNR. Additional tree removal beyond the area originally specified will require consultation with the United States Fish and Wildlife Service (USFWS) and may require a bat presence/absence survey. Notify the engineer if additional clearing cannot be avoided to begin coordination with the WisDOT REC. The WisDOT REC will initiate consultation with the USFWS and determine if a survey is necessary.

Submit a schedule and description of clearing operations with the ECIP 14 days prior to any clearing operations. The DNR will determine, based on schedule and scope of work, what additional erosion control measures shall be implemented prior to the start of clearing operations, and list those additional measures in the ECIP.

#### 4. Traffic.

Complete all work in accordance with the requirements of section 643 of the standard specifications, as detailed in the traffic control plans, and as herein described. All variations from the traffic control plans shall be approved in writing at least 48 hours prior to any traffic control change. Notify the engineer at least 48 hours prior to any traffic control changes.

Maintain emergency access at all times along CTH S and all side roads throughout the project. Maintain access to all properties within the project limits at all times. Methods and materials utilized to maintain access to properties are incidental to the project.

No operations shall proceed until all traffic control devices for such work are in the proper location.

Close CTH S to through traffic from the beginning of the project to the west side of 38<sup>th</sup> Street. Detour CTH S traffic as shown on the plans.

Construct CTH S from 38<sup>th</sup> Street (including the 38<sup>th</sup> Street intersection) to the end of the project in stages as described below. Keep CTH S, from 38<sup>th</sup> Street to the end of the project, open to one lane of traffic in each direction at all times, except for one 24-hour period sometime between 7:00 PM Friday and 6:00 AM Monday, to construct Stage 2A to reopen the CTH S intersection with 38<sup>th</sup> Street to one lane of traffic in each direction.

The adjacent WisDOT sponsored project (ID 3210-00-75, CTH S from CTH H to Brumback Boulevard) will install a temporary median cross-over just beyond this east project limits (Sta. 113+00'WB' to Sta. 116+00'WB') no later than August 29, 2020 to accommodate a switch in traffic pattern for Stage 2 construction.

# Stage 1 - 38th Street to End Project

Maintain one lane of CTH S traffic in each direction on the existing roadway. Construct the north half of the finished roadway (the westbound roadway), including lane and shoulder final HMA pavement surface, shoulders, curb and gutter, storm sewer, shared-use path, and other incidental items.

Maintain traffic on the existing 96<sup>th</sup> Avenue roadway and construct the new 38<sup>th</sup> Street roadway from CTH S up to the existing 96<sup>th</sup> Avenue roadway. Do not close 96<sup>th</sup> Avenue (Stage 1B) until the new 38<sup>th</sup> Street connection to 96<sup>th</sup> Avenue is complete and open to traffic.

Coordinate traffic control switches with the adjacent WisDOT project ID 3210-00-75. Work performed west of Sta. 113+00'WB' is included under this contract.

# Stage 2 – 38th Street to End Project

Shift both directions of CTH S traffic onto the new westbound lanes constructed under Stage 1 construction. Close the existing CTH S roadway to through traffic to construct the new eastbound finished roadway, including lane and shoulder final HMA pavement surface, shoulders, curb and gutter, storm sewer, and other incidental items.

Do not shift traffic until the crossover constructed under project ID 3210-00-75 is in place, which is required under that contract by August 29, 2020. Coordinate traffic control switches with the adjacent WisDOT project ID 3210-00-75.

# Winter Shutdown - Entire Project Length

Maintain traffic along the entire project length during winter shutdown. Remove detour signs or cover detour signs during the winter shutdown. Covering or removal and reinstallation of detour signs is incidental to the contract.

Methods for opening the roadway to traffic will depend on the amount of work completed in 2020 during Stage 1:

Option 1 – Westbound roadway completed in 2020. Eastbound roadway east of 38<sup>th</sup> Street and other select locations as needed completed in 2020

Close the north lane of the existing CTH S roadway and close the south lane of the newly constructed CTH S westbound lanes to traffic. Maintain one lane of westbound traffic on the north lane of the newly constructed CTH S westbound lanes. Maintain one lane of eastbound traffic on the south lane of the existing CTH S roadway. Maintain traffic access across the median openings on temporary pavement. Maintain all traffic control devices and appurtenances during the winter shutdown in accordance with section 643 of the standard specifications. Maintenance of traffic control during the winter shutdown is incidental to the Traffic Control item.

Option 2 – Westbound roadway completed in 2020. No portion of eastbound roadway completed in 2020

Close the existing CTH S roadway and maintain two directions of traffic on the newly constructed CTH S westbound lanes for the entire length of the project. Coordinate traffic control at the east end of the project with the adjacent WisDOT project ID 3210-00-75 to utilize the cross-over constructed under that contract. Utilize the existing concrete pavement left in place in front of the Amazon Sortation facility near the west end of the project as a cross-over.

### Stage 3

Close the inside lanes of traffic in both the eastbound and westbound directions and maintain one lane of traffic in each direction on the outside lanes of each of the eastbound and westbound roadways. Construct the remaining median curb and gutter, storm sewer, and other incidental items necessary to complete the project.

# Night Work - Entire Project

Night work is allowed during non-peak hours from 7:00 PM until 6:00 AM Sunday evening through Friday morning with prior written authorization from the engineer. Close CTH S to through traffic during night work to construct culvert pipe and storm sewer pipes crossing the existing roadway. Place portable changeable message signs at least 3 days prior to the night closure. Maintain emergency vehicle access through the entire construction zone during night work at all times. Do not close CTH S for night work more than 2 consecutive nights or for more than 5 nights in total under this contract.

# Wisconsin Lane Closure System Advance Notification

Provide the following advance notification to the engineer for incorporation into the Wisconsin Lane Closure System (LCS).

TABLE 108-1 CLOSURE TYPE AND REQUIRED MINIMUM ADVANCE NOTIFICATION

Closure type with height, weight, or width restrictions (available width, all lanes in one direction < 16')	MINIMUM NOTIFICATION
Lane and shoulder closures	7 calendar days
Full roadway closures	7 calendar days
Ramp closures	7 calendar days
Detours	7 calendar days
Closure type without height, weight, or width restrictions (available width, all lanes in one direction ≥16')	MINIMUM NOTIFICATION
Lane and shoulder closures	3 business days
Ramp closures	3 business days
Modifying all closure types	3 business days

Discuss LCS completion dates and provide changes in the schedule to the engineer at weekly project meetings in order to manage closures nearing their completion date.

# 5. Holiday Work Restrictions.

Do not perform work on, nor haul materials of any kind along or across any portion of the highway carrying CTH S traffic, and entirely clear the traveled way and shoulders of such portions of the highway of equipment, barricades, signs, lights, and any other material that might impede the free flow of traffic during the following holiday periods:

- From noon Friday, May 22, 2020 to 6:00 AM Tuesday, May 26, 2020; Memorial Day;
- From noon Friday, July 3, 2020 to 6:00 AM Monday, July 6, 2020; Independence Day;
- From noon Friday, September 4, 2020 to 6:00 AM Tuesday, September 8, 2020; Labor Day.
- From noon Wednesday, November 25, 2020 to 6:00 AM Monday, November 30, 2020; Thanksgiving.
- From noon Friday, May 28, 2021 to 6:00 AM Tuesday, June 1, 2021; Memorial Day;
- From noon Friday, July 2, 2021 to 6:00 AM Tuesday, July 6, 2021; Independence Day;
- From noon Friday, September 3, 2021 to 6:00 AM Tuesday, September 7, 2021; Labor Day.

# 6. Utilities.

This contract does not come under the provision of Administrative Rule Trans 220.

There are known underground and overhead utility facilities located within the project limits. There are known utility adjustments required for this project. Coordinate construction activities with a call to Digger's Hotline or a direct call to the utilities that have facilities in the area as required per statues. Use caution to insure the integrity of underground and overhead facilities.

The following utilities have facilities within the project. Anticipated utility relocation work has begun and may be occurring simultaneously with the start of road construction operations. Contact each utility company listed in the plans prior to bidding to obtain confirmation on the status of utility relocation work within the project limits.

**AT&T Wisconsin** has underground and aerial fiber optic and copper cable throughout the project. Conflicts are currently being relocated are anticipated to be completed by July 31, 2020. Utility relocations may be occurring simultaneously with road construction operations.

**Kenosha Water Utility** has water and sanitary sewer lines south of CTH S and west of CTH H, which are outside the proposed project limits. Relocations are not anticipated.

**Private Water System – 96th Avenue Residents** own a private well water system that has water mains running north and south along both the east and west sides of 96th Avenue. No relocations are anticipated; however, these will not be marked by Digger's Hotline or the local community. Contact Bill Rock at 262-358-5575 or rockhouse4@yahoo.com to have these lines located.

**Spectrum** has underground and aerial facilities throughout the project. Conflicts are currently being relocated and are anticipated to be completed by July 31, 2020. Utility relocations may be occurring simultaneously with road construction operations.

**WE Energies (Electric)** has underground and aerial facilities throughout the project. Conflicts are currently being relocated and are anticipated to be completed by July 31, 2020. Utility relocations may be occurring simultaneously with road construction operations. We Energies will install permanent street lighting at the CTH S intersection with 120th Avenue, 100th Avenue, and 38th Street only upon completion of the intersection. Notify WE Energies upon completion of road work at these side roads.

**WE Energies (Gas)** has underground facilities throughout the project that are anticipated to be in conflict with road construction. The majority of relocation work is planned to be completed prior to construction. As part of WE Energies' relocations, temporary gas main was installed around the homes waiting to be demolished near Sta. 10425'WB' LT and Sta. 105+25'WB' LT. WE Energies will relocate and discontinue in place this temporary gas main after these two houses have been demolished.

Coordinate construction activities with a call to Diggers Hotline or a direct call to the utilities for the underground facilities in the area, as required per state statutes. Use caution to maintain the integrity of utilities. Coordinate with the engineer to adjust plans as needed to avoid any unanticipated utility conflicts.

### 7. Other Contracts.

Coordinate work in accordance to section 105.5 of the standard specifications.

Modifications to the traffic control plan may be required by the engineer to coordinate work undertaken by others. The following contracts are anticipated to be under construction within the time period of the contract, unless otherwise indicated:

# **Wisconsin Department of Transportation Project:**

ID 3210-00-75: CTH S Reconstruction/Expansion, CTH H to Brumback Boulevard, – Spring 2020 through 2021 construction season.

# 8. Information to Bidders, U.S. Army Corps of Engineers Section 404 Permit.

Kenosha County has applied for a U.S. Army Corps of Engineers Section 404 permit. Comply with the requirements of the permit in addition to requirements of the special provisions. A copy of the permit will be available from the Kenosha County Department of Public Works, Highway Division by contacting Clement Abongwa, Highway Commissioner, at 262-653-1870 or Clement.Abongwa@kenoshacounty.org.

# 9. Environmental Protection, Aquatic Exotic Species Control.

Exotic invasive organisms such as VHS, zebra mussels, purple loosestrife, and Eurasian water milfoil are becoming more prolific in Wisconsin and pose adverse effects to waters of the state. Wisconsin State Statutes 30.07, "Transportation of Aquatic Plants and Animals; Placement of Objects in Navigable Waters", details the state law that requires the removal of aquatic plants and zebra mussels each time equipment is put into state waters.

At construction sites that involve navigable water or wetlands, use the follow cleaning procedures to minimize the chance of exotic invasive species infestation. Use these procedures for all equipment that comes in contact with waters of the state and/or infested water or potentially infested water in other states.

Ensure that all equipment that has been in contact with waters of the state, or with infested or potentially infested waters, has been decontaminated for aquatic plant materials and zebra mussels before being used in other waters of the state. Before using equipment on this project, thoroughly disinfect all

equipment that has come into contact with potentially infested waters. Guidelines from the Wisconsin Department of Natural Resources for disinfection are available at:

### http://dnr.wi.gov/topic/invasives/disinfection.html

Use the following inspection and removal procedures:

- 1. Before leaving the contaminated site, wash machinery and ensure that the machinery is free of all soil and other substances that could possibly contain exotic invasive species;
- 2. Drain all water from boats, trailers, bilges, live wells, coolers, bait buckets, engine compartments, and any other area where water may be trapped:
- 3. Inspect boat hulls, propellers, trailers and other surfaces. Scrape off any attached mussels, remove any aquatic plant materials (fragments, stems, leaves, seeds, or roots), and dispose of removed mussels and plant materials in a garbage can before leaving the area or invested waters; and
- 4. Disinfect your boat, equipment and gear by either:
  - 4.1. Washing with ~212 F water (steam clean), or
  - 4.2. Drying thoroughly for five days after cleaning with soap and water and/or high pressure water, or
  - 4.3. Disinfecting with either 200 ppm (0.5 oz per gallon or 1 Tablespoon per gallon) Chlorine for 10-minute contact time or 1:100 solution (38 grams per gallon) of Virkon Aquatic for 20- to 30-minute contact time. Note: Virkon is not registered to kill zebra mussel veligers nor invertebrates like spiny water flea. Therefore this disinfect should be used in conjunction with a hot water (>104° F) application.

Complete the inspection and removal procedure before equipment is brought to the project site and before the equipment leaves the project site.

stp-107-055 (20130615)

# 10. Information to Bidders, Storm Water General Construction Discharge Permit.

Kenosha County has applied for coverage through the Wisconsin Department of Natural Resources to discharge storm water associated with land disturbing construction activities of this contract under the Storm Water Notice of Intent (Reference No. WI-S067831-5). For status of permit coverage, contact Craig Webster, Wisconsin Department of Natural Resources Transportation Liaison at 262-574-2141 or craig.webster@wiconsin.gov. Post the permit in a conspicuous place at the construction site. Submit a Notice of Termination to the DNR within 45 days after the construction site has undergone final stabilization (uniform perennial vegetative cover has been established with a density of at least 70% over areas requiring permanent stabilization measures), temporary erosion control measures have been removed, and all land disturbing construction activities that required coverage under this permit have ceased.

### 11. Construction Over or Adjacent to Navigable Waters.

The Kilbourn Road Ditch is classified as a state navigable waterway under standard spec 107.19.

The stormwater conveyance channel that crosses existing CTH S near Sta. 95+25 is classified as a state navigable waterway under standard spec 107.19.

stp-107-060 (20171130)

### 12. Erosion Control.

The contractor shall prepare and submit an erosion control implementation plan (ECIP) for the project including borrow sites, material disposal sites, dust control, and dewatering according to Chapter TRANS 401 requirements. The ECIP shall supplement information shown on the plans and shall not reproduce it. The ECIP shall identify how the contractor intends to implement the project's erosion control plan, including measures to accommodate the Winter Shutdown as shown on the plans and for erosion control maintenance during the Winter Shutdown. A staged ECIP may be required for this project as new areas of the project are disturbed. ECIP amendments shall be needed prior to the Winter Shutdown and spring startup. A 14-day review period shall be allowed for each ECIP amendment. Provide the approved ECIP amendment to the engineer prior to winter shutdown and spring startup.

Provide the ECIP fourteen (14) calendar days prior to the pre-construction conference. Provide one (1) copy of the ECIP to Kenosha County and one (1) copy of the ECIP to the WDNR Liaison (Craig Webster, 262-574-2141 or craig.webster@wi.gov). Pursue operations in a timely and diligent manner, continuing all construction operations methodically from the initial removals and topsoil stripping operations through the subsequent grading, paving, and re-topsoiling to minimize the period of exposure to possible erosion. Do not implement the ECIP until it has been approved by the DNR and Kenosha County.

Complete final restoration in the following phases (at a minimum) as construction progresses, including sub-stages as shown on the traffic control plans:

Work Phase	Location
96th Avenue Connector	Sta. 611+00 to Sta. 615+50
96 <sup>th</sup> Avenue Cul-de-sac	
100 <sup>th</sup> Avenue	Sta. 501+00 to Sta. 503+50
102 <sup>nd</sup> Avenue	Sta. 401+00 to Sta. 403+50
Stage 1 - WB CTH S	Sta. 27+25 to Sta. 41+50
	Sta. 41+50 to Sta. 54+00
	Sta. 54+00 to Sta. 65+55
	Sta. 65+55 to Sta. 78+00
	Sta. 78+00 to Sta. 87+00
	Sta. 87+00 to Sta. 96+25
	Sta. 96+25 to Sta. 113+00
Stage 2 - EB CTH S	Sta. 27+25 to Sta. 41+50
	Sta. 41+50 to Sta. 54+00
	Sta. 54+00 to Sta. 65+55
	Sta. 65+55 to Sta. 78+00
	Sta. 78+00 to Sta. 87+00
	Sta. 87+00 to Sta. 96+25
	Sta. 96+25 to Sta. 113+00
Stage 3	CTH S Median

Final restoration or temporary stabilization shall be in place and approved by the engineer prior to advancing construction operations to the next stage.

The ECIP shall include temporary erosion control devices to be implemented prior to or in conjunction with clearing and grubbing operations. Temporary seed and mulch cleared and grubbed areas within 48 hours of disturbance. Perform clearing and grubbing in stages as shown in the plans.

Re-topsoil graded areas, as designated by the engineer, immediately after grading is completed within those areas. Seed, fertilize, and mulch/erosion mat top-soiled areas, as designated by the engineer, within five (5) calendar days after placement of topsoil. If graded areas are left exposed for more than seven (7) calendar days, seed those areas with temporary seed within 72-hours of disturbance.

Permanently protect or restore all disturbed stream banks, wetland areas, and all disturbed areas within 100-feet of navigable waterways as shown on the plans or implement temporary erosion control devices within 24-hours of disturbance.

When performing roadway cleaning operations, the contractor shall use equipment having vacuum or water spray mechanism to eliminate the dispersion of dust. If vacuum equipment is employed, it shall have suitable self-contained particulate collectors to prevent discharge from the collection bin into the atmosphere.

Stockpile excess material or spoils on upland areas away from wetlands, floodplains and waterways. Stockpiled soil shall be protected against erosion. Temporarily stabilize on-site stockpiles and windrowed material with temporary seed and mulch within 72 hours of creating the stockpile or windrow.

Do not pump water from the construction site to a storm water conveyance without the water first passing through a sediment trap or filter bag.

When engaging in roadway cleaning operations, use equipment having a vacuum mechanism to eliminate the dispersion of particulate matter into the atmosphere. Vacuum equipment must have suitable self-contained particulate collectors to prevent discharge from the collection bin into the atmosphere. Rotary or pick-up type sweeping equipment without vacuum capability shall not be used.

# 13. Maintaining Drainage.

Maintain drainage at and through worksite during construction conforming to standard specs 107.22, 204, 205 and 520.

Use existing storm sewers, existing culvert pipes, existing drainage channels, temporary culvert pipes, or temporary drainage channels to maintain existing surface and pipe drainage. Pumps may be required to drain the surface, pipe, and structure discharges during construction. Costs for furnishing, operating, and maintaining the pumps is considered incidental to the project.

Maintain stream flow along the stormwater conveyance channel that is considered a navigable waterway (see the Construction Over or Adjacent to Navigable Waters section of these special provisions) at all times during construction. Perform removal and construction of culvert pipes and storm sewer structures along this stormwater conveyance channel only during dry periods with no stormwater flow in the channel or pipes. Removal and construction of pipes within this navigable waterway may be allowed only if stormwater flow is by-passed around construction through temporary pipes, bypass pumping, or diversion channel as approved in the ECIP. Existing pipes that do not conflict with proposed pipe locations or other construction operations may be left in place to convey stormwater until finished pipes are complete, upon which time stormwater flow shall be directed to the finished pipes and the existing pipes removed.

Maintain drainage along the existing CTH S roadway during the winter shutdown to not allow water to back up into any open travel lane, which may require temporarily setting the proposed eastbound roadway median inlet/catch basin covers low enough to adequately accommodate drainage from the existing CTH S roadway. Do not construct the proposed eastbound median curb and gutter within 10-feet of either side of storm sewer structures that are set low to temporarily accommodate drainage during the winter shutdown. Construct temporary asphaltic curb to direct drainage towards the inlet/catch basin structures along the proposed CTH S eastbound median as necessary.

### Dewatering (Mechanical Pumping) for Bypass Water (sediment-free) Operations

If dewatering bypass operations are required from one pipe structure to another downstream pipe structure or from the upstream to downstream end of a culvert and the bypass flow is not transporting sediments (sand, silt, and clay particles) from a tributary work site area, bypass pumping operations will be allowed provided that the DNR has been made aware of and approves operation. When pumping bypass flows, the discharge location will need to be stable and not produce erosion from the discharge velocity that would cause release of sediment downstream.

#### Dewatering (Mechanical Pumping) for treatment Water (sediment-laden) Operations

If dewatering operations require pumping of water containing sediments (sand, silt, and clay particles), the discharge will not be allowed to leave the work site or discharge to a storm water conveyance system without sediment removal treatment. Refer to article Erosion Control in these special provisions for additional requirements.

