Search For Parcels

6. How do I format different search values?

You can fill in as much information as you have on the search screen to narrow your search. For a specific parcel, Parcel Number is most often used.

Below is an example of filling in the Search screen for a parcel.

- Name search is not allowed for general public searches; Name searching is allowed on Kenosha County Register of Deeds and Land Information departments' public access computers.
- If you know the parcel number, just enter that data and press enter.
 - *Full parcel # is required*
 - *At this time, **dashes (" ") in the parcel # are required***
- If you don't know the parcel number, enter as much Property Address, and/or Land Survey (i.e. Metes and Bounds), and/or Municipality information that you know, and press enter.
 - **Partial values in fields are acceptable.** E.g. 10 in Street Name will show all parcels with street names equal to or starting with 10 ... 10th, 101st, etc.

Any combination of the highlighted fields below will retrieve the desired parcel being searched for. In this case, it is Parcel # 12-223-31-302-005. The less specific the search criteria, the greater the number of parcels in the search results list. There may be many pages of results to scroll through if the search is not targeted enough.