# 14. Public Convenience and Safety.

Revise standard spec 107.8(6) as follows:

Check for and comply with local ordinances governing the hours of operation of construction equipment. Do not operate motorized construction equipment from 10:00 PM until the following 7:00 AM, unless prior written approval is obtained from the engineer.

stp-107-001 (20060512)

#### 15. Coordination with Businesses and Residents.

The contractor shall arrange and conduct a meeting between the contractor, the owner, affected residents, local officials and business people to discuss the project schedule of operations including vehicular and pedestrian access during construction operations. Hold the first meeting at least one week before the start of work under this contract and no further meetings will be required unless directed by the engineer. The contractor shall arrange for a suitable location for meetings that provides reasonable accommodation for public involvement. The owner will prepare and coordinate publication of the meeting notices and mailings for meetings. The contractor shall schedule meetings with at least 2 weeks prior notice to the engineer to allow for these notifications.

stp-108-060 (20141107)

#### 16. Notice to Contractor – Contaminated Soils.

Kenosha County excavated soil contaminated with hazardous materials from two locations along the CTH S corridor in 2020 during building demolitions in preparation for the CTH S Phase 2 project. The two locations were at the following properties:

- 1. Parcel #4 (plat ID RD16-003), 9930 Burlington Rd, approx. Sta. 78+75'WB' to Sta. 79+50'WB', LT
- Parcel #10 (plat ID RD16-003), 9720 Burlington Rd, approx. Sta. 88+00'EB' to Sta. 90+00'EB', RT

Removal of additional hazardous materials is not anticipated as part of this contract. If excavated soils suspect of containing hazardous materials are encountered during the project, stop work in that surrounding area and notify the engineer immediately. Kenosha County, along with their consultant, reserves the right to evaluate the necessity of further hazardous material removal.

# 17. Notice to Contractor – Subsurface Exploration.

Subsurface exploration boring logs completed along the project for the Geotechnical Engineer Services Report are available and can be obtained by contacting Clement Abongwa, Kenosha County Highway Commissioner, at 262-653-1870 or <a href="mailto:clement.abongwa@kenoshacounty.org">clement.abongwa@kenoshacounty.org</a>.

### 18. Notice to Contractor – Airport Operating Restrictions.

The Kenosha Regional Airport (ENW) is located immediately adjacent to the project site. File a Notice of Proposed Construction or Alteration (form 7460-1) with the Federal Aviation Administration (FAA) a minimum of 45 days prior to construction.

### https://oeaaa.faa.gov/oeaaa/external/portal.jsp

All construction equipment taller than 15 feet in height working adjacent to the airport must be marked with a 3' x 3' orange and white checkered flag and/or amber beacon.

For any objects/equipment taller than 50 feet in height, the Contractor shall coordinate with the City of Kenosha for any variances possibly needed due to construction equipment and/or operations potentially penetrating the local height limitation zoning ordinance.

The Contractor shall coordinate with the Wis Bureau of Aeronautics (Wendy Hottenstein, Airport Development Engineer – Project Manager, 608-261-6278, <a href="wendy.hottenstein@dot.wi.gov">wendy.hottenstein@dot.wi.gov</a>) and the Federal Aviation Administration for airspace review of any construction equipment or objects that penetrates a 100:1 slope from the nearest runway end as it may require the submittal of the FAA form 7460-1.

Any borrow sites and stormwater features within 5 miles of an airport that hold water for more than 48 hours after a storm event shall be coordinated with the Wis Bureau of Aeronautics to review for the potential of wildlife hazards to aircraft.

The Contractor shall not create any electrical or electronic interference with radio communications between air navigational or aviation communications. The Contractor shall not make it difficult for an

aircraft pilot to distinguish between airport lights of impair an aircraft pilot's visual perception to endanger the landing, taking off, or maneuvering of the aircraft.

# 19. QMP Base Aggregate Dense 1 1/4-Inch Compaction, Item 371.1000.S.

### **A** Description

- (1) This special provision describes modifying the compaction and density testing and documentation requirements of work done under the Base Aggregate Dense 1 1/4-Inch bid items. Conform to standard spec 305 as modified in this special provision and to the contract QMP Base Aggregate article.
- (2) Provide and maintain a quality management program. A quality management program is defined as all activities, including process control, inspection, sampling and testing, and necessary adjustments in the process related to construction of dense graded base which meets all the requirements of this provision.
- (3) Chapter 8 of the WisDOT construction and materials manual (CMM) provides additional detailed guidance for QMP work and describes sampling and testing procedures.

### http://wisconsindot.gov/rdwy/cmm/cm-08-00toc.pdf

- (4) This special provision applies to Base Aggregate Dense 1 1/4-Inch material placed: above at least 16 inches of subgrade improvement, 12 inches of subgrade improvement and geogrid or QMP subgrade provisions, between shoulder hinge points and lower than mainline pavement. Unless otherwise specified by the contract, all Base Aggregate Dense 1 1/4-Inch material placed on side roads, private and public entrances, individual ramps less than 1500 feet, passing lanes less than 1500 feet, tapers, turn lanes, and other undefined locations are exempt from the compaction and density requirement modifications and testing contained within this special provision.
  - B (Vacant)
  - **C** Construction

#### C.1 General

(1) The engineer shall approve the grade before placement of the base. Approval of the grade shall be in accordance with applicable provisions of the standard specifications.

Add the following to standard spec 305.3.2.2:

- (3) For 1 1/4-Inch dense graded base composed of ≤20% reclaimed asphaltic pavement (RAP) or crushed concrete (RCA), as determined by classification of material (aggregate or RAP and/or RCA) and percentage by weight of each material type retained on the No. 4 Sieve, the contractor must determine the material target density in accordance with:
  - Method 1: Maximum dry density in accordance with AASHTO T-180, Method D, with correction for coarse particles and modified to require determination of Bulk Specific Gravity (Gm) in accordance with AASHTO T 85. Bulk Specific Gravities determined in accordance with standard spec 106.3.4.2.2 for aggregate source approval may be utilized.
- (4) For 1 1/4-Inch dense graded base composed of >20% RAP or RCA, as determined by classification of material (aggregate or RAP and/or RCA) and percentage by weight of each material type retained on the No. 4 Sieve, the contractor may choose from the following options to determine the material target density:
  - Method 2: Maximum dry density as determined by AASHTO T-180, Method D, with correction for coarse particles, and modified to require determination of Bulk Specific Gravity (G<sub>m</sub>) in accordance with AASHTO T 85.
  - Method 3: Maximum wet density as determined by AASHTO T-180, Method D, modified to define *Maximum Density* as the wet density in pounds per cubic foot of soil at optimum moisture content using Method D specified compaction, with correction for coarse particles, and modified to require determination of Bulk Specific Gravity (G<sub>m</sub>) in accordance with AASHTO T 85.

- Method 4: Average of 10 random control strip wet density measurements as described in section C.2.5.1.
- (5) Compact the 1 1/4-Inch dense graded base to a minimum of 93.0% of the material target density for methods 1, 2 and 3. Compact 1 1/4-inch dense graded base to a minimum of 96% of the material target density for method 4. Ensure that adequate moisture is present during placement and compaction operations to prevent segregation and to help achieve compaction.
- (6) Base Aggregate Dense 1 1/4-Inch will be accepted for compaction on a lot basis.
- (7) Field density tests on materials using contractor elected target density methods 3 or 4 will not be considered for lot acceptance on the basis of compaction under the requirements of this provision until the moisture content of the in-place material is less than 2.0 percentage points above the maximum wet density optimum moisture or 2.0 percentage points of the average moisture content of the 10 density tests representing a control strip, respectively. Determine moisture content using AASHTO T255 as modified in CMM chapter 8 or a nuclear density gauge. If conducting AASHTO T255, sample materials after watering but before compaction.

# **C.2 Quality Management Program**

### C.2.1 Quality Control Plan

- (1) Submit a comprehensive written quality control plan to the engineer no later than 10 business days before placement of material. Do not place any dense graded base before the engineer reviews and accepts the plan. Construct the project as the plan provides.
- (2) Do not change the quality control plan without the engineer's review and acceptance. Update the plan with changes as they become effective. Provide a current copy of the plan to the engineer and post in the contractor's laboratory as changes are adopted. Ensure that the plan provides the following elements:
  - 1. An organizational chart with names, telephone numbers, current certifications and/or titles, and roles and responsibilities of QC personnel.
  - 2. The process used to disseminate QC information and corrective action efforts to the appropriate persons. Include a list of recipients, the communication process that will be used, and action time frames.
  - 3. A list of source locations, section and quarter descriptions, for all aggregate materials requiring QC testing.
  - 4. Descriptions of stockpiling and hauling methods.
  - 5. An outline for resolving a process control problem. Include responsible personnel, required documentation, and appropriate communication steps.
  - 6. Location of the QC laboratory, retained sample storage, and other documentation.
  - 7. Lot layout and random test location plan.
  - 8. A description of placement methods and operations. Including, but not limited to: staging, construction of an initial working platform, lift thicknesses, and equipment.

#### C.2.1 Pre-Placement Meeting

A minimum of two weeks before placement of Base Aggregate Dense 1 1/4-Inch material, hold a preplacement meeting at a mutually agreed upon time and location. Present the Quality Control Plan at the meeting. Attendance at the pre-placement meeting is mandatory for the project superintendent, quality control manager, project inspection and testing staff, all appropriate contractor personnel involved in the sampling, testing, and quality control including subcontractors, and the engineer or designated representatives.

### C.2.2 Personnel

- (1) Perform the quality control sampling, testing, and documentation required under this provision using technicians certified by WisDOT's Highway Technician Certification Program (HTCP). Have a HTCP Nuclear Density Technician I, or ACT certified technician, perform field density and field moisture content testing. Adhere to the minimum required certifications for aggregate testing per part 7 of the standard specification. AASHTO T180 proctor testing requires a minimum certification level of AGGTEC-1.
- (2) If an ACT is performing sampling or testing, a certified technician must coordinate and take responsibility for the work an ACT performs. Have a certified technician ensure that all sampling and testing is

performed correctly, analyze test results, and post resulting data. No more than one ACT can work under a single certified technician.

# C.2.3 Equipment

- (1) Furnish the necessary equipment and supplies for performing quality control testing. Ensure that all testing equipment conforms to the equipment specifications applicable to the required testing methods. The engineer may inspect the measuring and testing devices to confirm both calibration and condition. Calibrate all testing equipment according to the CMM and maintain a calibration record at the laboratory.
- (2) Furnish nuclear gauges from WisDOT's approved product list at:

http://wisconsindot.gov/Pages/doing-bus/eng-consultants/cnslt-rsrces/tools/appr-prod/default.aspx

- (3) Ensure that the nuclear gauge manufacturer or an approved calibration service calibrates the gauge the same calendar year it is used on the project. Retain a copy of the calibration certificate with the gauge.
- (4) For all target density methods, conform to AASHTO T310 and CMM 8-15 for wet density testing and gauge monitoring methods.
- (5) For the specified target density determined using method 1 in section C.1, compute the dry densities for the compacted dense graded base, composed of ≤20% RAP or RCA, according to AASHTO T310.
- (6) For contractor elected target density method 2 in section C.1, compute dry densities of dense graded base composed of >20% RAP or RCA using a moisture correction factor and the nuclear wet density value. Determine the moisture correction value, for each Proctor produced under the requirements of C.2.5, using the moisture bias as shown in CMM 8.15.12.1 and 8.15.12.2, except the one-point Proctor tests of the 5 random tests is not required. Conduct a moisture bias test for every 7500 feet of Base Aggregate Dense 1 1/4-Inch placed. Determine natural moistures in the laboratory.
- (7) Perform nuclear gauge measurements using gamma radiation in the backscatter or direct transmission position. Backscatter may be used only if the material being tested cannot reliably maintain an undistorted direct transmission test hole. Direct transmission tests must be performed at the greatest possible probe depth of 2 inches, 4 inches, or 6 inches, but not to exceed the depth of the compacted layer being tested. Perform each test for at least one minute of nuclear gauge count time.

### C.2.5 Contractor Testing

- (1) Perform compaction testing on the mainline dense graded base material, as defined by A.(4). Perform the quality control sampling, testing, and documentation required under this provision using HTCP certified technicians as required in C.2.3. Conform to CMM 8-15 for testing and gauge monitoring methods.
- (2) Select test sites randomly using ASTM Method D3665. Random numbers may be determined using an electronic random number generator. Guidance for determining test locations can be found in section 8-30.9 of the Construction and Materials Manual (CMM). Test locations must be kept a minimum of 3 feet from the unsupported edge of dense graded base layers.
- When a density target is determined in accordance methods 3 or 4 in section C.1, conduct density testing on same date of final compaction.

# C.2.5.1 Contractor Required Quality Control (QC) Testing

- (1) Conduct testing at a minimum frequency of one test per lot. A lot is 1500 feet for each layer with a maximum width of 18 feet and minimum lift thickness of 2" of Base Aggregate Dense 1 1/4-Inch material placed. Layer widths exceeding 18 feet are divided into equal lots. Each lot of compacted Base Aggregate Dense 1 1/4-Inch material, as defined by A.(4), will be accepted when the lot field density meets the required minimum density. Lots that don't achieve density requirements must be addressed and approved in accordance with C.2.7.
- (2) Add separate lots for passing lanes and individual ramps greater than 1500 feet.
- (3) Combine partial lots less than 750 feet with the previous lot. Partial lots greater than or equal to 750 feet are standalone lots.

(4) Notify the engineer, if a lot field density test falls below the required minimum value. Document and perform corrective actions in accordance with C.2.7. Deliver documentation of all compaction testing results to the engineer at the time of testing.

### C.2.5.1.1 Target Density Determination

# C.2.4.1.1.1 Maximum Wet and/or Dry Density Methods

- (1) For contractor elected target density methods 2 and 3 in section C.1, and contractually specified target density method 1 in section C.1; perform one gradation and 5-point Proctor test before placement of 1 1/4-Inch dense graded base. Perform additional gradations every 3000 tons in accordance with standard spec 305 and 730. If sampling requirements are identical, samples/testing performed for the QMP Base Aggregate specification may be used to fulfill the gradation testing requirements of this specification.
- (2) Perform additional 5-point Proctor tests, at a minimum, when:
  - The four point moving average gradation on any one sieve differs from the original gradation test result for that sieve, by more than 10 percentage points. The original gradation test is defined as the gradation of the material used to create a 5-point Proctor. Each 5-point Proctor test will remain valid for any material with gradation for all sieves within 10.0 percentage points of that Proctor's original gradation test.
  - 2. The source of base aggregate changes.
  - 3. Percent target density exceeds 103.0% on two consecutive density tests.
- (3) Provide Proctor test results to the engineer within two business days of sampling. Provide gradation test results to the engineer within one business day of sampling.
- (4) Split each contractor QC Proctor sample and identify it according to CMM 8-30. Deliver the split to the engineer within one business day for County QV Proctor testing.
- (5) Split each non-Proctor contractor QC sample and identify it according to CMM 8-30. Retain the split for 7 calendar days in a dry, protected location. If requested for County comparison testing, deliver the split to the engineer within one business day.

### C.2.5.1.1.2 Density Control Strip Method

- (1) For contractor elected target density method 4 in section C.1, construct a control strip for each layer of placement to identify the target wet density for the base aggregate dense material. The control strip construction and density testing will occur under the direct observation and/or assistance of the County QV personnel. For blended material, reprocessed material and crushed concrete, perform additional gradations every 3000 tons in accordance with standard spec 305 and 730. If sampling frequencies are identical, samples/testing performed for the QMP Base Aggregate specification may be used to fulfill the gradation testing requirements of this specification.
- (2) Unless the engineer approves otherwise, construct control strips to a minimum dimension of 300 feet long and one full lane width.
- (3) Completed control strips may remain in-place to be incorporated into the final roadway cross-section.
- (4) Construct additional control strips, at a minimum, when:
  - 1. The source of base aggregate changes.
  - 2. The four point moving average percentage of blended recycled materials, from classification of material retained on the No. 4 sieve in the original gradation test, differs by more than 10 percentage points. The original gradation test is defined as the gradation of the material used to construct the control strip.
  - 3. The layer thickness changes more than 2.0 inches.
  - 4. The percent target density exceeds 103.0% on two consecutive density measurements.
- (5) Construct control strips using equipment and methods representative of the operations to be used to place and compact the remaining 1 1/4–Inch Base Aggregate Dense material. Wet the base, as mutually agreed upon by the contractor and engineer, to obtain and/or maintain adequate moisture content to ensure proper compaction. Discontinue water placement if the base begins to exhibit signs of saturation or instability.

- (6) After compacting the control strip with a minimum of 2 passes, mark and take density measurements at 3 random locations. Subsequent density measurements will be taken at the same 3 locations. Test locations must be kept a minimum of 3 feet from the unsupported edge of dense graded base layers.
- (7) After each subsequent pass of compaction equipment over the entirety of the control strip, take wet density measurements at the 3 marked locations. Continue compacting and testing until the increase in wet density measurements are less than 2.0 lb/ft³, or the density measurements begin to decrease.
- (8) Upon completion of control strip compaction, take 10 randomly located wet density measurements within the limits of the control strip. The final measurements recorded at the 3 locations under article C.2.4.1.1.2 may be included as 3 of the 10 measurements. Average the ten measurements to obtain the control strip target density and target moisture for use in contractor elected method 4 in section C.1. Test locations must be kept a minimum of 3 feet from the unsupported edge of dense graded base layers.

# C.2.6 Department (Kenosha County) Testing

### C.2.6.1 General

- (1) The department will conduct verification testing to validate the quality of the product and independent assurance testing to evaluate the sampling and testing. The department will provide the contractor with a listing of names and telephone numbers of all QV and IA personnel for the project, and provide test results to the contractor within two business days after the department obtains the sample.
- When a density target is determined in accordance methods 3 and 4 in section C.1, conduct density testing on same date of final compaction.

# C.2.6.2 Quality Verification (QV) Testing

- (1) The department will have an HTCP technician, or ACT working under a certified technician, perform QV sampling and testing. Department verification testing personnel must meet the same certification level requirements specified in C.2.3 for contractor testing personnel for each test result being verified. The department will notify the contractor before sampling so the contractor can observe QV sampling.
- (2) The department will conduct QV tests at the minimum frequency of 20% of the required gradation, density and Proctor contractor tests.
- (3) The department will utilize contractor's QC Proctor results for determination of the material target density. The department will verify QC Proctor values by testing QC Proctor split sample. The department will use QC Proctor value as a target density if the QC and QV Proctor test results meet the tolerance requirements specified in section C.2.6.2(7).
- (4) The department will locate gradation and nuclear density test samples, at locations independent of the contractor's QC work, collecting one sample at each QV location. Sampling for gradation may be done independently of nuclear density tests, before watering and before compacting. The department will split each QV sample, test half for QV, and retain the remaining half for 10 calendar days.
- (5) The department will conduct QV tests in a separate laboratory and with separate equipment from the contractor's QC tests. The department will use the same methods specified for QC testing.
- (6) The department will utilize control strip target density testing results in lieu of QV Proctor sampling and testing when the contractor elected target density method 4 in section C.1 is used.
- (7) The department will assess QV results by comparing to the appropriate specification limits. If QV test results conform to this special provision, the department will take no further action. If QV test results are nonconforming, take corrective actions in accordance with C.2.7 until the requirements of this special provision are met. Differing QC and QV nuclear density values of more than 2.0 pcf will be investigated and resolved. Differing QC and QV Proctor values of more than 3.0 pcf will be investigated and resolved.

### C.2.6.3 Independent Assurance (IA)

- (1) Independent assurance is unbiased testing the department performs to evaluate the department's QV and the contractor's QC sampling and testing, including personnel qualifications, procedures, and equipment. The department will perform an IA review according to the department's independent assurance program. That review may include one or more of the following:
  - 1. Split sample testing.
  - 2. Proficiency sample testing.
  - 3. Witnessing sampling and testing.
  - 4. Test equipment calibration checks.
  - 5. Requesting that testing personnel perform additional sampling and testing.
- (2) If the department identifies a deficiency, and after further investigation confirms it, correct that deficiency. If the contractor does not correct or fails to cooperate in resolving identified deficiencies, the engineer may suspend placement until action is taken. Resolve disputes as specified in C.2.6.4.

# C.2.6.4 Dispute Resolution

- (1) The engineer and contractor should make every effort to avoid conflict. If a dispute between some aspect of the contractor's and the engineer's testing program does occur, seek a solution mutually agreeable to the project personnel. The department and contractor shall review the data, examine data reduction and analysis methods, evaluate sampling and testing methods/procedures, and perform additional testing. Use ASTM E 178 to evaluate potential statistically outlying data.
- (2) Production test results, and results from other process control testing, may be considered when resolving a dispute.
- (3) If project personnel cannot resolve a dispute, and the dispute affects payment or could result in incorporating non-conforming product or work, the department will use third party testing to resolve the dispute. The department's central office laboratory, or a mutually agreed on independent testing laboratory, will provide this testing. The engineer and contractor will abide by the results of the third party tests. The party in error will pay service charges incurred for testing by an independent laboratory. The department may use third party test results to evaluate the quality of questionable materials and determine the appropriate payment. The department may reject material or otherwise determine the final disposition of nonconforming material as specified in standard spec 106.5.

#### C.2.7 Corrective Action

- (1) Lots not achieving the minimum density requirements may be addressed and accepted for compaction in accordance with the requirements of this section. Unless directed by the engineer, corrective actions taken to address an unacceptable lot must be applied to the entire lot corresponding to the non-conforming test.
- (2) Investigate the moisture content of material in an unacceptable lot. Moisture content testing/samples collected under the QC and/or QV testing articles of this specification may be used to complete this investigation. Obtain moisture content readings in accordance with ASTM D 6938. For material composed of >20% RAP or RCA, correct the moisture content with the moisture correction value using the moisture bias, as shown in CMM 8.15.12.1 and 8.15.12.2, except the one-point Proctor tests of the 5 random tests is not required.
- (3) Lots with moisture contents within 2.0 percentage points of optimum moisture for target density methods 1, 2 and 3 in section C.1, or within 2.0 percentage points of the target moisture content for target density method 4 in section C.1, and exhibiting no signs of deflection when subjected to loading by the heaviest roller used in the placement and compaction operations, shall be compacted a minimum of one more pass using equipment and methods representative of the operations used to place and compact the Base Aggregate Dense 1 1/4–Inch, and density tested at the same location (station and offset) as the failing QC and/or QV density tests. If the change in density exceeds 2.0 lb/ft³ continue subsequent compactive efforts and density testing on that lot, at no additional cost to the department. If the change in density is less than or equal to 2.0 lb/ft³, the lot is accepted as satisfying the compaction requirements of this provision.

- (4) Lots with moisture contents within 2.0 percentage points of optimum moisture for target density methods 1, 2, or 3 in section C.1, or within 2.0 percentage points of the target moisture content for target density method 4 in section C.1, and exhibiting signs of deflection when subjected to loading by the heaviest roller used in the placement and compaction operations, will be reviewed by the engineer. The engineer may request subgrade improvement methods, such as excavation below subgrade (EBS), installation of geotextile fabrics, installation of breaker run material, or others to be completed, or may request an additional pass of compactive effort using equipment and methods representative of the operations used to place and compact the base aggregate dense and density test.
  - 1. If, after an additional pass, the change in density at the same location (station and offset) as the failing QC and/or QV density tests exceeds 2.0 lb/ft³ in a lot continue subsequent compactive efforts and density testing on that lot. If the change in density at the same location (station and offset) as the failing QC and/or QV density tests is less than or equal to 2.0 lb/ft³, and subgrade improvement methods are not requested by the engineer, the lot is accepted as satisfying the compaction requirements of this provision.
  - 2. If subgrade improvement methods are requested by the engineer, upon completion, including compaction of the restored base material, conduct a density test within the improved subgrade limits. This density test result will replace the prior field density value. If the lot field density equals or exceeds the minimum density requirement defined in section C.1, the lot is accepted as satisfying the compaction requirements of this provision. If the lot field density fails to achieve the minimum density requirement defined in section C.1, compact the lot a minimum of one more pass using equipment and methods representative of the operations used to place and compact the base aggregate dense; and density test at the same location (station and offset) as the failing QC and/or QV density tests. If the change in density exceeds 2.0 lb/ft³ continue subsequent compactive efforts and density testing on that lot, at no additional cost to the County. If the change in density is less than or equal to 2.0 lb/ft³, the lot is accepted as satisfying the compaction requirements of this provision.
- (5) Unacceptable lots, with moisture contents in excess of 2.0 percentage points above or below optimum moisture for target density methods 1, 2 or 3 in section C.1; or in excess of 2.0 percentage points above or below the target moisture content for target density method 4 in section C.1; shall receive contractor performed and documented corrective action; including additional density testing.
- (6) Density tests completed subsequent to any corrective action will replace previous field density test results for that lot. Continue corrective actions until the minimum density requirement is achieved or an alternate compaction acceptance criteria is met in accordance with this section.
- (7) Field moisture contents of materials tested using contractor elected target density methods 3 or 4 in section C.1 cannot exceed 2.0 percentage points of the optimum moisture content or 2.0 percentage points of the target moisture content, respectively. Density tests on materials using contractor elected target density methods 3 or 4 in section C.1 will not be considered for lot compaction acceptance until the moisture content of the corresponding density test of the in-place material is less than 2.0 percentage points above of the optimum moisture content or 2.0 percentage points of the target moisture content, respectively.

### **D** Measurement

(1) The owner will measure the QMP Base Aggregate Dense 1 1/4-Inch Compaction bid item by each lot, acceptably completed per C.2.5.1.

#### E Payment

(1) The owner will pay for the measured quantities at the contract unit price under the following bid item:

ITEM NUMBER DESCRIPTION UNIT 371.1000.S QMP Base Aggregate Dense 1 1/4-Inch Compaction EACH

- (2) Payment is full compensation for performing compaction testing; for sampling and laboratory testing; and for developing, completing, and documenting the compaction quality management program. The owner will pay separately for providing aggregate under the Base Aggregate Dense 1 1/4-Inch bid item.
- (3) The owner will pay for additional tests directed by the engineer. One engineer directed test is equal to one acceptably completed lot of the QMP Base Aggregate Dense 1 1/4 -Inch Compaction bid item. The owner will not pay for additional corrective action tests required due to unacceptable material.

stp-370-010 (20190618)

# 20. QMP HMA Pavement Nuclear Density.

# **A** Description

Replace standard spec 460.3.3.2 (1) and standard spec 460.3.3.2 (4) with the following:

- (1) This special provision describes density testing of in-place HMA pavement with the use of nuclear density gauges. Conform to standard spec 460 except as modified in this special provision.
- (2) Provide and maintain a quality control program defined as all activities and documentation of the following:
  - 1. Selection of test sites.
  - 2. Testing.
  - 3. Necessary adjustments in the process.
  - 4. Process control inspection.
- (3) Chapter 8 of WisDOT's construction and materials manual (CMM) provides additional detailed guidance for QMP work and describes required procedures.

http://wisconsindot.gov/rdwy/cmm/cm-08-00toc.pdf

#### **B** Materials

#### **B.1 Personnel**

(1) Nuclear gauge owners and personnel using nuclear gauges shall comply with WisDOT requirements according to 460.3.3 and CMM 8-15.

# **B.2 Testing**

(1) Conform to ASTM D2950 and CMM 8.15 for density testing and gauge monitoring methods. Conform to CMM 8-15.10.4 for test duration and gauge placement.

### **B.3 Equipment**

### **B.3.1 General**

- (1) Furnish nuclear gauges according to CMM 8-15.2.
- (2) Furnish nuclear gauges from WisDOT's approved product list at

http://wisconsindot.gov/Pages/doing-bus/eng-consultants/cnslt-rsrces/tools/appr-prod/default.aspx

### **B.3.2 Comparison of Nuclear Gauges**

### **B.3.2.1 Comparison of QC and QV Nuclear Gauges**

(1) Compare QC and QV nuclear gauges according to CMM 8-15.7.

### **B.3.2.2 Comparison Monitoring**

(1) Conduct reference site monitoring for both QC and QV gauges according to CMM 8-15.

# **B.4 Quality Control Testing and Documentation**

#### **B.4.1 Lot and Sublot Requirements**

### **B.4.1.1 Mainline Traffic Lanes, Shoulders, and Appurtenances**

- (1) Divide the pavement into lots and sublots for nuclear density testing according to CMM 8-15.10.2.
- (2) Determine required number of tests according to CMM 8-15.10.2.1.
- (3) Determine random testing locations according to CMM 8-15.10.3.

# B.4.1.2 Side Roads, Crossovers, Turn Lanes, Ramps, and Roundabouts

- (1) Divide the pavement into lots and sublots for nuclear density testing according to CMM 8-15.10.2.
- (2) Determine required number of tests according to CMM 8-15.10.2.2.

(3) Determine random testing locations according to CMM 8-15.10.3.

### **B.4.2 Pavement Density Determination**

### **B.4.2.1 Mainline Traffic Lanes and Appurtenances**

- (1) Calculate the average sublot densities using the individual test results in each sublot.
- (2) If all sublot averages are no more than one percent below the target density, calculate the daily lot density by averaging the results of each random QC test taken on that day's material.
- (3) If any sublot average is more than one percent below the target density, do not include the individual test results from that sublot when computing the lot average density and remove that sublot's tonnage from the daily quantity for incentive. The tonnage from any such sublot is subject to disincentive pay as specified in standard spec 460.5.2.2.

#### **B.4.2.2 Mainline Shoulders**

#### B.4.2.2.1 Width Greater Than 5 Feet

(1) Determine the pavement density as specified in B.4.2.1.

#### B.4.2.2.2 Width of 5 Feet or Less

- (1) If all sublot test results are no more than 3.0 percent below the minimum target density, calculate the daily lot density by averaging all individual test results for the day.
- (2) If a sublot test result is more than 3.0 percent below the target density, the engineer may require the unacceptable material to be removed and replaced with acceptable material or allow the nonconforming material to remain in place with a 50 percent pay reduction. Determine the limits of the unacceptable material according to B.4.3.

### B.4.2.3 Side Roads, Crossovers, Turn Lanes, Ramps, and Roundabouts

(1) Determine the pavement density as specified in B.4.2.1.

# **B.4.2.4 Documentation**

(1) Document QC density test data as specified in CMM 8.15. Provide the engineer with the data for each lot within 24 hours of completing the QC testing for the lot.

### **B.4.3 Corrective Action**

- (1) Notify the engineer immediately when an individual test is more than 3.0 percent below the specified minimum in standard spec 460.3.3.1. Investigate and determine the cause of the unacceptable test result.
- (2) The engineer may require unacceptable material specified in B.4.3(1) to be removed and replaced with acceptable material or allow the nonconforming material to remain in place with a 50 percent pay reduction. Determine limits of the unacceptable area by measuring density of the layer at 50-foot increments both ahead and behind the point of unacceptable density and at the same offset as the original test site. Continue testing at 50-foot increments until a point of acceptable density is found as specified in standard spec 460.5.2.2(1). Removal and replacement of material may be required if extended testing is in a previously accepted sublot. Testing in a previously accepted sublot will not be used to recalculate a new lot density.
- (3) Compute unacceptable pavement area using the product of the longitudinal limits of the unacceptable density and the full sublot width within the traffic lanes or shoulders.
- (4) Retesting and acceptance of replaced pavement will be as specified in standard spec 105.3.
- (5) Tests indicating density more than 3.0 percent below the specified minimum, and further tests taken to determine the limits of unacceptable area, are excluded from the computations of the sublot and lot densities.
- (6) If 2 consecutive sublot averages within the same paving pass and same target density are more than one percent below the specified target density, notify the engineer and take necessary corrective action. Document the locations of such sublots and the corrective action that was taken.

# **B.5 Department (Kenosha County) Testing**

### **B.5.1 Verification Testing**

- (1) The department will have a HTCP certified technician, or ACT working under a certified technician, perform verification testing. The department will test randomly at locations independent of the contractor's QC work. The department will perform verification testing at a minimum frequency of 10 percent of the sublots and a minimum of one sublot per mix design. The sublots selected will be within the active work zone. The contractor will supply the necessary traffic control for the department's testing activities.
- (2) The QV tester will test each selected sublot using the same testing requirements and frequencies as the QC tester.
- (3) If the verification sublot average is not more than one percent below the specified minimum target density, use the QC tests for acceptance.
- (4) If the verification sublot average is more than one percent below the specified target density, compare the QC and QV sublot averages. If the QV sublot average is within 1.0 lb/ft3 of the QC sublot average, use the QC tests for acceptance.
- (5) If the first QV/QC sublot average comparison shows a difference of more than 1.0 lb/ft3 each tester will perform an additional set of tests within that sublot. Combine the additional tests with the original set of tests to compute a new sublot average for each tester. If the new QV and QC sublot averages compare to within 1.0 lb/ft<sup>3</sup>, use the original QC tests for acceptance.
- (6) If the QV and QC sublot averages differ by more than 1.0 lb/ft3 after a second set of tests, resolve the difference with dispute resolution specified in B.6. The engineer will notify the contractor immediately when density deficiencies or testing precision exceeding the allowable differences are observed.

### **B.5.2 Independent Assurance Testing**

(1) Independent assurance is unbiased testing the department performs to evaluate the department's verification and the contractor's QC sampling and testing including personnel qualifications, procedures, and equipment. The department will perform the independent assurance review according to the department's independent assurance program.

### **B.6 Dispute Resolution**

- (1) The testers may perform investigation in the work zone by analyzing the testing, calculation, and documentation procedures. The testers may perform gauge comparison according to B.3.2.1.
- (2) The testers may use comparison monitoring according to B.3.2.2 to determine if one of the gauges is out of tolerance. If a gauge is found to be out of tolerance with its reference value, remove the gauge from the project and use the other gauge's test results for acceptance.
- (3) If the testing discrepancy cannot be identified, the contractor may elect to accept the QV sublot density test results or retesting of the sublot in dispute within 48 hours of paving. Traffic control costs will be split between the department and the contractor.
- (4) If investigation finds that both gauges are in error, the contractor and engineer will reach a decision on resolution through mutual agreement.

### **B.7 Acceptance**

- (1) The owner will not accept QMP HMA Pavement Nuclear Density if a non-compared gauge is used for contractor QC tests.
  - C (Vacant)
  - D (Vacant)
  - E Payment

# E.1 QMP Testing

(1) Costs for all sampling, testing, and documentation required under this special provision are incidental to the work. If the contractor fails to perform the work required under this special provision, the owner may

RD 16-003 Page 19 of 31 reduce the contractor's pay. The owner will administer pay reduction under the Non-performance of QMP administrative item.

# E.2 Disincentive for HMA Pavement Density

(1) The owner will administer density disincentives as specified in standard spec 460.5.2.2.

### E.3 Incentive for HMA Pavement Density

(1) The owner will administer density incentives as specified in standard spec 460.5.2.3. stp-460-020 (20181119)

### 21. Bar Steel Reinforcement HS Stainless Structures, Item 505.0800.S.

### **A Description**

This special provision describes furnishing and placing stainless steel reinforcing bars and associated stainless steel bar couplers.

Conform to standard spec 505 as modified in this special provision.

#### **B** Materials

#### **B.1 General**

Furnish stainless steel reinforcing bars conforming to ASTM A955 and to one of the following Unified Numbering System (UNS) designations: S31653, S31803, S32205, or S32304. Supply grade 60 bars, all of the same UNS designation. Conform to the chemical composition specified for the given UNS designation in ASTM A276 table 1.

Supply bars that are free of dirt, mill scale, oil, and debris by pickling to a bright or uniform light finish. The department may reject bars displaying rust/oxidation, questionable blemishes, or lack of a bright or uniform pickled surface.

Furnish chairs or continuous supports made of stainless steel or recycled plastic to support high-strength stainless bar steel reinforcement subject to the plastic chair restriction stated in standard spec 505.3.4(1).

Furnish couplers made from one of the UNS alloys allowed for bar steel.

Furnish tie wire made from one of the UNS alloys allowed for bar steel or from an engineer-approved plastic or nonmetallic material. Ensure that stainless steel tie wire is dead soft annealed.

#### **B.2** Fabrication

Before fabrication, supply test results from an independent testing agency certifying that the reinforcement meets the requirements of Annex A1 of ASTM A955.

Bend bars conforming to standard spec 505.3.2 and according to ASTM A955. Bend and cut bars using equipment thoroughly cleaned or otherwise modified to prevent contamination from carbon steel or other contaminants. Use tools dedicated solely to working with stainless steel.

### **B.3 Control of Material**

Identify reinforcement bars delivered to the project site with tags bearing the identification symbols used in the plans. Include the UNS designation, heat treat condition, heat number, grade corresponding to minimum yield strength level, and sufficient documentation to track each bar bundle to a mill test report.

Provide samples for department testing and acceptance according to CMM 8-50 Exhibit 1 requirements for concrete masonry reinforcement for uncoated bar steel.

Provide mill test reports for the project that do the following:

- 1. Verify that sampling and testing procedures and test results conform to ASTM A955, ASTM A276 table 1, and these contract requirements.
- 2. Include a chemical analysis with the UNS designation, heat lot identification, and the source of the metal.

- 3. Include tensile strength, yield strength, and elongation tests results conforming to ASTM A955 for each size furnished.
- 4. Certify that the bars have been pickled to a bright or uniform light finish.

#### **C** Construction

#### C.1 General

Ship, handle, store, and place the stainless steel reinforcing as follows:

- Separate from regular reinforcement during shipping. Pad points of contact with steel chains or banding, or secure with non-metallic straps.
- 2. Store on wooden cribbing separated from regular reinforcement. Cover with tarpaulins if stored outside.
- 3. Handle with non-metallic slings.
- 4. Do not flame cut or weld. Protect from contamination when cutting, grinding, or welding other steel products above or near the stainless steel during construction.
- 5. Place on plastic or stainless steel bar chairs. If placing stainless steel chairs on steel beams, use chairs with plastic-coated feet.
- 6. Tie with stainless steel wire or an engineer-approved plastic or nonmetallic material.

Do not tie stainless steel reinforcing bars to, or allow contact with, uncoated reinforcing bars or galvanized steel. Maintain at least 1 inch clearance between stainless steel bars or dowels and uncoated or galvanized steel. Where 1 inch clearance is not possible, sleeve bars with a continuous polyethylene or nylon tube at least 1/8 inch thick extending at least 1 inch in each direction and bind with nylon or polypropylene cable ties. Sleeves are not required between stainless steel bars and shear studs. Stainless steel bars can be in direct contact with undamaged epoxy-coated bars.

Cut flush with the top flange or remove uncoated fasteners, anchors, lifting loops, or other protrusions into a bridge deck before casting the deck on prestressed concrete beams.

#### C.2 Splices

Splice as the plans show. Provide stainless steel couplers conforming to the minimum capacity, certification, proof testing, and written approval requirements of standard spec 550.3.3.4. The contractor may substitute stainless steel couplers for lap slices the plans show if the engineer approves in writing.

If increasing or altering the number or type of bar splices the plans show, provide revised plan sheets to the engineer showing the reinforcement layout, type, length, and location of revised bar splices and revised bar lengths. Obtain engineer approval for the location of new lap splices or substitution of mechanical bar couplers before fabrication. Ensure that new lap splices are at least as long as those the plans show.

#### **D** Measurement

The owner will measure Bar Steel Reinforcement HS Stainless Structures by the pound acceptably completed, computed from the nominal weights of corresponding sizes for carbon steel deformed bars in AASHTO M31 regardless of stainless steel alloy provided. The owner will not measure extra material used if the contractor alters the reinforcement layout as allowed under C.2, extra material for splices or couplers the plans do not show, or the weight of devices used to support or fasten the steel in position.

The owner will measure the Bar Couplers Stainless bid items as each individual coupler acceptably completed.

#### E Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNIT505.0800.SBar Steel Reinforcement HS Stainless StructuresLB

Payment for Bar Steel Reinforcement HS Stainless Structures is full compensation for furnishing and placing stainless steel reinforcing bars, including supports. Where the plans specify bar couplers, the owner will pay for the length of bars as detailed with no deduction or increase for installation of the coupler.

Payment for the Bar Couplers Stainless bid items is full compensation for providing couplers; including bar steel that is part of the coupler and not detailed in the plan; for threading reinforcing bars; for installing and coating the splice; and for supplying and testing 3 couplers.

# 22. Cover Plates Temporary, Item 611.8120.S.

# **A** Description

This special provision describes providing and removing steel plates to cover and support asphaltic pavement and traffic loading at manholes, inlets and similar structures during milling and paving operations.

#### **B** Materials

Provide a 0.25 inch minimum thickness steel plate that extends to the outside edge of the existing masonry.

### C (Vacant)

#### **D** Measurement

The County will measure Cover Plates Temporary as each individual unit acceptably completed.

### **E** Payment

The County will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBER DESCRIPTION UNIT 611.8120.S Cover Plates Temporary EACH

Payment is full compensation for furnishing, installing, and removing the cover plates.

The steel plates shall become the property of the contractor when no longer needed in the contract work. stp-611-006 (20151210)

### 23. Pipe Grates, Item 611.9800.S.

### **A Description**

This special provision describes providing pipe grates on the ends of pipes.

#### **B** Materials

Furnish steel conforming to the requirements of standard spec 506.2.2.1. Furnish steel pipe conforming to the requirements of standard spec 506.2.3.6.

Furnish pipe grates galvanized according to ASTM A123.

Furnish angles and brackets galvanized according to ASTM A123.

Furnish required hardware galvanized according to ASTM A153.

#### **C** Construction

Repair pipes, rods, angles and brackets on which the galvanized coating has been damaged according to the requirements of AASHTO M36M.

#### **D** Measurement

The owner will measure Pipe Grates in units of work, where one unit is one grate completed and accepted.

### E Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBER DESCRIPTION UNIT 611.9800.S Pipe Grates EACH

Payment is full compensation for furnishing and installing all materials; and for drilling and connecting grates to pipes.

stp-611-010 (20030820)

### 24. Salvaged Rail, Item 614.0920; Salvaged Guardrail End Treatments, Item 614.0925.

Amend section 614.3.9 of the standard specifications to include the following:

Contact Glenn Fenske, Kenosha County Highways Superintendent, at (262) 857-1878 to arrange for Kenosha County to pick up the salvaged materials from the worksite.

### 25. Temporary Ditch Checks, Item 628.7504.

Replace section 628.3.14(2) of the standard specifications with the following:

Construct temporary ditch checks using a manufactured alternative to erosion bales from WisDOT's PAL. Erosion bales are not allowed for use as temporary ditch checks. Place temporary ditch checks across ditches at locations the plans show or as the engineer directs immediately after shaping the ditches or slopes. Excavate upstream sumps as the engineer directs.

Replace section 628.5.17(2) of the standard specifications with the following:

The County will not pay for installing ditch checks if constructed of erosion bales.

### 26. Removing Signs Type II, Item 638.2602.

Revised section 638.3.4 of the standard specifications and as follows:

- (2) Aluminum type II signs and steel stringers are property of Kenosha County DPW. Return signs and stringers palletized for handling with a forklift. Contact Glenn Fenske, Kenosha County Highways Superintendent, at (262) 857-1878 at least five working days prior to delivery to make arrangements. Deliver the removed signs to the Kenosha County Public Works Facility at 19600 75th Street in Bristol, WI.
- (3) Plywood type II and all type I signs are property of Kenosha County DPW. Return signs and stringers palletized for handling with a forklift. Contact Glenn Fenske, Kenosha County Highways Superintendent, at (262) 857-1878 at least five working days prior to delivery to make arrangements. Deliver the removed signs to the Kenosha County Public Works Facility at 19600 75th Street in Bristol, WI.

### 27. Nighttime Work Lighting-Stationary.

#### **A Description**

This special provision describes furnishing portable lighting as necessary to complete nighttime work. Nighttime operations consist of work specifically scheduled to occur after sunset and before sunrise.

- B (Vacant)
- **C** Construction
- C.1 General

This provision shall apply when providing, maintaining, moving, and removing portable light towers and equipment-mounted lighting fixtures for nighttime stationary work operations, for the duration of nighttime work on the contract.

At least 14 days before the nighttime work, furnish a lighting plan to the engineer for review and acceptance. Address the following in the plan:

- 1. Layout, including location of portable lighting lateral placement, height, and spacing. Clearly show on the layout the location of all lights necessary for every aspect of work to be done at night.
- 2. Specifications, brochures, and technical data of all lighting equipment to be used.
- 3. The details on how the luminaires will be attached.
- 4. Electrical power source information.
- 5. Details on the louvers, shields, or methods to be employed to reduce glare.
- 6. Lighting calculations. Provide illumination with average to minimum uniformity ratio of 5:1 or less throughout the work area.
- 7. Detail information on any other auxiliary equipment.

### C.2 Portable Lighting

Provide portable lighting that is sturdy and free standing and does not require any guy wires, braces, or any other attachments. Furnish portable lighting capable of being moved as necessary to keep up with the construction project. Position the portable lighting and trailers to minimize the risk of being impacted by traffic on the roadway or by construction traffic or equipment. Provide lighting protection for the portable lighting. Portable lighting shall withstand up to 60 mph wind velocity.

If portable generators are used as a power source, furnish adequate power to operate all required lighting equipment without any interruption during the nighttime work. Provide wiring that is weatherproof and installed according to local, state, federal (NECA and OSHA) requirements. Equip all power sources with a ground-fault circuit interrupter to prevent electrical shock.

### C.3 Light Level and Uniformity

Position (spacing and mounting height) the luminaires to provide illumination with an average to minimum uniformity ratio of 5:1 or less throughout the work area.

Illuminate the area as necessary to incorporate construction vehicles, equipment, and personnel activities.

#### C.4 Glare Control

Design, install, and operate all lighting supplied under these specifications to minimize or avoid glare that interferes with all traffic on the roadway or that causes annoyance or discomfort for properties adjoining the roadway. Locate, aim, and adjust the luminaires to provide the adequate level of illumination and the specified uniformity in the work area without the creation of objectionable glare.

Provide louvers, shields, or visors, as needed, to reduce any objectionable levels of glare. As a minimum, ensure the following requirements are met to avoid objectionable glare on the roadways open to traffic in either direction or for adjoining properties:

- 1. Aim tower-mounted luminaires, either parallel or perpendicular to the roadway, so as to minimize light aimed toward approaching traffic.
- 2. Aim all luminaires such that the center of beam axis is no greater than 60 degrees above vertical (straight down).

If lighting does not meet above-mentioned criteria, adjust the lighting within 24 hours.

#### C.5 Continuous Operation

Provide and have available sufficient fuel, spare lamps, generators, and qualified personnel to ensure that the lights will operate continuously during nighttime operation. In the event of any failure of the lighting system, discontinue the operation until the adequate level of illumination is restored. Move and remove lighting as necessary.

# D (Vacant)

# **E** Payment

Costs for furnishing a lighting plan, and for providing, maintaining, moving, and removing portable lighting, tower mounted lighting, and equipment-mounted lighting required under this special provision are incidental to the contract.

stp-643-010 (20100709)

### 28. Catch Basins Median 1 Grate, Item SPV.0060.01.

### **A** Description

This special provision describes providing Catch Basins Median 1 Grate in accordance with section 611 of the standard specifications and as shown on the plans.

#### **B** Materials

Furnish materials in conformance with section 611.2 of the standard specifications. Furnish Catch Basins Median 1 Grate with integral sumps as shown on the plans.

#### **C** Construction

Comply with section 611.3 of the standard specifications.

#### **D** Measurement

The owner will measure Catch Basins Median 1 Grate as each individual unit acceptably completed.

### **E** Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0060.01Catch Basins Median 1 GrateEA

Payment is full compensation for providing materials, including masonry, conduit and sewer connections, steps and other fittings; for excavating, backfilling, disposing of surplus material, and for cleaning out and restoring the work site; except that the owner will pay for covers separately.

### 29. Field Office, Item SPV.0060.02.

### **A Description**

This special provision describes furnishing a brick and mortar location field office, equipping, and maintaining the field office as required in the contract at the engineer-approved location conforming to standard spec 642 and as hereinafter provided.

#### **B** Materials

Provide Field Office conforming to standard spec 642.2.1.

Add the following to standard spec 642.2.1:

Provide a lease at the following property for the duration of the project to be used by Kenosha County and their selected engineering representatives: 9114 58th Place, Suite 300 (1,324 SF office space) in the Business Park of Kenosha. Contact the following individuals for more information to secure a lease of this property:

Sergio Chapa, Senior Managing Director, 847-980-7244, schapa@ngkf.com

Chelsea Couette, Business Development Associate, 414-274-2641, Chelsea.couette@zilber.com

Equip facility as specified in standard spec 642.2.2.1 except delete paragraph (1) and (4) and add the following:

- 1. Provide the field office with a minimum of three rooms each with a minimum of two exterior doors and air conditioning.
- 5 suitable office desks with drawers and locks.
- 3. 5 ergonomically correct office chairs in working condition with at a minimum: 5-legged base with casters, seat adjustable from 15 to 22 inches from the floor with a seamless waterfall, rounded, front edge, and high backrest with no arms or adjustable arms.
- 4 six foot folding tables.
- 5. 1 ten foot folding table.
- 5 two-drawer file cabinets.
- 7. 3 four-shelf bookcases.
- 8. 20 folding chairs.

#### **C** Construction

Conform to standard spec 642.3.

#### **D** Measurement

The owner will measure Field Office as each field office acceptably completed.

### **E** Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0060.02Field OfficeEACH

Payment is full compensation for providing, equipping, securing, and maintaining the facility; for telecommunications equipment, installation, and service fees; and for providing bottled water, utilities, fuel, ventilation, and toilet facilities as required, either independently or jointly with the field laboratory, for the time specified in 642.3 of the standard specs.

The owner will pay for the cost of telecommunications usage fees incurred by owner staff.

### 30. Connect Drain Tile, Item SPV.0060.03.

# **A Description**

This special provision describes connecting existing drain tiles to proposed structures or proposed storm sewer pipes.

# B (Vacant)

#### **C** Construction

Identify drain tile invert elevations through Drain Tile Exploration. Connect the exposed drain tile with the appropriate coupling, concrete collar, or by means approved by the engineer to reestablish the connection. Use concrete masonry for concrete collar conforming to standard spec 520.2.4. Ensure that the connection does not negatively impact the current flow capacity of the drain tile.

### **D** Measurement

The County will measure Connect Drain Tile as each new drain tile connection to a structure or pipe acceptably completed. Measurement will include connections for new underdrain structures placed in previous stages of the project, in addition to pipe or structures constructed under previous projects.

### **E** Payment

The County will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0060.03Connect Drain TileEACH

Payment is full compensation for performing all work; removing seals, end walls and concrete collars, providing all materials, couplings, and concrete collars. Any additional pipe or materials required to connect the drain tile shall be considered incidental to this bid item. The new pipe that restored drainage will be paid separately under their respective bid items.

# 31. Utility Line Opening, Item SPV.0060.04.

### **A** Description

This special provision describes excavating to uncover utilities for the purpose of determining elevation or location and potential conflicts as shown on the plans or as directed by the engineer.

#### B (Vacant)

#### **C** Construction

Perform the excavation in such a manner that the utility in question is not damaged and the safety of the workers is not compromised.

Perform the utility line openings as soon as possible and at least 10 days in advance of proposed utility construction to allow any conflicts to be resolved with minimal disruption.

Give the engineer a minimum of three working days once utility line opening information is received to review all relevant design information prior to proposed utility construction. Where utilities are within 6 feet of each other at a potential conflict location, only one utility line opening will be called for. In these cases, a single utility line opening will be considered full payment to locate multiple utilities. Utility line openings include a trench up to 10 feet long as measured at the trench bottom, and of any depth required to locate the intended utility.

Approve and coordinate all utility line openings with the engineer. Notify the utility engineers or their agents of this work a minimum of five working days prior to the work so they may be present when the work is completed.

Replace pavement over utility line opening trenches that are within the staged traffic area as directed by the engineer. Replace pavement and open to traffic within 24 hours of the excavation as directed by the engineer.

#### **D** Measurement

The County will measure Utility Line Opening as each individual utility line opening location acceptably completed.

### E Payment

The County will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0060.04Utility Line OpeningEACH

Payment is full compensation for the excavation required to expose the utility line; backfilling with existing material removed from the excavation; compacting the backfill; restoring the site; and for cleanup.

Existing pavement, concrete curb, gutter, and sidewalk removals necessary to facilitate utility line openings are not considered part of or paid for under Utility Line Openings, but are considered separate and measured and paid for separately as removal items. Pavement replacement material, concrete curb, gutter, and sidewalk items will also be considered separate from Utility Line Openings and will be measured and paid for separately.

# 32. Silt Fence Heavy Duty, Item SPV.0090.01.

# **A** Description

This special provision describes furnishing, installing, and removing heavy duty silt fence as shown on the plans or as directed by the engineer before construction activities begin.

### **B** Materials

Furnish heavy duty silt fence consisting of a composite woven wire fabric, posts, geotextile fabric, and fasteners to be assembled by the contractor. Woven wire fabric shall be a standard field fence type, a minimum of 3 feet high with a maximum mesh spacing of 6-inches and minimum 14½-gage wire.

Provide metal posts with a minimum length of 6-feet, 3-inches. Posts shall be "studded tee" or "U" type with a minimum weight of 1.3 lb/ft.

Provide geotextile fabric, non-woven with properties as specified in 628.2.6.1.

### **C** Construction

Install heavy duty silt fence as shown on the plans. Space ties and anchors adequately to resist current flow. Remove silt fence only after construction activities have been completed. Remove trapped silt prior to removing the fence as directed by the engineer. Use heavy duty silt fence in wetland areas up to 6-inches of standing water.

#### **D** Measurement

The owner will measure Heavy Duty Silt Fence by the linear foot acceptably completed.

### E Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0090.01Heavy Duty Silt FenceLF

Payment is full compensation for furnishing, installing, maintaining, and removing the heavy duty silt fence.

### 33. Asphaltic Curb Temporary, Item SPV.0090.02.

### **A** Description

This special provision describes constructing asphaltic curb at the location shown in the plans and removing it when no longer needed to direct temporary drainage and when ready to construct the final improvements.

#### **B** Materials

Furnish materials conforming to standard spec 465.2 (2) for temporary pavement.

### **C** Construction

Perform work in conformance to standard spec 465.3.2. Approximate the shape of the existing concrete curb head matched into.

### **D** Measurement

The owner will measure Asphaltic Curb Temporary by the linear foot acceptably completed measured along the base of the curb face.

# **E** Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0090.02Asphaltic Curb TemporaryLF

Payment is full compensation for furnishing, placing, and compacting the mixture; for forming the curb; and removing and disposing of the curb.

# 34. Proof Rolling, Item SPV.0170.01.

# **A Description**

This special provision describes the testing of the stability of the compacted subgrade and base material by rolling with a tri-axle dump truck.

#### **B** Materials

Fully load a tri-axle dump truck to within 3 tons of the vehicle legal load limit and provide a minimum gross vehicle weight of 30 tons. Uniformly inflate all tires to the pressure recommended by the manufacturer for the applicable wheel load.

#### **C** Construction

Completely compact and shape the subgrade to approximate grade. Test roll at normal walking speed under the direction of the engineer or his representative. Roll the road subgrade and base across the width of the entire roadway. Make multiple passes throughout the length of the test area. Center each pass on a proposed lane.

#### **D** Measurement

The owner will measure Proof Rolling by the station along the roadway centerline or reference line acceptably completed.

### **E** Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0170.01Proof RollingSTA

Payment is full compensation for performing the Proof Rolling and for retesting as determined by the engineer.

# 35. Stormwater Treatment Filter Strips, Item SPV.0180.01.

### **A** Description

This special provision describes the construction of Stormwater Treatment Filter Strips as shown on the plans and as herein provided.

### **B** Materials

Sand shall be poorly graded with less than 5% fines (USCS classification SP) and as defined in the following table.

Sieve	Maximum Percent Passing
No. 4	100%
No. 10	90%
No. 40	10%
No. 200	5%

### **C** Construction

Undercut or underfill all areas designated for filter strips to a degree that if covered with the specified depth of sand and topsoil, the finished work conforms to the required lines, grades, slopes, and cross sections the plans and drawings show. Place sand to the depth specified in the plans, then place topsoil to the minimum depth required in the contract. Use tracked equipment with a track pressure no greater than 4.5 psi. The subsoiled filterstrip limits on the embankment should begin two feet from the swale flow line, can extend no more than 5 vertical feet towards the highway, and end no closer than 10 feet from the subgrade shoulder point.

Subsoiling is the practice of dragging tines, shanks or claws through soil to a depth of approximately

20 inches to loosen and mix the soil layers. Subsoil the filter strip areas after topsoil placement. Schedule a 50-foot long test section and demonstrate competence to the engineer prior to continuing operations. The engineer shall identify the test area. Loosen subsoiled areas to a depth of 20 inches including the in-place material, sand and topsoil. After obtaining approval by the engineer that the equipment and methods are sufficient to obtain the desired results, complete the subsoiling operation. Subsoiling done without the engineer's approval will be considered as unauthorized work.

Subsoil each filter strip area three times to mix the topsoil, sand and in-place material. Do not pull the shanks through previous channels, but instead create multiple channels in the filter strip. Work at right angles to the direction of surface drainage. Create channels by a commercially available, multi-shanked implement attached to track-type equipment. The equipment shall be capable of exerting a penetration force necessary for the site. No disc cultivators, chisel plows, or spring-loaded equipment will be allowed. Space the grid channels 24 to 30 inches apart, depending on equipment, site conditions, and the plan. The channel depth shall be a minimum 20 inches. If soils are saturated, delay operations until the soil moisture is at field capacity or less. Field capacity is the amount of water retained in the soil after it has been saturated and allowed to drain freely.

Upon completion and acceptance of the subsoiled area, finish grade surface as described in standard spec 625.3.3 (2) and (4), except that only light-weight equipment, as approved by the engineer, may be used to break down clods and lumps. Drive no other equipment over the subsoiled area after the filter strip is finish-graded. Any filter strip areas that become compacted due to the contractor's operations, must be subsoiled and finish-graded at no expense to the County.

Seed, fertilize, and mulch the filter strip immediately after final grading. Place safety fence on the upgradient side of the filter strip, offset by one foot away from the filter strip immediately after seeding and mulching. Remove the safety fence only after all construction activities in the general area of the filter strip have been completed.

### **D** Measurement

The owner will measure Stormwater Treatment Filter Strips by the square yard acceptably completed.

### **E** Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0180.01Stormwater Treatment Filter StripsSY

Payment is full compensation for for constructing the filter strip including furnishing and placing the sand; for subsoiling; and for furnishing all labor, tools, equipment, materials, and incidentals necessary to complete the work. The County will pay for safety fence under the Fence Safety bid item.

### 36. Select Crushed Material for Travel Corridor, Item SPV.0195.01.

### **A** Description

This special provision describes providing and placing select crushed material to fill voids and create a wildlife travel corridor, as shown in the plans and as herein provided.

### **B** Materials

Furnish select crushed material according to the pertinent requirements of standard spec 312. Material shall be clean and substantially free from material passing the No. 4 (4.75mm) sieve.

The owner will assess select crushed material acceptability based primarily on the engineer's visual inspection. The County may require contractor to sample, test, and report gradation or fracture results to show conformance of material. One test per source, production process, or change of production process may be required.

### **C** Construction

Place 2-inches of material after the heavy riprap has been completed. Place material such that voids in the finished surface are three inches or less in any dimension. Lightly tamp the select crushed into the heavy riprap avoiding settlement of the heavy riprap. Place additional 2-inches of material on top of previously placed select crushed material and smooth.

### **D** Measurement

The owner will measure Select Crushed Material for Travel Corridor by the ton acceptably completed.

### E Payment

The owner will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBERDESCRIPTIONUNITSPV.0195.01Select Crushed Material for Travel CorridorTON

Payment is full compensation for providing, placing, and shaping the material; for compaction and all work necessary to provide gradation or fracture test results.

### **GENERAL NOTES**

7

- THE LOCATION OF EXISTING AND PROPOSED UTILITY INSTALLATIONS AS SHOWN ON THE PLAN IS APPROXIMATE. THERE MAY BE OTHER UTILITY INSTALLATIONS WITHIN THE PROJECT AREA WHICH ARE NOT SHOWN.
- CONTRACTOR SHALL CONTACT DIGGER'S HOTLINE AND ALL UTILITIES LISTED TO VERIFY UTILITY WORK STATUS PRIOR TO BIDDING.
- ALL OPENINGS BELOW SUBGRADE, RESULTING FROM REMOVALS OR ABANDONMENTS, SHALL BE BACKFILLED IN ACCORDANCE WITH SECTION 204 OF THE STANDARD SPECS, GRANULAR BACKFILL SHALL BE INCIDENTAL TO CONSTRUCTION.
- NO TREES OR SHRUBS SHALL BE REMOVED UNLESS DESIGNATED FOR REMOVAL BY THE ENGINEER.
- CURB AND GUTTER GRADES ARE GIVEN AT THE FLANGE LINE UNLESS OTHERWISE NOTED. CURB AND GUTTER RADII ARE MEASURED AT THE FACE OF CURB UNLESS OTHERWISE NOTED.
- ALL DISTURBED AREAS, NOT SURFACED WITH ASPHALT, CONCRETE, GRAVEL, OR SOD LAWN ARE TO BE COVERED WITH 4" SALVAGED TOPSOIL, SEEDED, FERTILIZED, AND MULCHED UNLESS OTHERWISE DIRECTED BY THE ENGINEER.
- EROSION CONTROL BMP'S ARE AT SUGGESTED LOCATIONS. THE ACTUAL LOCATIONS WILL BE DETERMINED BY THE CONTRACTOR'S EROSION CONTROL IMPLEMENTATION PLAN (ECIP) AND BY THE ENGINEER. EROSION CONTROL BMP'S SHALL BE MAINTAINED UNTIL PERMANENT VEGETATION IS ESTABLISHED OR UNTIL THE ENGINEER DETERMINES THAT THE BMP IS NO LONGER REQUIRED.
- RE-TOPSOIL GRADED AREAS, AS DESIGNATED BY THE ENGINEER, IMMEDIATELY AFTER GRADING IS COMPLETED WITHIN THOSE AREAS. SEED, FERTILIZE, AND MULCH / EROSION MAT TOPSOIL AREAS, AS DESIGNATED BY THE ENGINEER, WITHIN FIVE (5) CALENDAR DAYS AFTER PLACING TOPSOIL
- STOCKPILE EXCESS MATERIAL OR SPOILS ON UPLAND AREAS AWAY FROM WETLANDS, FLOODPLAINS, AND WATERWAYS. STOCKPILED SOIL SHALL BE PROTECTED AGAINST EROSION. IF STOCKPILED MATERIAL IS LEFT MORE THAN FOURTEEN (14) CALENDAR DAYS, SEED THE STOCKPILE WITH TEMPORARY SEED AND MULCH.
  - EROSION CONTROL DEVICES SHALL BE PLACED IN SEQUENCE WITH CONSTRUCTION OPERATIONS OR AS DETERMINED BY THE ENGINEER.

DO NOT APPLY FERTILZER WITHIN 100 FEET OF A WATERBODY OR WETLAND OR WITHIN 24 HOURS OF A RUNOFF EVENT.

SUBSURFACE EXPLORATION REPORTS WITH SOIL BORING INFORMATION ARE AVAILABLE FROM KENOSHA COUNTY, CLEMENT ABONGWA AT (262) 653-1870.

MONOLITHIC BASE

### **GENERAL NOTES**

DETAILS OF CONSTRUCTION, MATERIALS AND WORKMANSHIP NOT SHOWN ON THIS DRAWING SHALL CONFORM TO THE PERTINENT REQUIREMENTS OF THE STANDARD SPECIFICATIONS AND THE APPLICABLE SPECIAL PROVISIONS.

UNLESS OTHERWISE AUTHORIZED IN WRITING BY THE ENGINEER, THE CONTRACTOR SHALL NOT ORDER AND DELIVER PRECAST CATCH BASIN UNITS REQUIRED FOR THE PROJECT UNTIL A LIST OF SIZES IS FURNISHED BY THE ENGINEER.

DETAILED DRAWINGS FOR PROPOSED ALTERNATE DESIGNS FOR UNDERGROUND DRAINAGE STRUCTURES SHALL BE SUBMITTED TO THE ENGINEER FOR APPROVAL PROVIDING THAT SUCH ALTERNATE DESIGNS MAKE PROVISION FOR EQUIVALENT CAPACITY AND STRENGTH.

ALL DRAINAGE STRUCTURES ARE DESIGNATED ON THE PLANS AS "MANHOLES 3X3-L", "CATCH BASINS 4-B", "INLETS 2X3-H", ETC. THE FIRST NUMBERS DESIGNATE THE SIZE OF THE STRUCTURE, AND THE FOLLOWING LETTER DESIGNATES THE TYPE OF COVER TO BE USED TO COMPRISE THE COMPLETE UNIT.

BASES SHALL BE PLACED ON A BED OF MATERIAL AT LEAST 6 INCHES IN DEPTH, WHICH MEETS THE REQUIREMENTS OF FOUNDATION BACKFILL. THIS BEDDING SHALL BE COMPACTED AND PROVIDE UNIFORM SUPPORT FOR THE ENTIRE AREA OF THE BASE.

PRECAST REINFORCED CONCRETE CONE TOPS (ECCENTRIC OR CONCENTRIC) OR PRECAST REINFORCED CONCRETE FLAT SLAB TOPS MAY BE USED ON CONCRETE BLOCK STRUCTURES.

ECCENTRIC CONE TOPS MAY BE USED ON ALL STRUCTURES, AND CONCENTRIC CONE TOPS SHALL BE USED ONLY ON STRUCTURES 5 FEET OR LESS IN DEPTH, UNLESS OTHERWISE DIRECTED BY THE ENGINEER.

STEPS MEETING AASHTO M199 AND THE FOLLOWING REQUIREMENTS SHALL BE INSTALLED IN ALL STRUCTURES OVER 5 FEET IN DEPTH: 16 INCH C-C MAXIMUM SPACING: PROJECT A MINIMUM CLEAR DISTANCE OF 4 INCHES FROM THE WALL AT THE POINT OF EMBEDMENT; MINIMUM LENGTH OF 10 INCHES; MINIMUM WALL EMBEDMENT OF 3 INCHES, FERROUS METAL STEPS NOT PAINTED OR TREATED TO RESIST CORROSION SHALL HAVE A MINIMUM CROSS SECTIONAL DIMENSION OF LINCH.

STEPS OF APPROVED POLYPROPYLENE PLASTIC COATED REINFORCEMENT BAR ARE ACCEPTABLE.
REINFORCING BAR MUST BE A MINIMUM OF 1/2 INCH AND MEET THE REQUIREMENTS OF ASTM A615.

CERTIFICATION SHALL BE PROVIDED THAT INSTALLED STEPS WHEN TESTED IN ACCORDANCE WITH SECTION 10 OF AASHTO 1280 CAN WITHSTAND A VERTICAL LOAD OF 800 LBS. AND A HORIZONTAL LOAD OF 400 LBS.

ALL BAR STEEL REINFORCEMENT SHALL BE EMBEDDED 2 INCHES CLEAR UNLESS OTHERWISE SHOWN OR NOTED.

ALL PRECAST INLET UNITS SHALL CONFORM TO THE PERTINENT REQUIREMENTS OF AASHTO DESIGNATION MI99.

PRECAST REINFORCED RISERS SHALL HAVE A TONGUE AND GROOVE JOINT WITH TONGUE UP OR DOWN.

CONCRETE BLOCK WILL NOT BE PERMITED FOR STRUCTURES GREATER THAN 4 FEET IN DIAMETER.

4" OVERHANGING BASES ARE REQUIRED FOR ALL CONCRETE BLOCK INSTALLATIONS. 4" OVERHANG IS REQUIRED WHEN SEPARATE PRECAST BASE IS PROVIDED. OVERHANG IS NOT REQUIRED ON PRECAST STRUCTURES WITH AN INTEGRAL OR MONOLITHIC BASE.

FOR ADDITIONAL CONFIGURATIONS, MAINTAIN A MINIMUM OF 12 INCHES AS MEASURED FROM THE INSIDE OF THE STRUCTURE WALL BETWEEN THE OUTSIDE PIPE WALLS OF ADJACENT PIPES, SEE DETAIL "C".

- ① MINIMUM WALL THICKNESS SHALL BE 4 INCHES FOR 3-FT, 5 INCHES FOR 4-FT, 6 INCHES FOR 5-FT AND 7 INCHES FOR 6-FT DIAMETER PRECAST CATCH BASINS.
- ② FOR PRECAST CATCH BASINS PROVIDE REINFORCING STEEL IN ACCORDANCE TO AASHTO MI99.
- ③ PRECAST FLAT SLAB TOPS AND BASES WITH A DIAMETER OF 48" AND LESS SHALL HAVE A MINIMUM THICKNESS OF 6". PRECAST FLAT SLAB TOPS AND BASES WITH A DIAMETER LARGER THAN 48" SHALL HAVE A MINIMUM THICKNESS OF 8".
- (4) I" CONCRETE KEY POURED AFTER INSTALLATION. 2'SUMP MEASURED FROM TOP OF KEY.

### TRUNCATED DOMES DETECTABLE WARNING PATTERN DETAIL

**PLAN VIEW** DETECTABLE WARNING FIELDS (TYPICAL)

### DETECTABLE WARNING FIELDS THAT ARE INSTALLED AT A CURB RAWP SHALL BE FROM THE SAME MANUFACTURER. PLACE ALL DETECTABLE WARNING FIELD SYSTEMS IN ACCORDANCE TO THE MANUFACTURER'S RECOMMENDATION. FIELD CUTS AT INTERMEDIATE JOINTS WITHIN THE RADIAL DETECTABLE WARNING FILED ARE PROHIBITED. DETERMINE FINAL RADIAL WARNING FIELD CONFIGURATION AND ITS INDIVIDUAL PLATE LOCATIONS, PERFORM PRE-LAYOUT PRIOR TO PLACEMENT IN PLASTIC CONCRETE, FOLLOW MANUFACTURER'S PRODUCT LIST AND INSTALLATION RECOMMENDATIONS.

REFER TO CONTRACT AND STANDARD SPECIFICATIONS FOR FIELD CUTTING REQUIREMENTS. DO NOT EMBED IN CONCRETE ANY FIELD-CUT PLATES WITH CUT EDGES SHORTER THAN 5 INCHES, CONSULT WITH MANUFACTURER

FOR RE-DRILLING AND ANCHORING REQUIREMENTS OF FIELD-CUT PLATES.

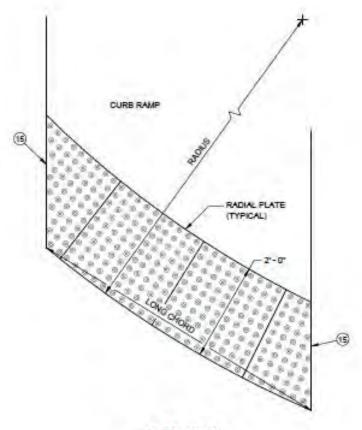

**GENERAL NOTES** 

FIELD SAW CUTS ALONG RADIAL DETECTABLE WARNING PLATES WILL BE NECESSARY TO MATCH EACH CURB RAMP EDGE. AVOID CUTTING

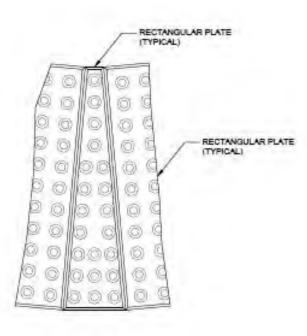

THROUGH DOMES WHENEVER POSSIBLE. MAKE FIELD CUTS TRUE TO LINE AND WITHIN X\* DEVIATION, SMOOTH EDGES OF FIELD CUT PLATES.

FOR RADIAL DETECTABLE WARNING FIELD APPLICATIONS WHERE STANDARD RADIAL PLATES ARE NOT AVAILABLE AT AN INTERSECTION.

CURB FADIUS, A COMBINATION OF SQUARE OR RECTANGULAR PLATES AND RADIAL PLATES MAY BE USED TO FORM RADIAL CONFIGURATION, RADIAL WEDGE PLATES IN COMBINATION WITH SQUARE PLATES ARE ALSO ACCEPTABLE, FOLLOW MANUFACTURER'S

### **GENERAL NOTES**

PROVIDE CONSTRUCTION JOINTS ALONG THE CENTER OF THE CONCRETE FOR DRIVEWAYS UNDER 20 FEET IN WIDTH AND AT THE THIRD POINTS OVER 20 FEET IN WIDTH.

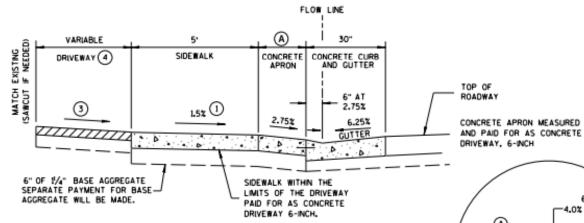

(W) IS SHOWN ON PLAN AND PROFILE SHEETS.

OFFSETS, ELEVATIONS, AND PERCENT GRADE ARE SHOWN ON THE CROSS SECTIONS.

- 1) CONSTRUCTION TOLERANCE OF 0.5% + FOR SIDEWALK CROSS SLOPE. THE SIDEWALK CROSS SLOPE SHALL NOT EXCEED 2%.
- THE SIDEWALK RAMP MAXIMUM RUNNING SLOPE SHALL NOT REQUIRE THE RAMP LENGTH TO EXCEED 15 FEET TO AVOID CHASING THE SLOPE INDEFINITELY WHEN CONNECTING TO STEEP GRADES. WHEN APPLYING THE 15 FOOT MAXIMUM LENGTH, THE RUNNING SLOPE OF THE SIDEWALK SHALL BE AS FLAT AS FEASIBLE AND NOT EXCEED THE LONGITUDINAL GRADE OF THE ROADWAY. SLOPE SIDEWALK RAMP TOWARD APRON AS SHOWN WHERE THERE IS NO TERRACE OR WHERE THE TERRACE WIDTH IS LESS THAN 6 FEET WIDE.
- 3) DRIVEWAY SLOPES: DESIRABLE MAXIMUM

10.5% UP AWAY FROM SIDEWALK (SAG) 8.5% DOWN AWAY FROM SIDEWALK (CREST) ABSOLUTE MAXIMUM 15% FOR BOTH CREST AND SAG

### NOTES

A MAXIMUM RADIUS OF 10 FEET SHALL BE USED FOR NON-COMMERCIAL PRIVATE ENTRANCES. RADII FOR COMMERCIAL DRIVEWAYS SHALL BE DETERMINED BY THE ENGINEER BASED ON TRAFFIC AND DRIVEWAY PERMIT RESTRICTIONS.

THE MINIMUM ANGLE OF INTERSECTION BETWEEN THE DRIVEWAY AND HIGHWAY CENTERLINES SHALL BE 70°.

ALL CURVILINEAR PRIVATE ENTRANCE OUTLINES SHALL BE CONTAINED WITHIN THE HIGHWAY R/W.

NO DRIVEWAY SHALL BE BUILT WITHIN 3 FEET OF THE PROPERTY LINE EXCEPT FOR EXISTING JOINT DRIVEWAY SHARED BY TWO OWNERS.

### GENERAL NOTES

DETAILS OF CONSTRUCTION NOT SHOWN ON THIS DRAWING SHALL CONFORM TO THE PERTINENT REQUIREMENTS OF THE STANDARD SPECIFICATIONS AND APPLICABLE SPECIAL PROVISIONS.

- (1) HORIZONTAL BRACE REQUIRED WITH 2" X 4" WOODEN FRAME OR EQUIVALENT AT TOP OF POSTS.
- ② FOR MANUAL INSTALLATIONS THE TRENCH SHALL BE A MINIMUM OF 4" WIDE & 6" DEEP TO BURY AND ANCHOR THE GEOTEXTILE FABRIC. FOLD MATERIAL TO FIT TRENCH AND BACKFILL & COMPACT TRENCH WITH EXCAVATED SOIL.
- 3 WOOD POSTS SHALL BE A MINIMUM SIZE OF 1/8" X 1/8" OF OAK OR HICKORY.
- SILT FENCE TO EXTEND ACROSS THE TOP OF THE PIPE.
- (S) CONSTRUCT SILT FENCE FROM A CONTINUOUS ROLL IF POSSIBLE BY CUTTING LENGTHS TO AVOID JOINTS, IF A JOINT IS NECESSARY USE ONE OF THE FOLLOWING TWO METHODS; A) OVERLAP THE END POSTS AND TWIST, OR ROTATE, AT LEAST 180 DEGREES, B) HOOK THE END OF EACH SILT FENCE LENGTH.

INLET PROTECTION, TYPE A

INLET PROTECTION DEVICES SHALL BE MAINTAINED OR REPLACED AT THE DIRECTION OF THE ENGINEER.

MANUFACTURED ALTERNATIVES APPROVED AND LISTED ON THE DEPARTMENT'S EROSION CONTROL PRODUCT ACCEPTABILITY LIST MAY BE SUBSTITUTED.

WHEN REMOVING OR MAINTAINING INLET PROTECTION, CARE SHALL BE TAKEN SO THAT THE SEDIMENT TRAPPED ON THE GEOTEXTILE FABRIC DOES NOT FALL INTO THE INLET. ANY MATERIAL FALLING INTO THE INLET SHALL BE REMOVED IMMEDIATELY.

- ① FINISHED SIZE, INCLUDING FLAP POCKETS WHERE REQUIRED, SHALL EXTEND A MINIMUM OF 10" AROUND THE PERIMETER TO FACILITATE MAINTENANCE OR REMOVAL.
- ② FOR INLET PROTECTION, TYPE C (WITH CURB BOX), AN ADDITIONAL 18" OF FABRIC IS WRAPPED AROUND THE WOOD AND SECURED WITH STAPLES. THE WOOD SHALL NOT BLOCK THE ENTIRE HEIGHT OF THE CURB BOX OPENING.
- 3) FLAP POCKETS SHALL BE LARGE ENOUGH TO ACCEPT WOOD 2X4.

### INLET PROTECTION, TYPE C (WITH CURB BOX)

### INSTALLATION NOTES

### TYPE B & C

TRIM EXCESS FABRIC IN THE FLOW LINE TO WITHIN 3" OF THE GRATE.

THE CONTRACTOR SHALL DEMONSTRATE A METHOD OF MAINTENANCE, USING A SEWN FLAP, HAND HOLDS OR OTHER METHOD TO PREVENT ACCUMULATED SEDIMENT FROM ENTERING THE INLET.

### TYPE D

DO NOT INSTALL INLET PROTECTION TYPE D IN INLETS SHALLOWER THAN 30", MEASURED FROM THE BOTTOM OF THE INLET TO THE TOP OF THE GRATE.

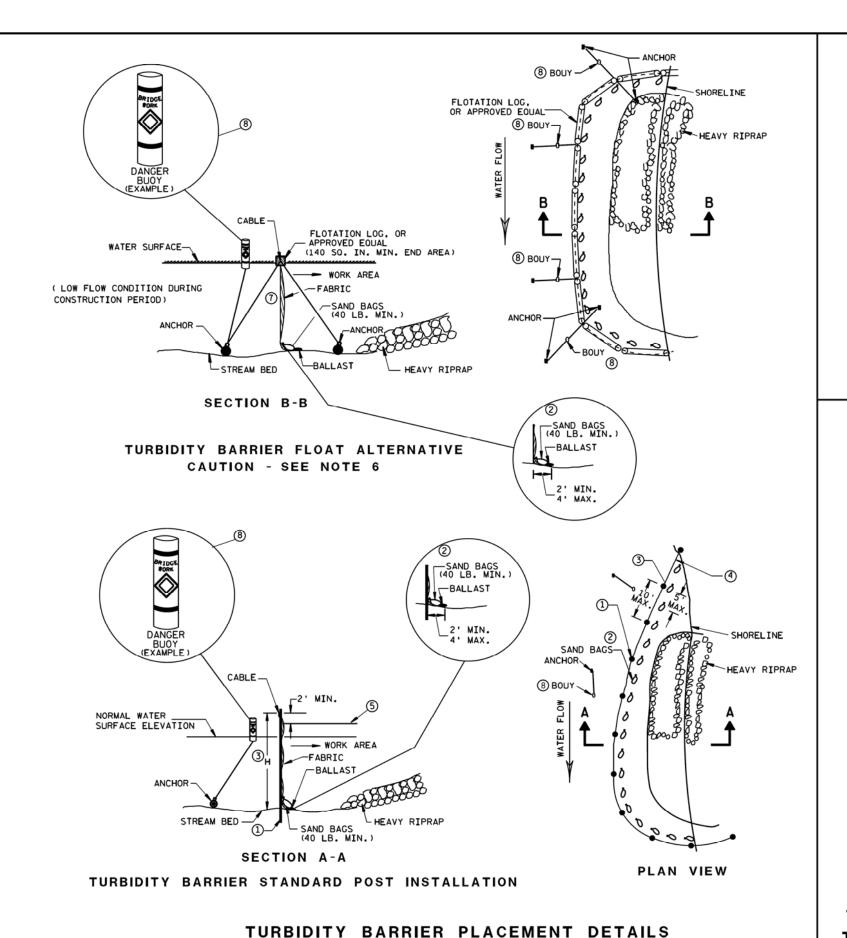

TRIM EXCESS FABRIC IN THE FLOW LINE TO WITHIN 3" OF THE GRATE.

THE INSTALLED BAG SHALL HAVE A MINIMUM SIDE CLEARANCE, BETWEEN THE INLET WALLS AND THE BAG, MEASURED AT THE BOTTOM OF THE OVERFLOW HOLES, OF 3". WHERE NECESSARY THE CONTRACTOR SHALL CINCH THE BAG, USING PLASTIC ZIP TIES, TO ACHIEVE THE 3" CLEARANCE. THE TIES SHALL BE PLACED AT A MAXIMUM OF 4" FROM THE BOTTOM OF THE BAG.

INLET PROTECTION TYPE A, B, C, AND D

### GENERAL NOTES

DETAILS OF CONSTRUCTION, MATERIALS AND WORKMANSHIP NOT SHOWN ON THIS DRAWING SHALL CONFORM TO THE PERTINENT REQUIREMENTS OF THE STANDARD SPECIFICATIONS AND THE APPLICABLE SPECIAL PROVISIONS.

CONCRETE CULVERT ENDWALLS MAY NOT BE USED WITH GALVANIZED STEEL OR ALUMINUM CULVERT PIPE OR VISE VERSA. GALVANIZED STEEL OR ALUMINUM ENDWALLS SHALL NORMALLY BE INSTALLED ON CULVERT PIPE

ALL THREE PIECE STEEL APRON ENDWALLS FOR 60" DIAMETER PIPE AND LARGER SHALL HAVE 0.109" SIDES AND 0.138" CENTER PANELS. ALL THREE PIECE ALUMINUM APRON ENDWALLS FOR 60" DIAMETER PIPE AND LARGER SHALL HAVE 0.105" SIDES AND 0.134" CENTER PANELS. THE WIDTH OF CENTER PANELS SHALL BE GREATER THAN 20 PERCENT OF THE PIPE

LAP SEAMS SHALL BE TIGHTLY JOINED BY GALVANIZED RIVETS OR BOLTS FOR STEEL UNITS AND ALUMINUM RIVETS AND BOLTS FOR ALUMINUM UNITS. FOR THE 60" THROUGH 96" DIAMETER APRON ENDWALL SIZES, THE REINFORCED EDGES AND CENTER PANEL SEAMS SHALL BE FURTHER REINFORCED WITH GALVANIZED STEEL OR ALUMINUM STIFFENER ANGLES. THE ANGLES SHALL BE ATTACHED BY GALVANIZED NUTS AND BOLTS FOR STEEL UNITS AND ALUMINUM NUTS AND BOLTS FOR ALUMINUM UNITS.

WHERE TWO OR MORE PIPES WITH APRON ENDWALLS ARE LAID ADJACENT TO EACH OTHER, THEY SHALL BE SEPARATED BY A DISTANCE SUFFICIENT TO PROVIDE A MINIMUM CLEARANCE OF 6 INCHES BETWEEN APRON ENDWALLS.

(1) FOR PIPE SIZES UP TO 60" DIAMETER, A 180° ROLLED EDGE MAY BE USED INSTEAD OF STEEL ROD REINFORCEMENT. SEE SECTION A-A.

EYE BOLT AND TIE ROD ASSEMBLY (ALTERNATE NO. 1)

### GENERAL NOTES

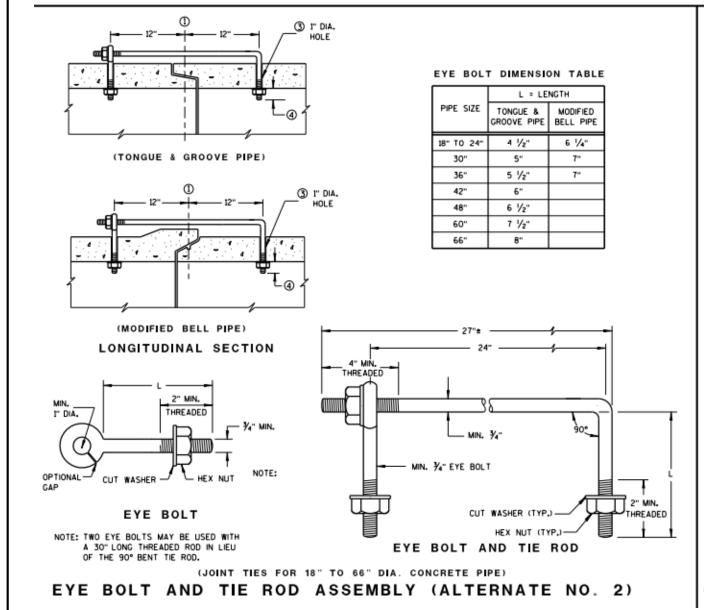

DETAILS OF CONSTRUCTION, MATERIALS, AND WORKMANSHIP NOT SHOWN ON THIS DRAWING SHALL CONFORM TO THE PERTINENT REQUIREMENTS OF THE STANDARD SPECIFICATIONS AND APPLICABLE SPECIAL PROVISIONS.

CONCRETE CULVERT AND STORM SEWER PIPE SHALL BE TIED TOGETHER IN THE MANNER ILLUSTRATED BY THIS DETAIL AT LOCATIONS DESIGNATED IN THE STANDARD SPECIFICATIONS AND THE PLAN. THE CONTRACTOR MAY USE EITHER ALTERNATE 1, 2 OR 3 FOR DRAINAGE STRUCTURES. ONLY ALTERNATE 1 AND 3 MAY BE USED FOR CATTLE PASSES, UNLESS OTHERWISE STATED IN THE CONTRACT. THE MATERIALS, FABRICATION AND WORK NECESSARY TO TIE THE PIPE BY THIS DETAIL WILL BE CONSIDERED INCIDENTAL TO THE PIPE AND APRON ENDWALLS IF REQUIRED.

DETAILED DRAWINGS FOR PROPOSED ALTERNATE DESIGNS FOR JOINT TIES SHALL BE SUBMITTED TO THE ENGINEER FOR APPROVAL.

JOINT TIES TO BE HOT-DIP GALVANIZED PER ASTM A 153.

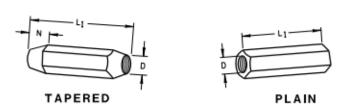

- ① & OF TONGUE AND GROOVE OR BELL AND SPIGOT JOINTS.
- ② THE INSIDE OF THE THREADED INSERTS SHALL BE CLEAN TO ALLOW THE INSERTION OF THREADED EYE BOLTS.
- ③ HOLES SHALL BE CAST-IN-PLACE OR DRILLED 12 INCHES FROM €. OF TONGUE AND GROOVE.
- BOLT PROJECTION INSIDE OF PIPE SHALL NOT EXCEED 2 INCHES.
- ⑤ OPENING TO BE ROD DIAMETER PLUS 1 INCH.
- ⑥ LENGTH ADEQUATE TO EXTEND TO WITHIN ½ INCH OF THE INNER SURFACE OF THE PIPE.

PROJECT NO: RD16-003 HWY: CTH S COUNTY: KENOSHA CONSTRUCTION DETAILS SHEET: 49 E

FILE NAME : \_\_\_\_\_\_ PLOT DATE : \_\_\_\_\_ PLOT BY : \_\_\_\_\_ PLOT NAME : \_\_\_\_\_ PLOT SCALE : 1:1

DETAILS OF CONSTRUCTION, MATERIALS AND WORKMANSHIP NOT SHOWN ON THIS DRAWING SHALL CONFORM TO THE PERTINENT REQUIREMENTS OF THE STANDARD SPECIFICATIONS AND THE APPLICABLE SPECIAL PROVISIONS.

ALTERNATIVE DESIGNS WHICH PROVIDE EQUIVALENT CAPACITY AND STRENGTH MAY BE USED WHEN APPROVED BY THE ENGINEER, ENDWALL MAY BE EITHER PRECAST OR CAST-IN-PLACE CONCRETE.

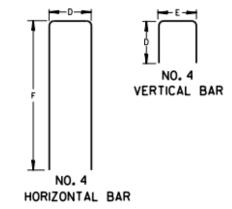

THE UNDERDRAIN PIPE SHALL BE FULLY INSERTED AND SEALED INTO THE ENDWALL WITH CEMENT MORTAR PRIOR TO BACKFILLING AROUND THE STRUCTURE.

THE UPPERMOST POINT OF THE ENDWALL SHALL BE PLACED FLUSH WITH THE ROADWAY SLOPE. ADJACENT EMBANKMENT SLOPES SHALL BE SHAPED TO FIT THE SIDES AND TOE OF THE ENDWALL, EXACT PLACEMENT OF THE OUTFALL PIPE AND ENDWALL SHALL BE DETERMINED BY THE ENGINEER TO MATCH THE ELEVATIONS AND FLOW DIRECTION OF THE ROADSIDE DITCH.

1) THE OUTFALL PIPE UNDERDRAIN AND FITTINGS SHALL CONFORM TO THE REQUIREMENTS OF THE SPECIFICATION FOR POLY (VINYL CHORIDE) (PVC) PLASTIC DRAIN, WASTE AND VENT PIPE AND FITTINGS, ASTM DESIGNATION: D 2665, SCHEDULE 40 PVC OR THE STANDARD SPECIFICATION FOR TYPE PSM POLY (VINYL CHORIDE) (PVC) SEWER PIPE AND FITTINGS. ASTM DESIGNATION: D 3034, TYPE PSM SDR 23.5 PVC SEWER PIPE, ALL JOINTS SHALL BE SOLVENT

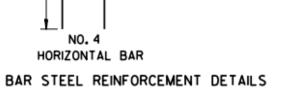

THE OUTFALL PIPE INCLUDING ALL FITTINGS AND THE RODENT SHIELD SHALL BE MEASURED AND PAID FOR AS PIPE UNDERDRAIN UNPERFORATED.

2) THE RODENT SHIELD SHALL BE A PVC GRATE SIMILAR TO THIS DETAIL. THE GRATE IS COMMERCIALLY AVAILABLE AS A FLOOR STRAINER. A PIPE COUPLING IS REQUIRED FOR THE ATTACHMENT OF THIS SHIELD TO THE OUTFALL PIPE. THE SHIELD SHALL BE FASTENED TO THE PIPE COUPLING WITH TWO OR MORE NO. 10 X 1-INCH STAINLESS STEEL SHEET METAL

PLOT DATE : PLOT NAME : FILE NAME : PLOT SCALE: 1:1

### **DETAIL FOR 16" BLOCKOUT DEPTH**

IT IS ACCEPTABLE TO USE BLOCKOUTS UP TO 16" DEEP TO INCREASE THE POST OFFSET TO AVOID UNDERGROUND OBSTACLES, THERE IS NO LIMIT TO THE NUMBER OF POSTS THAT CAN HAVE ADDITIONAL BLOCKOUTS UP TO 16" DEEP,

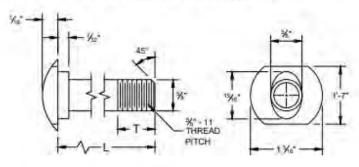

### **DETAIL FOR 36" BLOCKOUT DEPTH**

NOTES: UNDER SPECIAL CIRCUMSTANCES, SUCH AS AVOIDING OBSTACLES THAT ARE NOT RELOCATED. IT IS ACCEPTABLE TO INSTALL ADDITIONAL BLOCKOUTS TO OBTAIN UP TO 36" DEPTH FOR ONE OR TWO POSTS IN A SECTION OF GUARDRAIL.

DO NOT USE 16" OR 36" BLOCKOUTS IF IT CAUSES THE POST TO BE DRIVEN BEYOND SHOULDER HINGE POINT OR CAUSES A FIXED OBJECT TO BE WITHIN THE DEFLECTION DISTANCE OF THE BARRIER.

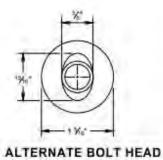

### NOTE

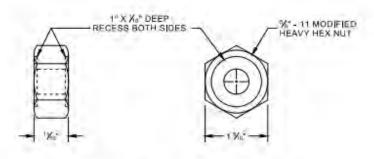

- 1. ALL FILLETS SHALL HAVE A MINIMUM RADIUS OF Xa".
- IF THE BOLT EXTENDS MORE THAN A\* FROM THE NUT THE BOLT SHOULD BE TRIMMED BACK.

### POST BOLT TABLE

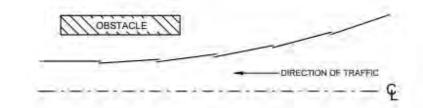

L	T (MIN.)
176	136
2	1.97
100	4"
147	4 X <sub>16</sub>
18	42

# ROAD CLOSURE BARRICADE DETAIL APPROACH VIEW

LANE CLOSURE BARRICADE DETAIL
APPROACH VIEW

SEE SDD 15C2 - SHEET "a" FOR LEGEND

### **GENERAL NOTES**

THE EXACT NUMBER, LOCATION, AND SPACING OF ALL SIGNS AND BARRICADES SHALL BE ADJUSTED TO FIT FIELD CONDITIONS AS APPROVED BY THE ENGINEER.

ANY SIGNS TEMPORARY OR EXISTING, WHICH CONFLICT WITH TRAFFIC CONTROL "IN USE", SHALL BE REMOVED OR COVERED AS NEEDED AND AS APPROVED BY THE ENGINEER.

THE SPACING BETWEEN TRAFFIC CONTROL SIGNS SHOULD BE ADJUSTED TO NOT CONFLICT WITH AND SHOULD PROVIDE A DESIRABLE MINIMUM OF 200 FEET CLEARANCE TO EXISTING SIGNS THAT WILL REMAIN IN PLACE.

BARRICADES THAT MUST BE MOVED FOR A WORK OPERATION SHALL BE IMMEDIATELY RE-ESTABLISHED UPON COMPLETION OF THE OPERATION, OR FOR CONTINUING OPERATIONS, AT THE END OF EACH WORKING DAY.

SIGNS THAT WILL BE IN PLACE LESS THAN 7 CONTINUOUS DAYS AND NIGHTS MAY BE MOUNTED ON PORTABLE SUPPORTS.

ALL TYPE III BARRICADES SHALL HAVE RAILS REFLECTORIZED ON BOTH FACES. STRIPES SHALL BE PROPERLY SLOPED DOWN TOWARD THE TRAFFIC SIDE OR AS SHOWN IN THE ROAD CLOSURE BARRICADE DETAIL "D" FOR FULL ROAD CLOSURES.

TYPE "A" LOW - INTENSITY FLASHING WARNING LIGHTS SHALL BE VISIBLE ON BOTH SIDES OF THE BARRICADE.

THE R11 - 2, R11 - 3, M4 - 9, R11 - 4, AND R10 - 61 SIGNS PLACED ON THE BARRICADES SHALL COVER NO MORE THAN THE TOP RAIL. THE SIGNS SHALL NOT COVER ANY PORTION OF THE MIDDLE RAIL OR BOTTOM RAILS.

"WO" AND "MO" SIGNS ARE THE SAME AS "W" AND "M" SIGNS EXCEPT THE BACKGROUND IS ORANGE.

ALL SIGNS SHALL BE 48" X 48" UNLESS OTHERWISE NOTED BELOW:

R11-2 SHALL BE 48" X 30"

R11 - 3 SHALL, R11 - 4 AND R10 - 61 SHALL BE 60 " X 30"

M4 - 9 SHALL BE 30" X 24"

M3 - X SHALL BE 24" X 12" (36" X 18" IF NEEDED TO MATCH EXISTING SIGNS

M4 - 8 SHALL BE 24" X 12" (36" X 18" IF NEEDED TO MATCH EXISTING SIGNS)

M1 - 4, M1 - 5A AND M1 - 6 SHALL BE 24" X 24" (36" X 36" IF NEEDED TO MATCH EXISTING SIGNS)

MO5 - 1 AND MO6 - 1 SHALL BE 21" X 21" (30" X 30" IF NEEDED TO MATCH EXISTING SIGNS)

D1 - X SHALL BE AS SHOWN ON SPECIFIC PROJECT SIGNING DETAIL SHEETS.

R1 - 1 SHALL BE 36" X 36"

- TWO WARNING LIGHTS SHALL BE PROVIDED ON THE CENTER BARRICADE AND A MINIMUM OF ONE WARNING LIGHT SHALL BE PROVIDED ON EACH OF THE OTHER BARRICADES WITHIN THE ROADWAY LIMITS. SPACING OF THE WARNING LIGHTS SHALL BE UNIFORM TO THE EDGE OF ROADWAY AS SHOWN (APPROX. 8 FOOT LIGHT SPACING.
- (2) THESE SIGNS AND BARRICADES ARE NOT REQUIRED IF ROAD CLOSURE BEGINS AT AN INTERSECTION.
- (3) FOR ROAD CLOSURE WITHOUT LOCAL ACCESS TO PROJECT, SEE ROAD CLOSURE BARRICADE DETAIL "D".
- (4) FOR ROAD CLOSURE WITH LOCAL ACCESS TO PROJECT, SEE ROAD CLOSURE BARRICADE DETAIL "E".
- FOR BRIDGE OR CULVERT REPLACEMENTS, SUBSTITUTE "BRIDGE OUT" INSTEAD OF "ROAD CLOSED" ON R11 2 AND R11 3 SIGNS.
- (6) INSTALL DETOUR AND COMMUNITY GUIDE SIGNS AND ARROWS ONLY IF SPECIFIED IN THE CONTRACT. IF THERE ARE EXISTING ROUTE MARKER ASSEMBLIES THAT WILL REMAIN IN PLACE, ADJUST THE LOCATION OF THE DETOUR. ROUTE SIGNS TO CORRESPOND WITH THE EXISTING ASSEMBLIES. MODIFY EXISTING SIGNS WHERE POSSIBLE. SEE SPECIFIC PROJECT DETOUR SIGNING DETAIL SHEETS. IF DETOUR SIGNS ARE BEING INSTALLED BY OTHERS, PLACE THE CONTRACTED TRAFFIC CONTROL SIGNS TO ALLOW FOR PLACEMENT OF ALL WARNING, DETOUR AND GUIDE SIGNS AS SHOWN.
- "EAST" CARDINAL DIRECTION MARKERS AND RIGHT TURN ARROWS ARE SHOWN. USE OTHER CARDINAL DIRECTIONS AND ARROWS AS APPROPRIATE.

BARRICADES AND SIGNS FOR VARIOUS CLOSURES

PROJECT NO: RD16-003 HWY: CTH S COUNTY: KENOSHA CONSTRUCTION DETAILS SHEET: 72 E

FILE NAME : \_\_\_\_\_\_ PLOT DATE : \_\_\_\_\_ PLOT DATE : \_\_\_\_\_ PLOT BY : \_\_\_\_\_ PLOT NAME : \_\_\_\_\_ PLOT NAME : \_\_\_\_\_ PLOT SCALE : 1:1

### **GENERAL NOTES**

THE EXACT NUMBER, LOCATION, AND SPACING OF ALL SIGNS AND BARRICADES SHALL BE ADJUSTED TO FIT FIELD CONDITIONS AS APPROVED BY THE ENGINEER.

ANY SIGNS TEMPORARY OR EXISTING, WHICH CONFLICT WITH TRAFFIC CONTROL "IN USE" SHALL BE REMOVED OR COVERED AS NEEDED AND AS APPROVED BY THE ENGINEER.

THE SPACING BETWEEN TRAFFIC CONTROL SIGNS SHOULD BE ADJUSTED TO NOT CONFLICT WITH AND SHOULD PROVIDE A DESIRABLE MINIMUM OF 200 FEET CLEARANCE TO EXISTING SIGNS THAT WILL REMAIN IN PLACE.

IF A "STOP" SIGN MUST BE REMOVED FOR A WORK OPERATION, A TEMPORARY "STOP" SIGN SHALL BE PLACED PRIOR TO THE SIGN REMOVAL, OR A FLAGGER SHALL BE PROVIDED UNTIL THE SIGN IS

BARRICADES THAT MUST BE MOVED FOR A WORK OPERATION SHALL BE IMMEDIATELY RE-ESTABLISHED UPON COMPLETION OF THE OPERATION OR, FOR CONTINUING OPERATIONS, AT THE END OF EACH WORKING DAY. SIGNS THAT WILL BE IN PLACE LESS THAN 7 CONTINUOUS DAYS AND NIGHTS MAY BE MOUNTED ON PORTABLE SUPPORTS.

ALL TYPE III BARRICADES SHALL HAVE RAILS REFLECTORIZED ON BOTH FACES. STRIPES SHALL BE PROPERLY SLOPED DOWN TOWARD THE TRAFFIC SIDE OR AS SHOWN IN THE ROAD CLOSURE BARRICADE DETAIL D FOR FULL ROAD CLOSURES.

TYPE "A" LOW-INTENSITY FLASHING WARNING LIGHTS SHALL BE VISIBLE ON BOTH SIDES OF THE BARRICADE.

THE RII-2, RII-3 AND RII-4 SIGNS PLACED ON BARRICADES SHALL COVER NO MORE THAN THE TOP RAIL. THE SIGNS SHALL NOT COVER ANY PORTION OF THE MIDDLE OR BOTTOM RAILS.

ALL SIGNS SHALL BE 48" X 48" UNLESS OTHERWISE NOTED BELOW: R11-2 SHALL BE 48" X 30". RII-4 AND RII-3 SHALL BE 60" X 30".

> \*OMIT THE "ROAD CLOSED 500 FT." SIGN IF THE LAST INTERSECTION IS 500 FT. OR LESS FROM THE WORK ZONE.

\*\*500 MAX. OR AT LAST INTERSECTION WHICHEVER IS CLOSER.

### LEGEND

SIGN ON PORTABLE OR PERMANENT SUPPORT

TEMPORARY PORTABLE RUMBLE STRIP ARRAY

DIRECTION OF TRAFFIC

WORKAREA

PLAGGER, EQUIPPED WITH STOP/SLOW PADDLE FASTENED ON SUPPORT STAFF

### **GENERAL NOTES**

DETAILS OF TRAFFIC CONTROL DEVICES AND INSTALLATION NOT SHOWN ON THIS DRAWING SHALL CONFORM TO THE PERTINENT REQUIREMENTS OF THE STANDARD SPECIFICATIONS, THE SPECIAL PROVISIONS, AND THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES.

ALL SIGNS ARE 48" X 48" UNLESS OTHERWISE NOTED.

"WO" SIGNS ARE THE SAME AS "W" SIGNS EXCEPT THE BACKGROUND IS GRANGE.

THE EXACT NUMBER, LOCATION AND SPACING OF ALL SIGNS, DEVICES, AND LOGATION OF ALL FLAGGERS SHALL BE ADJUSTED TO FIT FIELD CONDITIONS AS APPROVED BY THE ENGINEER.

THE FIRST ADVANCE WARNING SIGN SHOULD TYPICALLY BE LOCATED IN ADVANCE OF THE ANTICIPATED TRAFFIC BACKUP OR QUEUE.

WHEN A SIDE ROAD OR RAMP INTERSECTS THE FACILITY ON WHICH THE WORK IS BEING PERFORMED, ADDITIONAL TRAFFIC CONTROLS SHALL BE PROVIDED AS SPECIFIED IN THE PLANS AND/OR THE SPECIAL PROVISIONS OR AS APPROVED BY THE ENGINEER.

### FLAGGING

FLAGGERS SHALL BE IN SIGHT OF EACH OTHER OR IN DIRECT COMMUNICATION AT ALL TIMES. THEY SHALL BE EQUIPPED WITH STOP/SLOW PADDLES FASTENED ON SUPPORT STAFFS. WHEN THE FLAGGING OPERATION IS NOT IN EFFECT REMOVE TEMPORARY PORTABLE RUMBLE STRIPS PRIOR TO COVERING OR REMOVING ALL ADVANCE SIGNING.

- FOR MOVING WORK OPERATIONS, POST ADDITIONAL W20-7A FLAGGER SIGNS AT APPROXIMATELY 3,500 INTERVALS IN THE MOVING WORK OPERATION OR AS APPROVED BY THE ENGINEER.
- 3IGN NOT REQUIRED IF FLAGGING OPERATION OCCURS WITHIN A SIGNED ROAD WORK ZONE AREA.

WHEN THE DISTANCE BETWEEN FLAGGERS EXCEEDS 2 MILES, A PILOT CAR IS REQUIRED. WHEN CURVES REDUCE SIGHT DISTANCE BELOW 400' A PILOT CAR IS REQUIRED.

### **TEMPORARY PORTABLE RUMBLE STRIPS**

UTILIZE TEMPORARY PORTABLE RUMBLE STRIPS ON ALL FLAGGING OPERATIONS.

3 EACH TEMPORARY PORTABLE RUMBLE STRIP ARRAY CONSISTS OF THREE RUMBLE STRIPS SPACED ACCORDING TO MANUFACTURER'S RECOMMENDATION, PLACED TRANSVERSE ACROSS THE LANE AT LOCATIONS SHOWN.

ONLY USE TEMPORARY PORTABLE RUMBLE STRIPS FOR THE APPROVED PRODUCTS LIST.

INSTALL TEMPORARY RUMBLE STRIPS PER MANUFACTURER'S RECOMMENDATIONS.

PLACE ADVANCE SIGNING PRIOR TO INSTALLING TEMPORARY RUMBLE STRIPS.

DO NOT INSTALL TEMPORARY PORTABLE RUMBLE STRIPS ON GRAVEL, MILLED SURFACES, OR ASPHALT THAT HAS BEEN PAVED LESS THAN 12 HOURS.

L = TAPER LENGTH IN FEET

W = WIDTH OF LANE CLOSURE

S = NON-CONSTRUCTION SPEED LIMIT (MPH)

### GENERAL NOTES

THIS LANE CLOSURE DETAIL IS TYPICAL FOR CLOSING THE LEFT LANE. FOR A RIGHT LANE CLOSURE, REVERSE THE TRAFFIC CONTROL.

THIS DETAIL MAY BE USED FOR ROADWAYS WITH EITHER TWO OR THREE LANES IN EACH DIRECTION.

THE EXACT NUMBER, LOCATION, AND SPACING OF ALL SIGNS AND DEVICES SHALL BE ADJUSTED TO FIT FIELD CONDITIONS AS APPROVED BY THE ENGINEER.

THE SPACING BETWEEN TRAFFIC CONTROL SIGNS SHOULD BE ADJUSTED TO NOT CONFLICT WITH AND SHOULD PROVIDE A DESIRABLE MINIMUM OF 200 FEET CLEARANCE TO EXISTING SIGNS THAT WILL REMAIN IN PLACE.

ALL SIGNS ARE 48"×48" UNLESS OTHERWISE NOTED. IF NECESSARY DUE TO SPACE CONSTRAINTS IN URBAN AREAS, 36" X 36" SIGNS MAY BE USED IF APPROVED BY DISTRICT TRAFFIC UNIT.

"WO" SIGNS ARE THE SAME AS "W" SIGNS EXCEPT THE BACKGROUND IS ORANGE.

SIGNS THAT WILL BE IN PLACE LESS THAN 7 CONTINUOUS DAYS AND NIGHTS, OR THAT WILL BE PLACED IN A CLOSED LANE, MAY BE MOUNTED ON PORTABLE SUPPORTS.

ANY SIGNS TEMPORARY OR EXISTING, WHICH CONFLICT WITH TRAFFIC CONTROL "IN USE" SHALL BE REMOVED OR COVERED AS NEEDED AND AS APPROVED BY THE ENGINEER.

REMOVE PAVEMENT MARKINGS AND PLACE TEMPORARY PAVEMENT MARKING, REMOVABLE TAPE IF LANE CLOSURE IS TO BE IN PLACE FOR 4 OR MORE CONTINUOUS DAYS AND NIGHTS.

ON UNDIVIDED ROADWAYS, OMIT THE SIGNS SHOWN ON LEFT SIDE OF ROAD.

W2O-1A, G2O-1 AND G2O-2A SIGNS ARE NOT REQUIRED IF THE LANE CLOSURE IS WITHIN A LARGER WORK ZONE WHERE THESE SIGNS ARE ALREADY PRESENT.

OMIT G20-1 SIGNS IF LENGTH OF WORK AREA IS 2 MILES OR LESS.

CONSIDER GEOMETRICS WHEN LOCATING SIGNS AND ARROWBOARDS SO THE APPROACHING DRIVER HAS A CLEAR VIEW OF THE ARROWBOARDS AND LANE CLOSURE DRUMS.

PLACE THE ARROWBOARD AS CLOSE AS POSSIBLE TO THE BEGINNING OF THE LANE CLOSURE TAPER, PREFERABLY ON THE SHOULDER OR TERRACE.

CHANNELIZING DEVICES PLACED ADJACENT TO WORK AREA SHALL BE PULLED BACK FROM THE TRAVEL LANE WHEN WORK IS NOT IN PROGRESS.

BARRICADES IN A CLOSED LANE THAT MUST BE MOVED FOR A WORK OPERATION SHALL BE IMMEDIATELY RE-ESTABLISHED UPON COMPLETION OF THE OPERATION OR, FOR CONTINUING OPERATIONS, AT THE END OF EACH WORKING DAY.

WARNING LIGHTS ARE NOT REQUIRED IF THE LANE CLOSURE IS A DAYTIME ONLY OPERATION.

TRAFFIC CONTROL. SINGLE LANE CLOSURE. NON-FREEWAY/EXPRESSWAY

PROJECT NO: RD16-003 HWY: CTH S COUNTY: KENOSHA CONSTRUCTION DETAILS SHEET: 86 E

REMOVING PAVEMENT MARKING (SEE GENERAL NOTES)

### **GENERAL NOTES**

ALL SIGNS ARE 48"X48" UNLESS OTHERWISE NOTED. IF NECESSARY DUE TO SPACE CONSTRAINTS IN URBAN AREAS, 36" X 36" MAY BE USED IF APPROVED BY THE DISTRICT

"WO" SIGN IS THE SAME AS "W" SIGN EXCEPT THE BACKGROUND IS GRANGE.

MY SIGNS TEMPORARY OR EXISTING, WHICH CONFLICT WITH THE TRAFFIC CONTROL "IN USE" SHALL BE REMOVED OR COVERED AS NEEDED AND AS APPROVED BY THE ENGINEER, NO WARNING LIGHTS SHALL BE WORKING ON COVERED OR "DOWNED" SIGNS.

THE EXACT NUMBER, LOCATION, AND SPACING OF ALL SIGNS AND DEVICES SHALL BE ADJUSTED TO FIT FIELD CONDITIONS AS APPROVED BY THE ENGINEER.

THE SPACING BETWEEN TRAFFIC CONTROL SIGNS SHOULD BE ADJUSTED TO NOT CONFLICT WITH AND TO PROVIDE A MINIMUM OF 200 FEET (500' DESIRABLE) DISTANCE TO EXISTING SIGNS THAT WILL REMAIN IN PLACE

BIGN LAYOUTS SHALL BE IN ACCORDANCE WITH THE FHWA'S MANUAL OF STANDARD HIGHWAY SIGNS OR THE WISCONSIN STANDARD SIGN PLATES.

SIGNS THAT WILL REMAIN IN PLACE LESS THAN 7 CONTINUOUS DAYS AND NIGHTS OR THAT WILL BE PLACED IN A CLOSED LANE MAY BE MOUNTED ON PORTABLE SUPPORTS.

BARRICADES IN A CLOSED LANE THAT MUST BE MOVED FOR A WORK OPERATION SHALL BE IMMEDIATELY REESTABLISHED UPON COMPLETION OF THE OPERATION, OR FOR CONTINUING OPERATIONS, AT THE END OF EACH WORKING DAY.

CHANNELIZING DEVICES PLACED ADJACENT TO WORK AREA SHALL BE PULLED BACK FROM THE TRAVEL LANE WHEN WORK IS NOT IN PROGRESS.

- 3 500 TYPICAL OR AT LAST INTERSECTION, WHICHEVER IS CLOSER. 350' IF 35 - 40 MPH. 200' IF 25 - 30 MPH.
- (2) ALSO USE BARRICADE AND 15 FOOT TYPICAL DRUM SPACING AT COMMERCIAL DRIVEWAYS
- (3) SEE SEPARATE LANE CLOSURE DETAIL FOR ADDITIONAL TRAFFIC CONTROL.

DETAIL OF TUBULAR STEEL SIGN POST

### TUBULAR STEEL POSTS

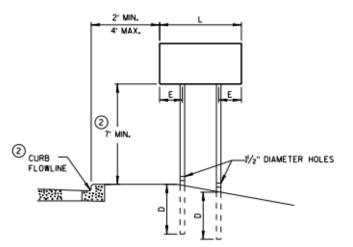

AREA OF SIGN INSTALLATION (SO. FT.)	NUMBER OF REQUIRED TUBULAR STEEL POSTS
9 OR LESS	1
GREATER THAN 9 LESS THAN OR EQUAL TO 18	2
GREATER THAN 18 LESS THAN OR EQUAL TO 27	3

SIGNS WIDER THAN 3 FEET OR LARGER THAN 9 SO.FT. SHALL BE MOUNTED ON MULTIPLE POSTS (SEE ABOVE TABLE). SIGNS LARGER THAN 27 SQ.FT. SHALL NOT BE MOUNTED ON TUBULAR STEEL POSTS.

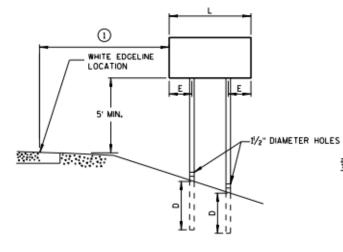

### **GENERAL NOTES**

- (1) 6 FEET FROM THE EDGE OF PAVEMENT (EDGE LINE LOCATION) UNLESS OTHERWISE DIRECTED BY THE PROJECT ENGINEER. LATERAL OFFSET SHOULD BE ADJUSTED TO AVOID THE DITCH FLOWLINE.
- 2) THE EXISTENCE OF CURB AND GUTTER DOES NOT IN ITSELF MANDATE THE VERTICAL CLEARANCE ILLUSTRATED. THAT HEIGHT IS TYPICALLY MEASURED WHERE THERE IS SIDEWALK ADJACENT TO THE ROADWAY OR PARKING IS PERMITTED. IN THE ABSENCE OF SIDEWALK, VERTICAL CLEARANCE IS MEASURED FROM THE TOP OF THE CURB. IF NO SIDEWALK AND NO PARKING. VERTICAL CLEARANCE MAY BE REDUCED TO 5 FOOT MINIMUM. OFFSET OF SIGNS IS MEASURED FROM THE CURB FLOWLINE.
- (3) FOR SIGNS REQUIRING 4 POSTS, SPACE INTERMEDIATE POSTS EVENLY.

FILE NAME : PLOT DATE : PLOT BY: PLOT NAME: PLOT SCALE: 1:1 2

NUTS, BOLTS AND LAGS USED FOR MOUNTING SIGNS SHALL HAVE HEXAGONAL HEADS AND SHALL BE EITHER:

- A. HOT DIP GALVANIZED IN ACCORDANCE WITH ASTM DESIGNATION: A 153, CLASS D. OR SC 3
- B. ELECTRO-GALVANIZED IN ACCORDANCE WITH ASTM DESIGNATION: B 633, TYPE III, SC 3

THREADS ON BOLTS AND NUTS SHALL BE MANUFACTURED WITH SUFFICIENT ALLOWANCE FOR THE CADMIUM PLATE OR GALVANIZED COATING TO PERMIT THE NUTS TO RUN FREELY ON THE BOLTS.

WOOD POSTS (4" x 4" or 4" x 6")

LAG SCREWS - 36" X 3"

MACHINE BOLTS - %" X 6-1/2" OR 7" LENGTH W/ NUTS

SQUARE STEEL POSTS (2" x 2")

MACHINE BOLTS - 3/8" X 3-1/4" LENGTH W/ NUTS

RIVETS - 1/32 (6605-9-6) BULB-TITE, TRI-FOLD, ALUMINUM BODY/MANDREL O.D. FLANGE .720-.765 INCH, GRIP RANGE .042-.375 INCH

WASHERS (ALL POSTS) -

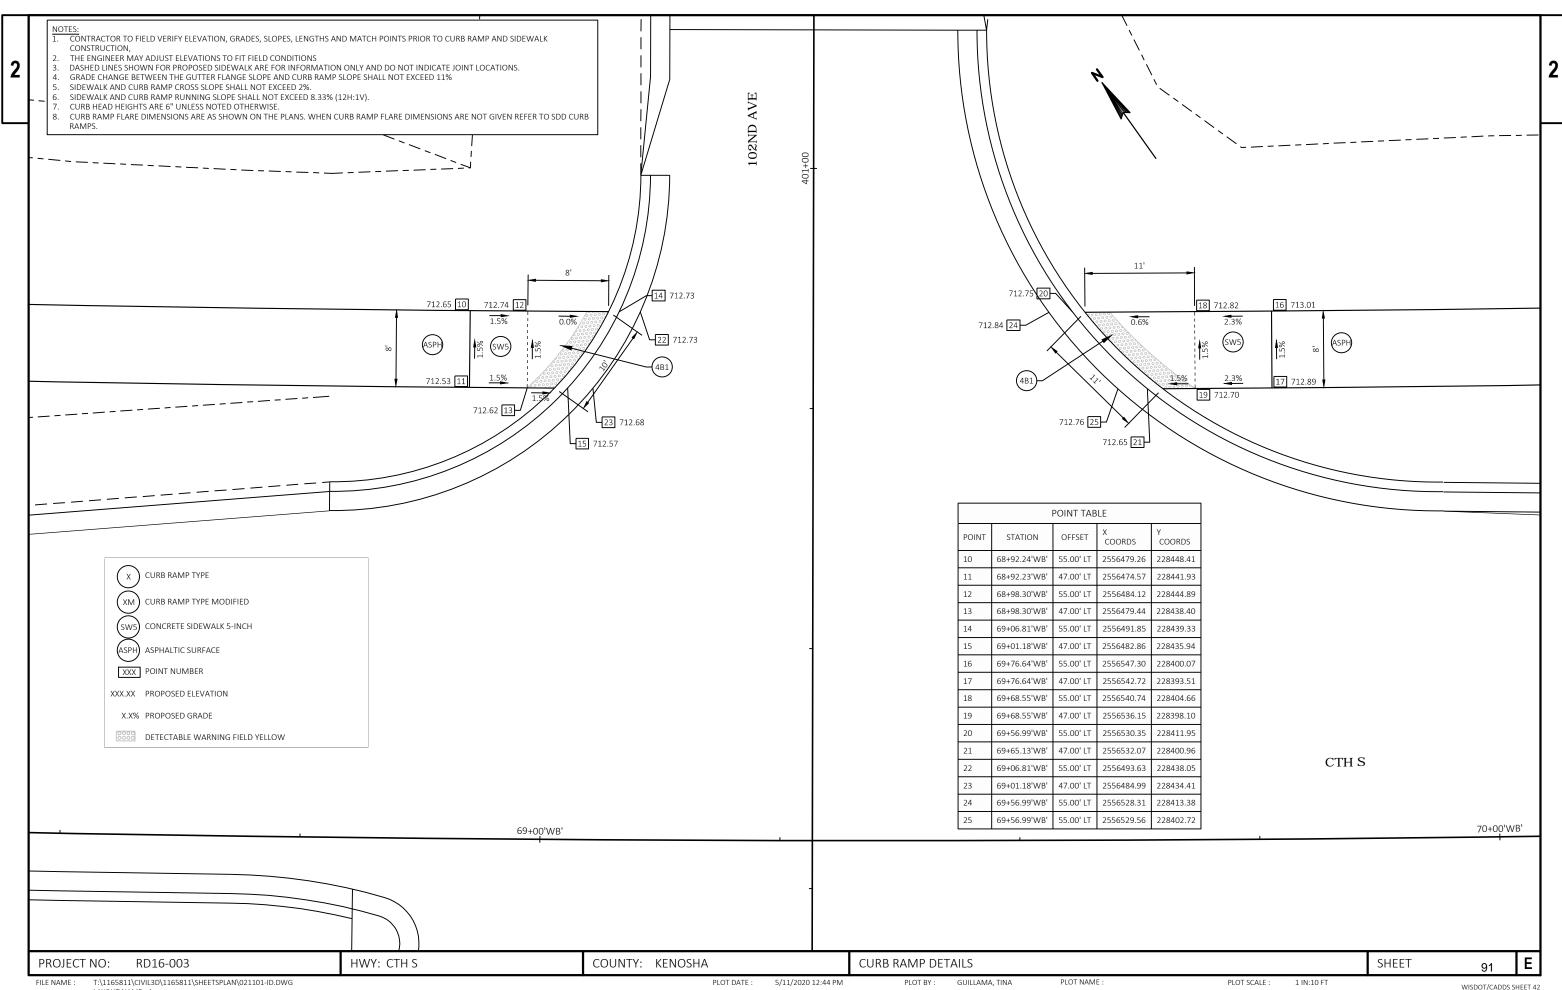

1-1/4" O.D. X 36" I.D. X 1/6" STEEL

1-1/4" O.D. X 36" I.D. X .080 NYLON FOR ALL TYPE H SIGNS

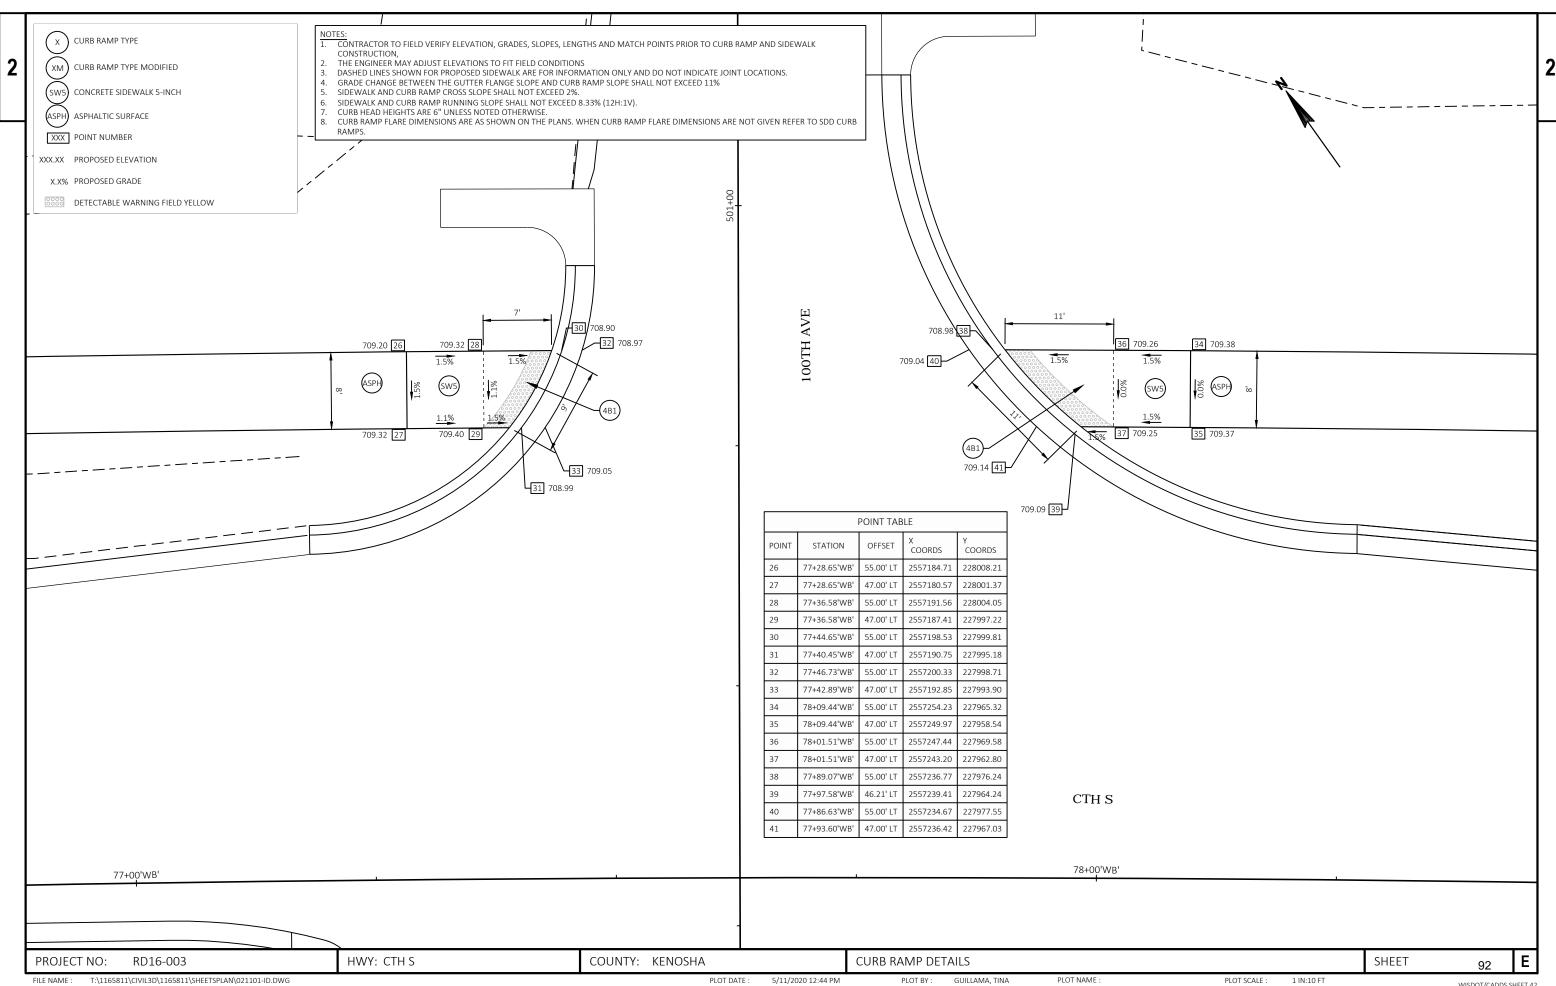

\* TWO DIFFERENT FASTENING SYSTEMS ARE SHOWN FOR ILLUSTRATION PURPOSES. ON ANY INDIVIDUAL SIGN, EITHER ONE OR THE OTHER SYSTEM SHALL BE USED. ACTUAL NUMBER OF FASTENERS PER SIGN VARIES WITH THE SIGN AREA. FOR A SINGLE POST INSTALLATION, ALL SIGNS GREATER THAN 9 SO. FT. REQUIRE THE USE OF 3 FASTENERS.

## Notes

- (1) Total Common Excavation is the sum of the Cut (A) and EBS (B) Excavation columns minus the Contaminated Soil (C) column. Item number 205.0100
- (2) Salvaged/Unusable Pavement Material (D) is included in Cut (A). This assumes the existing pavement is salvaged or wasted by the contractor.
- (3) EBS Excavation is Undistributed and to be used at the direction of the engineer and recommended areas shown on the plan, backfilled with and paid for as Breaker Run, Item 311.0110. It is assumed all EBS will be wasted.
- (4) Contaminated Soil (C) quantities are included in the Cut (A) since they are part of the average end area calculations shown on the Earthwork Data Sheets. Additional location and bid item information is shown elsewhere.
- (5) Available Material (E)= Cut (A) Salvaged/Unusable Pavement Material (D) Contaminated Soil (C).
- (6) Expanded EBS Backfill (F) to be filled with Breaker Run, 1.8 Tons per CY. Additional quantities shown elsewhere. See "Subgrade & Base" table.
- (7) Expanded Fill (H) = Unexpanded Fill (G) x Fill Factor (1.3)
- (8) The Mass Ordinate (I) + or Qty calculated for the roadway segment. Plus quantity indicates an excess of material within the roadway segment. Minus indicates a shortage of material within the roadway segment.
- 9) Waste (J) = EBS (B) + Mass Ordinate (I) and excludes salvaged/unusable pavement material (D) and Contaminated Soil (C).

SHEET NO: 273 E

FILE NAME : C:\Users\PROJECTS\tr\_stdplate\R320R.DGN

PROJECT NO:

PLOT DATE: 15-OCT-2010 14:59

PLOT BY: dotsja PLOT NAME:

PLOT SCALE: 5.959043:1.000000

- 1. Sigs are Type II Type H Reflective
- 2. Color:

Background - White Message - Black

- 3. Message Series D
- 4. Use appropriate Letter for Sign Code Each letter added makes sign wider. Example R3-8EAR
- 5. Square footage of sign varies by letters

2 Letters = 7.5 sq ft for Size 2 12.0 sq ft for Size 3

20.0 sq ft for Size 4 or 5

3 Letters = 11.25 sq ft for Size 2 18.0 sq ft for Size 3

30.0 sq ft for Size 4 or 5

4 Letters = 15.0 sq ft for Size 2

24.0 sq ft for Size 3

40.0 sq ft for Size 4 or 5

5 Letters = 18.75 sq ft for Size 2 30.0 sq ft for Size 3

50.0 sq ft for Size 4 or 5

6 Letters = 22.5 sq ft for Size 2 36.0 sq ft for Size 3

60.0 sq ft for Size 4 or 5

6. When letters C.D.G.H are used on the Left or Right end of the sign the Sq. Ft. changes.

Add the amounts when these letters are used:

1.25 sa ft for Size 2 1.5 sq ft for Size 3 2.0 sq ft for Size 4 or 5

PLOT BY: mscsja

## <u>NOTES</u>

- 1. Sign is Type II Type F Reflective reference WIS DOT Standard Specification for HIGHWAY and STRUCTURE CONSTRUCTION latest edition.
- 2. Color: \* Background - ORANGE\* Message - BLACK
- 3. Message Series C for numbers Series E for wording
- 4. Substitute appropriate numerals and optically adjust spacing to achieve proper balance

\*Speed Limit Sign shall have a White Background

#### DESIGN DATA

LIVE LOAD:

DESIGN LOADING: HL-93 INVENTORY RATING FACTOR: RF = 1.25 OPERATING RATING FACTOR: RF = 1.62 WISCONSIN STANDARD PERMIT VEHICLE (WIS-SPV): 250 KIPS

STRUCTURE IS DESIGNED FOR A FUTURE WEARING SURFACE OF 20 POUNDS PER SQUARE FOOT.

MATERIAL PROPERTIES:

CONCRETE MASONRY SLAB, PARAPETS,

> & STR. APPR. SLABS ALL OTHER (INCL. STR. APPR. SLAB FTGS.) — f'c = 3,500 P.S.I.

HIGH STRENGTH BAR STEEL REINFORCEMENT — fy = 60,000 P.S.I. (INCLUDES STAINLESS STEEL BAR STEEL REINFORCEMENT)

#### FOUNDATION DATA

ABUTMENTS TO BE SUPPORTED ON HP10X42 STEEL PILING WITH A REQUIRED DRIVING RESISTANCE OF 180 TONS A PER PILE AS DETERMINED BY THE MODIFIED GATES DYNAMIC FORMULA. ESTIMATED 70'-0" LONG AT THE WEST ABUTMENT AND 65'-O" LONG AT THE EAST ABUTMENT.

ALLOWABLE SOIL BEARING PRESSURE (STRUCTURAL APPROACH SLABS) -

- 2,000 P.S.F.

### GENERAL NOTES

DRAWINGS SHALL NOT BE SCALED.

BAR STEEL REINFORCEMENT SHALL BE EMBEDDED 2" CLEAR UNLESS OTHERWISE SHOWN OR NOTED.

THE FIRST OR FIRST TWO DIGITS OF THE BAR MARK SIGNIFIES THE BAR SIZE.

THE UPPER LIMITS OF "EXCAVATION FOR STRUCTURES BRIDGES B-30-149" SHALL BE THE EXISTING GROUND LINE

ALL DIMENSIONS ARE IN FEET AND INCHES. ALL STATIONS AND ELEVATIONS ARE IN FEET.

THE SLOPE OF THE FILL IN FRONT OF THE ABUTMENTS SHALL BE COVERED WITH HEAVY RIPRAP AND GEOTEXTILE TYPE 'HR' TO THE EXTENT SHOWN ON THE 'GENERAL PLAN' SHEET AND IN THE ABUTMENT DETAILS.

AT THE BACKFACE OF ABUTMENT ALL VOLUME WHICH CANNOT BE PLACED BEFORE ABUTMENT CONSTRUCTION AND IS NOT OCCUPIED BY THE NEW STRUCTURE SHALL BE BACKFILLED WITH

SLAB FALSEWORK SHALL BE SUPPORTED ON PILES OR THE SUBSTRUCTURE UNLESS AN ALTERNATE METHOD IS APPROVED BY THE ENGINEER.

PROTECTIVE SURFACE TREATMENT SHALL BE APPLIED TO THE TOP OF SLAB AND STRUCTURAL APPROACH SLABS BETWEEN PARAPETS.

PIGMENTED SURFACE SEALER SHALL BE APPLIED TO THE FRONT FACE AND TOP OF PARAPETS INCLUDING PARAPETS ON THE STRUCTURAL APPROACH SLABS.

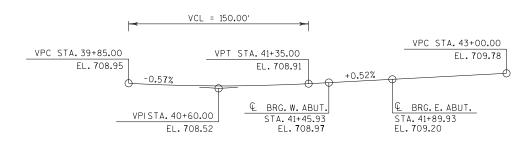

BEVEL EXPOSED EDGES OF CONCRETE  $\frac{3}{4}$ " UNLESS NOTED OTHERWISE.

VARIATIONS TO THE PROPOSED PROFILE GRADE LINE OVER 1/4" MUST BE SUBMITTED BY THE FIELD ENGINEER TO THE DESIGNER FOR REVIEW.

THE EXISTING SOIL CONTAINS AN UPPER LAYER OF DENSE SILTY SOIL, THIS UPPER DENSE SILT LAYER WILL NOT DEVELOP THE SPECIFIED CAPACITIES, AND PILES MUST NOT BE TERMINATED WITHIN THIS UPPER SOIL STRATA, THE PILES MUST BE DRIVEN TO THE UNDERLYING DENSE SOILS AS SPECIFIED IN THE GEOTECHNICAL REPORT IN ORDER TO ACHIEVE THE REQUIRED RESISTANCE.

CONSTRUCTION OF THE ABUTMENTS MAY ENCROACH UPON OR EXTEND BELOW THE WATER LEVEL, AND MAY REQUIRE COMPREHENSIVE DEWATERING WITHIN THE CONSTRUTION AREA. DEWATERING IS RECOMMENDED TO BE PERFORMED TO A DEPTH OF AT LEAST 2-FT BELOW THE LOWEST LEVEL OF EXCAVATION PERFORMED. COST OF DEWATERING AND ANY SHEET PILING/COFFERDAM TYPE CONSTRUCTION REQUIRED IS INCLUDED IN THE BID ITEM "EXCAVATION FOR STRUCTURES BRIDGES

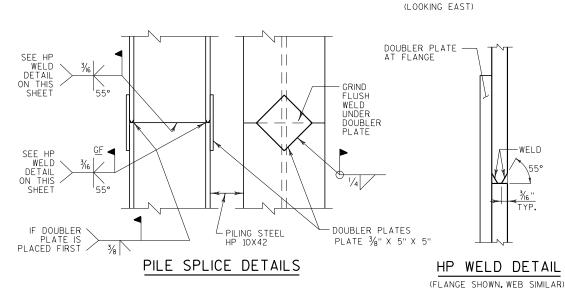

PARTIAL REMOVAL OF WINGWALLS 2 AND 3 OF EXISTING BRIDGE B-30-76 IS INCLUDED IN BID ITEM "REMOVING OLD STRUCTURE STATION 41+68". ALL CONCRETE REMOVAL NOT COVERED BY NEW CONCRETE SHALL BE DEFINED BY A 1-INCH DEEP SAWCUT.

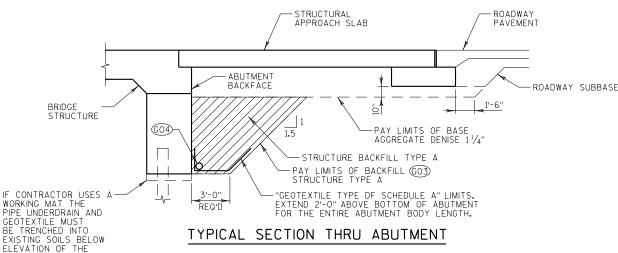

#### PROFILE GRADE LINE - CTH S WB

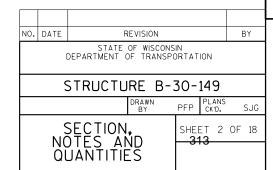

WORKING MAT.

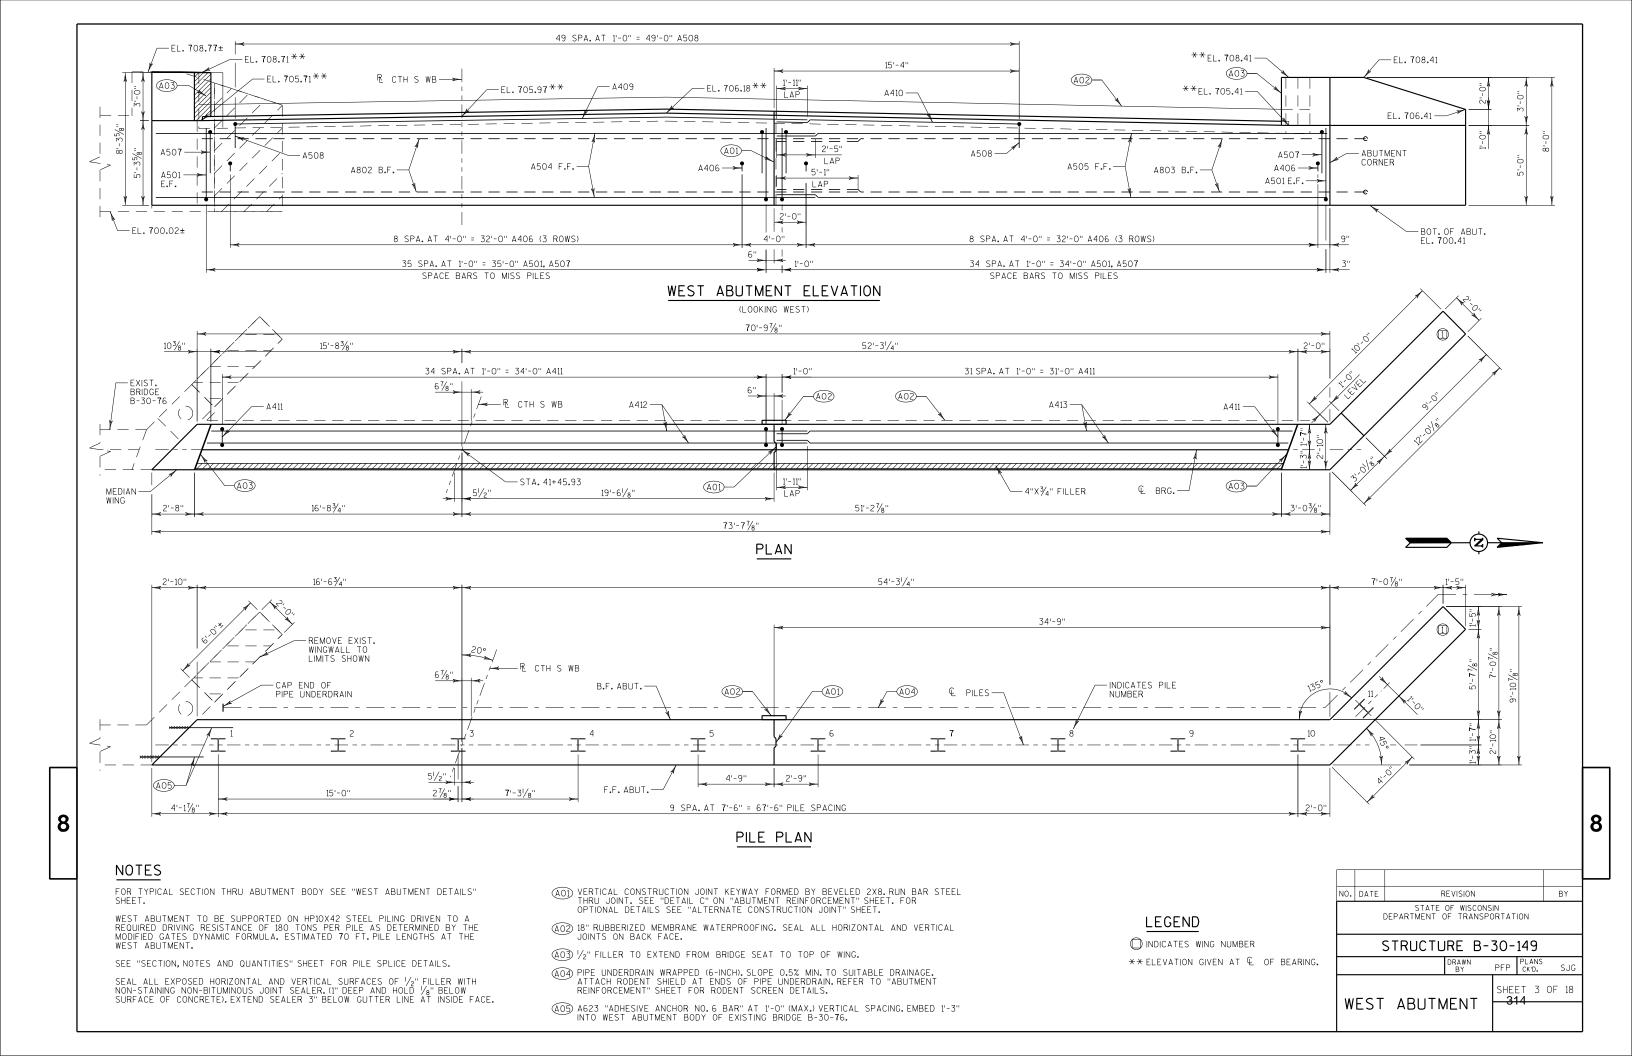

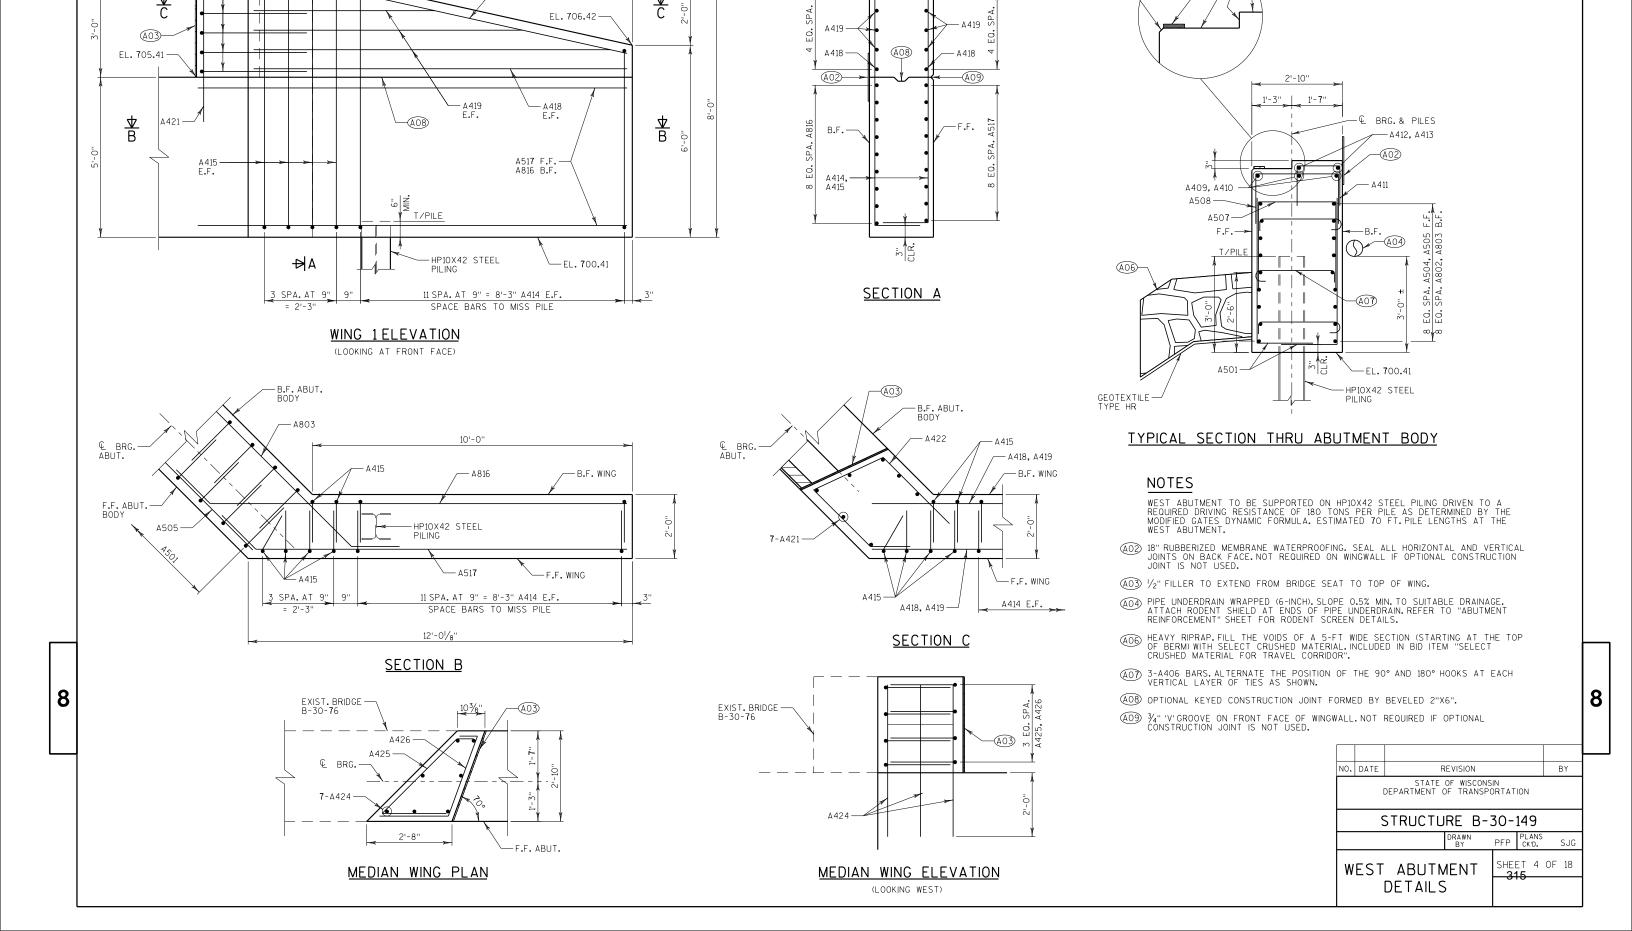

## TYPICAL SECTION THRU ABUTMENT

- BACKFILL PAY LIMITS. BACKFILL BEYOND BACKFILL PAY LIMITS SHALL BE INCIDENTAL TO EXCAVATION FOR STRUCTURES. LIMITS OF EXCAVATION SHALL BE DETERMINED BY THE CONTRACTOR.
- @04 PIPE UNDERDRAIN WRAPPED 6-INCH. SLOPE 0.5% MIN. REFER TO ABUTMENT DETAILS FOR TIE-IN DETAILS. ATTACH RODENT SHIELD AT ENDS OF DAYLIGHTED PIPE UNDERDRAIN. SEE 'ABUTMENT REINFORCEMENT' SHEET FOR DETAILS.

#### RODENT SHIELD DETAIL

\* DIMENSIONS ARE APPROXIMATE. THE GRATE IS SIZED TO FIT INTO A PIPE COUPLING. ORIENT SO SLOTS ARE VERTICAL.

THE RODENT SHIELD, PIPE COUPLING AND SCREWS SHALL BE CONSIDERED INCIDENTAL TO THE BID ITEM "PIPE UNDERDRAIN WRAPPED 6-INCH".

THE RODENT SHIELD SHALL BE A PVC GRATE SIMILAR TO THIS DETAIL. THE GRATE IS COMMERCIALLY AVAILABLE AS A FLOOR STRAINER. A PIPE COUPLING IS REQUIRED FOR THE ATTACHMENT OF THIS SHIELD TO THE EXPOSED END OF THE PIPE UNDERDRAIN, THE SHIELD SHALL BE FASTENED TO THE PIPE COUPLING WITH TWO OR MORE NO. 10 X 1-INCH STAINLESS STEEL SHEET METAL SCREWS.
